ROYAL SCHOOL OF BUSINESS (RSB)

COURSE STRUCTURE & SYLLABUS
(BASED ON NATIONAL EDUCATION POLICY 2020)

FOR

Bachelor of Business Administration (BBA)

(4 YEARS SINGLE MAJOR)

W.E.F
AY - 2025 – 26

Contents

Preamble

The National Education Policy (NEP) 2020 conceives a new vision for India's higher education system. It recognizes that higher education plays an extremely important role in promoting equity, human as well as societal well-being and in developing India as envisioned in its Constitution. It is desired that higher education, will significantly contribute towards sustainable livelihoods and economic development of the nation as India moves towards becoming a knowledge economy and society.

If we focus on the 21st century requirements, the higher education framework of the nation must aim to develop good, thoughtful, well-rounded, and creative individuals and must enable an individual to study one or more specialized areas of interest at a deep level, and also develop character, ethical and Constitutional values, intellectual curiosity, scientific temper, creativity, spirit of service, and twenty-first-century capabilities across a range of disciplines including sciences, social sciences, arts, humanities, languages, as well as professional, technical, and vocational subjects. A quality higher education should be capable enough to enable personal accomplishment and enlightenment, constructive public engagement, and productive contribution to the society. Overall, it should focus on preparing students for more meaningful and satisfying lives and work roles and enable economic independence.

Towards the attainment of holistic and multidisciplinary education, the flexible curricula of the University will include credit-based courses, projects in the areas of community engagement and service, environmental education, and value-based education. As part of holistic education, students will also be provided with opportunities for internships with local industries, businesses, artists, crafts persons, and so on, as well as research internships with faculty and researchers at the University, so that students may actively engage with the practical aspects of their learning and thereby improve their employability.

The undergraduate curriculums are diverse and have varied subjects to be covered to meet the needs of the programs. As per the recommendations from the UGC, introduction of courses related to Indian Knowledge System (IKS) is being incorporated in the curriculum structure which encompasses all of the systematized disciplines of Knowledge which were developed to a high degree of sophistication in India from ancient times and all of the traditions and practices that the various communities of India—including the tribal communities—have evolved, refined and preserved over generations, like for example Vedic Mathematics, Vedangas, Indian Astronomy, Fine Arts, Metallurgy, etc.

At RGU, we are committed that at the societal level, higher education will enable each student to develop themselves to be an enlightened, socially conscious, knowledgeable, and skilled citizen who can find and implement robust solutions to its own problems. For the students at the University, Higher education is expected to form the basis for knowledge creation and innovation thereby contributing to a more vibrant, socially engaged, cooperative community leading towards a happier, cohesive, cultured, productive, innovative, progressive, and prosperous nation."

Abbreviations

1. Cr. - Credit
2. Major - Core Courses of a Discipline
3. Minor - May/may not be related to Major.
4. SEC - Skill Enhancement Course
5. VAC - Value Addition Course
6. AECC - Ability Enhancement Compulsory Course
7. GEC - Generic Elective Course
8. IKS - Indian Knowledge System
9. AICTE - All India Institute of Technical Education
10. CBCS - Choice Based Credit System
11. HEIs - Higher Education Institutes
12. MSDE - Ministry of Skill Development and Entrepreneurship
13. NAC - National Apprenticeship Certificate
14. NCrF - National Credit Framework
15. NCVET - National Council for Vocational Education and Training
16. NEP - National Education Policy
17. NHEQF - National Higher Education Qualification Framework
18. NSQF - National Skill Qualifications Framework
19. NTA - National Testing Agency
20. SDG - Sustainable Development Goals

21. UGC - University Grants Commission
22. VET - Vocational Education and Training
23. ME-ME - Multiple Entry Multiple Exit
24. OJT - On Job Training
25. NCH - Notional Credit Hours

Section 1: Overview

1. Introduction:

The National Education Policy (NEP) 2020 clearly indicates that higher education plays an extremely important role in promoting human as well as societal well-being in India. As envisioned in the 21st-century requirements, quality higher education must aim to develop good, thoughtful, well-rounded, and creative individuals. According to the new education policy, assessments of educational approaches in undergraduate education will integrate the humanities and arts with Science, Technology, Engineering and Mathematics (STEM) that will lead to positive learning outcomes. This will lead to develop creativity and innovation, critical thinking and higher order thinking capacities, problem-solving abilities, teamwork, communication skills, more in- depth learning, and mastery of curricula across fields, increases in social and moral awareness, etc., besides general engagement and enjoyment of learning. and more in-depth learning.

The NEP highlights that the following fundamental principles that have a direct bearing on the curricula would guide the education system at large, viz.

i. Recognizing, identifying, and fostering the unique capabilities of each student to promote her/his holistic development.

ii. Flexibility, so that learners can select their learning trajectories and programmes, and thereby choose their own paths in life according to their talents and interests.

iii. Multidisciplinary and holistic education across the sciences, social sciences, arts, humanities, and sports for a multidisciplinary world.

iv. Emphasis on conceptual understanding rather than rote learning, critical thinking to encourage logical decision-making and innovation; ethics and human & constitutional values, and life skills such as communication, teamwork, leadership, and resilience.

v. Extensive use of technology in teaching and learning, removing language barriers, increasing access for Divyang students, and educational planning and management. vi.

Respect for diversity and respect for the local context in all curricula, pedagogy, and policy.

vii. Equity and inclusion as the cornerstone of all educational decisions to ensure that all students can thrive in the education system and the institutional environment are responsive to differences to ensure that high-quality education is available for all.

viii. Rootedness and pride in India, and its rich, diverse, ancient, and modern culture, languages, knowledge systems, and traditions.

1.2. Credits in Indian Context:

1.2.1. Choice Based Credit System (CBCS) By UGC

Under the CBCS system, the requirement for awarding a degree or diploma or certificate is prescribed in terms of number of credits to be earned by the students. This framework is being implemented in several universities across States in India. The main highlights of CBCS are as below:

- The CBCS provides flexibility in designing curriculum and assigning credits based on the course content and learning hours.
- The CBCS provides for a system wherein students can take courses of their choice, learn at their own pace, undergo additional courses and acquire more than the required credits, and adopt an interdisciplinary approach to learning.
- CBCS also provides opportunity for vertical mobility to students from a bachelor's degree programme to master's and research degree programmes.

1.3. Definitions

1.3.1. Academic Credit:

An academic credit is a unit by which a course is weighted. It is fixed by the number of hours of instructions offered per week. As per the National Credit Framework.

1 Credit = 30 NOTIONAL CREDIT HOURS (NCH)

Yearly Learning Hours = 1200 Notional Hours (@40 Credits x 30 NCH)

30 Notional Credit Hours		
Lecture/Tutorial	**Practicum**	**Experiential Learning**
1 Credit = 15 -22 Lecture Hours	10-15 Practicum Hours	0-8 Experiential Learning Hours

3.2. Course of Study:

Course of study indicates pursuance of study in a particular discipline/programme

Discipline/Programmes shall offer Major Courses (Core), Minor Courses, Skill Enhancement Courses (SEC), Value Added Courses (VAC), Ability Enhancement Compulsory Curses (AECCs) and Interdisciplinary courses.

1.3.3. Disciplinary Major:

The major would provide the opportunity for a student to pursue in-depth study of a particular subject or discipline. Students may be allowed to change major within the broad discipline at the end of the second semester by giving her/him sufficient time to explore interdisciplinary courses during the first year. Advanced-level disciplinary/interdisciplinary courses, a course in research methodology, and a project/dissertation will be conducted in the seventh semester. The final semester will be devoted to seminar presentation, preparation, and submission of project report/dissertation. The project work/dissertation will be on a topic in the disciplinary programme of study or an interdisciplinary topic.

1.3.4. Disciplinary/interdisciplinary minors:

Students will have the option to choose courses from disciplinary/interdisciplinary minors and skill-based courses. Students who take a sufficient number of courses in a discipline or an interdisciplinary area of study other than the chosen major will qualify for a minor in that discipline or in the chosen interdisciplinary area of study. A student may declare the choice of the minor at the end of the second semester, after exploring various courses.

1.3.5. Courses from Other Disciplines (Interdisciplinary):

All UG students are required to undergo 3 introductory-level courses relating to any of the broad disciplines given below. These courses are intended to broaden the intellectual experience and form part of liberal arts and science education. Students are not allowed to choose or repeat courses already undergone at the higher secondary level (12^{th} class) in the proposed major and minor stream under this category.

i. ***Natural and Physical Sciences:*** Students can choose basic courses from disciplines such as Natural Science, for example, Biology, Botany, Zoology, Biotechnology, Biochemistry, Chemistry, Physics, Biophysics, Astronomy and Astrophysics, Earth and Environmental Sciences, etc.

ii. ***Mathematics, Statistics, and Computer Applications:*** Courses under this category will facilitate the students to use and apply tools and techniques in their major and minor disciplines. The course may include training in programming software like Python among others and applications software like STATA, SPSS, Tally, etc. Basic courses under this category will be helpful for science and social science in data analysis and the application of quantitative tools.

iii. ***Library, Information, and Media Sciences:*** Courses from this category will help the students to understand the recent developments in information and media science (journalism, mass media, and communication)

iv. ***Commerce and Management:*** Courses include business management, accountancy, finance, financial institutions, fintech, etc.,

v. ***Humanities and Social Sciences:*** The courses relating to Social Sciences, for example, Anthropology, Communication and Media, Economics, History,

Linguistics, Political Science, Psychology, Social Work, Sociology, etc. will enable students to understand individuals and their social behaviour, society, and nation. Students be introduced to survey methodology and available large-scale databases for India. The courses under humanities include, for example,

Archaeology, History, Comparative Literature, Arts & Creative expressions, Creative Writing and Literature, language(s), Philosophy, etc., and interdisciplinary courses relating to humanities. The list of Courses can include interdisciplinary subjects such as Cognitive Science, Environmental Science, Gender Studies, Global Environment & Health, International Relations, Political Economy and Development, Sustainable Development, Women's, and Gender Studies, etc. will be useful to understand society.

1.3.6. Ability Enhancement Courses (AEC)

Modern Indian Language (MIL) & English language focused on language and communication skills. Students are required to achieve competency in a Modern Indian Language (MIL) and in the English language with special emphasis on language and communication skills. The courses aim at enabling the students to acquire and demonstrate the core linguistic skills, including critical reading and expository and academic writing skills, that help students articulate their arguments and present their thinking clearly and coherently and recognize the importance of language as a mediator of knowledge and identity. They would also enable students to acquaint themselves with the cultural and intellectual heritage of the chosen MIL and English language, as well as to provide a reflective understanding of the structure and complexity of the language/literature related to both the MIL and English language. The courses will also emphasize the development and enhancement of skillssuch as communication, and the ability to participate/conduct discussion and debate.

1.3.7. Skill Enhancement Course (SEC)

These courses are aimed at imparting practical skills, hands-on training, soft skills, etc., to enhance the employability of students and should be related to Major Discipline. They will aim at providing hands on training, competencies, proficiency, and skill to students. SEC course will be a basket course to provide skill-based instruction. For example, SEC of English Discipline may include Public Speaking, Translation & Editing and Content writing.

A student shall have the choice to choose from a list, a defined track of courses offered from 1st to 3rd semester.

1.3.8. Value-Added Courses (VAC):

i. ***Understanding India:*** The course aims at enabling the students to acquire and demonstrate the knowledge and understanding of contemporary India with its historical perspective, the basic framework of the goals and policies of national development, and the constitutional obligations with special emphasis on constitutional values and fundamental rights and duties. The course would also focus on developing an understanding among student-teachers of the Indian knowledge systems, the Indian education system, and the roles and obligations of teachers to the nation in general and to the school/community/society. The course will attempt to deepen knowledge about and understanding of India's freedom struggle and of the values and ideals that it represented to develop an appreciation of the contributions made by people of all sections and regions of the country, and help learners understand and cherish the values enshrined in the Indian Constitution and to prepare them for their roles and responsibilities as effective citizens of a democratic society.

ii. ***Environmental science/education:*** The course seeks to equip students with the ability to apply the acquired knowledge, skills, attitudes, and values required to take appropriate actions for mitigating the effects of environmental degradation, climate change, and pollution, effective waste management, conservation of biological diversity, management of biological resources, forest and wildlife conservation, and sustainable development and living. The course will also deepen the knowledge and understanding of India's environment in its totality, its interactive processes, and its effects on the future quality of people's lives.

iii. ***Digital and technological solutions:*** Courses in cutting-edge areas that are fast gaining prominences, such as Artificial Intelligence (AI), 3-D machining, big data analysis, machine learning, drone technologies, and Deep learning with important applications to health, environment, and sustainable living that will be woven into undergraduate education for enhancing the employability of the youth.

iv. ***Health & Wellness, Yoga education, sports, and fitness:*** Course components relating to health and wellness seek to promote an optimal state of physical, emotional, intellectual, social, spiritual, and environmental well-being of a person. Sports and fitness activities will be organized outside the regular institutional working hours. Yoga education would focus on preparing the students physically and mentally for the integration of their physical, mental, and spiritual faculties, and equipping them with basic knowledge about one's personality, maintaining self-discipline and self-control, to learn to handle oneself well in all life situations. The focus of sports and fitness components of the courses will be on the improvement of physical fitness including the improvement of various components of physical and skills-related fitness like strength, speed, coordination, endurance, and flexibility; acquisition of sports skills including motor skills as well as basic movement skills relevant to a particular sport; improvement of tactical abilities; and improvement of mental abilities.

These are a common pool of courses offered by different disciplines and aimed towards embedding ethical, cultural and constitutional values; promote critical thinking. Indian knowledge systems; scientific temperament of students.

1.3.9. Summer Internship /Apprenticeship:

The intention is induction into actual work situations**.** All students must undergo internships / Apprenticeships in a firm, industry, or organization or Training in labs with faculty and researchers in their own or other HEIs/research institutions during the ***summer term***. Students should take up opportunities for internships with local industry, business organizations, health and allied areas, local governments (such as panchayats, municipalities), Parliament or elected representatives, media organizations, artists, crafts persons, and a wide variety of organizations so that students may actively engage with the practical side of their learning and, as a by-product, further improve their employability. Students who wish to exit after the first two semesters will undergo a 4-credit work-based learning/internship during the summer term to get a UG Certificate.

1.3.9.1. Community engagement and service: The curricular component of 'community engagement and service' seeks to expose students to the socioeconomic issues in society so that the theoretical learnings can be supplemented by actual life experiences to generate solutions to real-life problems. This can be part of summer term activity or part of a major or minor course depending upon the major discipline.

1.3.9.2. Field-based learning/minor project: The field-based learning/minor project will attempt to provide opportunities for students to understand the different socio- economic contexts. It will aim at giving students exposure to development-related issues in rural and urban settings. It will provide opportunities for students to observe situations in ruraland urban contexts, and to observe and study actual field situations regarding issues related to socioeconomic development. Students will be given opportunities to gain a firsthand understanding of the policies, regulations, organizational structures, processes, and programmes that guide the development process. They would have the opportunity to gain an understanding of the complex socio-economic problems in the community, and innovative practices required to generate solutions to the identified problems. This may be a summer term project or part of a major or minor course depending on study.

1.3.10. Indian Knowledge System:

In view of the importance accorded in the NEP 2020 to rooting our curricula and pedagogy in the Indian context all the students who are enrolled in the four-year UG programs should be encouraged to take an adequate number of courses in IKS so that the ***total credits of the courses taken in IKS amount to at least five per cent of the total mandated credits*** *(i.e., min. 8 credits for a 4 yr. UGP& 6 credits for a 3 yr. UGP)***.** The students may be encouraged to take these courses, preferably *during the first four semesters of the Program*. At least half of these mandated credits should be in courses in disciplines which are part of IKS and are related to the major field of specialization that the student is pursuing in the UG program. They will be included as a part of the total mandated credits that the student is expected to take in the major field of specialization. The rest of the mandated credits in IKS can be included as a part of the mandated Multidisciplinary courses that are to be taken by every student. All the students should take a Foundational Course in Indian Knowledge System, which is designed to present an overall introduction to all the streams of IKS relevant to the UG program. The foundational IKS course should be broad-based and cover introductory material on all aspects.

Wherever possible, the students may be encouraged to choose a suitable topic related to IKS for their project work in the 7/8th semesters of the UG program.

1.3.11. Experiential Learning:

One of the most unique, practical & beneficial features of the National Credit Framework is assignment of credits/credit points/ weightage to the experiential learning including relevant experience and professional levels acquired/ proficiency/ professional levels of a learner/student. Experiential learning is of two types:

a. ***Experiential learning as part of the curricular structure*** of academic or vocational program. E.g., projects/OJT/internship/industrial attachments etc. This could be either within the Program- internship/ summer project undertaken relevant to the program being studied or as a part time employment (not relevant to the program being studied- up to certain NSQF level only). In case where experiential learning is a part of the curricular structure the credits would be calculated and assigned as per basic principles of NCrF i.e., 40 credits for 1200 hours of notional learning.

b. ***Experiential learning as active employment*** (both wage and self) post completion of an academic or vocational program. This means that the experience attained by a person after undergoing a particular educational program shall be considered for assignment of credits. This could be either Full or Part time employment after undertaking an academic/ Vocation program.

In cases where experiential learning is as a part of employment the learner would earn credits as weightage. The maximum credit points earned in this case shall be double of the credit points earned with respect to the qualification/ course completed. The credit earned and assigned by virtue of relevant experience would enable learners to progress in their career through the work hours put in during a job/employment.

Section 2: Award of Degree

The structure and duration of undergraduate programs of study offered by the University as per NEP 2020 include:

2.1. Undergraduate programs of either 3 or 4-year duration with Single Major, with multiple entry and exit options, with appropriate certifications:

2.1.1. UG Certificate: Students who opt to exit after completion of the first year and have secured 40 credits will be awarded a UG certificate if, in addition, they complete one vocational course of 4 credits during the summer vacation of the first year. These students are allowed to re-enter the degree program within three years and complete the degree program within the stipulated maximum period of seven years.

2.1.2. UG Diploma: Students who opt to exit after completion of the second year and have secured 80 credits will be awarded the UG diploma if, in addition, they complete one vocational course of 4 credits during the summer vacation of the second year. These students are allowed to re-enter within a period of three years and complete the degree programme within the maximum period of seven years.

2.1.3. 3-year UG Degree: Students who will undergo a 3-year UG program will be awarded UG Degree in the Major discipline after successful completion of three years, securing 120 credits and satisfying the minimum credit requirement.

2.1.4. 4-year UG Degree (Honours): A four-year UG Honours degree in the major discipline will be awarded to those who complete a four-year degree program with 160 credits and have satisfied the credit requirements as given in Table 6 in Section 5.

2.1.5. 4-year UG Degree (Honours with Research): Students who secure 75% marks and above in the first six semesters and wish to undertake research at the undergraduate level can choose a research stream in the fourth year. They should do a research project or dissertation under the guidance of a Faculty Member of the University. The research project/dissertation will be in the major discipline. The students who secure 160 credits, including 12 credits from a research project/dissertation, will be awarded UG Degree (Honours with Research).

(Note: ***UG Degree Programs with Single Major:*** A student must secure a minimum of 50% credits from the major discipline for the 3-year/4-year UG degree to be awarded a single major. For example, in a 3-year UG program, if the total number of credits to be earned is 120, a student of Mathematics with a minimum of 60 credits will be awarded a B.Sc. in Mathematics with a single major. Similarly, in a 4-year UG program, if the total number of credits to be earned is 160, a student of Chemistry with a minimum of 80 credits will be awarded a B.Sc. (Hons. /Hon. With Research) in Chemistry in a 4-year UG program with single major. Also, the **4-year bachelor's degree program with Single Major** is considered as the preferred option since it would allow the opportunity to experience the full range of holistic and multidisciplinary education in addition to a focus on the chosen major and minors as per the choices of the student.)

2.2. The Post Graduate Program structure and duration of study offered by the University will include:

2.2.1. 2-year PG program(with the option of having the second year devoted entirely to research) for those who have completed a 3-year bachelor's program.

2.2.2. 1-year PG program for students who have completed a 4-year bachelor's degree; and

2.2.3. Integrated 5-year Bachelor's/master's programme.

2.2.3. 2-year PG program(with the option of having the second year devoted entirely to research) for those who have completed a 4-year bachelor's program may also opt for a 2-year PG.

2.3. **The Ph.D. program** shall require a PG degree or a 4-year bachelor's degree.

Table: 1: Award of Degree and Credit Structure with ME-ME

Award	**Year**	**Credits to earn**	**Additional l Credits**	**Re-entry allowed within (Yrs.)**	**Years to Complete e**
UG Certificate	1	40	4	3	7
UG Diploma	2	80	4	3	7
3-year UG Degree (Major)	3	120	X	x	X
-year UG Degree (Honors)	4	160	X	x	X
Award	**Year**	**Credits to earn**	**Additional l Credits**	**Re-entry allowed within (yrs.)**	**Years to Complete**
4-year UG Degree (Honors with Research):	4	160	Students who secure cumulative 75% marks and above in the first six semesters		

Section 3: Credit, Credit Points & Credit hours for different types of courses

3.1. Introduction:

'Credit' is recognition that a learner has completed a prior course of learning, corresponding to a qualification at a given level. For each such prior qualification, the student would have put in a certain volume of institutional or workplace learning, and the more complex a qualification, the greater the volume of learning that would have gone into it. Credits quantify learning outcomes that are subject achieving the prescribed learning outcomes to valid, reliable methods of assessment.

The ***credit points*** will give the learners, employers, and institutions a mechanism for describing and comparing the learning outcomes achieved. The credit points can be calculated as credits attained multiplied with the credit level.

The workload relating to a course is measured in terms of credit hours. A credit is a unit by which the coursework is measured. It determines the number of hours of instruction required per week over the duration of a semester (minimum 15 weeks).

Each course may have only a lecture component or a lecture and tutorial component or a lecture and practicum component or a lecture, tutorial, and practicum component, or only practicum component. Refer to the Section 1.3.1

A course can have a combination of ***lecture credits, tutorial credits, practicum credits and experiential learning credits.***

The following types of courses/activities constitute the programs of study. Each of them will require a specific number of hours of teaching/guidance and laboratory/studio/workshop activities, field-based learning/projects, internships, and community engagement and service.

- **Lecture courses:** Courses involving lectures relating to a field or discipline by an expert or qualified personnel in a field of learning, work/vocation, or professional practice.
- **Tutorial courses:** Courses involving problem-solving and discussions relating to a field or discipline under the guidance of qualified personnel in a field of learning, work/vocation, or professional practice. Should also refer to the Remedial Classes, flip classrooms and focus on both Slow and Fast Learners of the class according to their merit.
- **Practicum or Laboratory work:** A course requiring students to participate in a project or practical or lab activity that applies previously learned/studied principles/theory related to the chosen field of learning, work/vocation, or professional practice under the supervision

of an expert or qualified individual in the field of learning, work/vocation or professional practice.

- **Seminar:** A course requiring students to participate in structured discussion/conversation or debate focused on assigned tasks/readings, current or historical events, or shared experiences guided or led by an expert or qualified personnel in a field of learning, work/vocation, or professional practice.
- **Internship:** A course requiring students to participate in a professional activity or work experience, or cooperative education activity with an entity external to the education institution, normally under the supervision of an expert of the given external entity. A key aspect of the internship is induction into actual work situations. Internships involve working with local industry, government or private organizations, business organizations, artists, crafts persons, and similar entities to provide opportunities for students to actively engage in on-site experiential learning.
- **Studio activities:** Studio activities involve the engagement of students in creative or artistic activities. Every student is engaged in performing a creative activity to obtain a specific outcome. Studio-based activities involve visual- or aesthetic-focused experiential work.
- **Field practice/projects:** Courses requiring students to participate in field-based learning/projects generally under the supervision of an expert of the given external entity.
- **Community engagement and service:** Courses requiring students to participate in field-based learning/projects generally under the supervision of an expert of the given external entity. The curricular component of ‘community engagement and service’ will involve activities that would expose students to the socio-economic issues in society so that the theoretical learnings can be supplemented by actual life experiences to generate solutions to real-life problems.

Table2: Course wise Distribution of Credits

Broad Category of Course	**Minimum Credit Requirement**	
	3-year UG	**4-Year UG**
Major (Core)	60	80
Minor Stream	24	32
Interdisciplinary	9	9
Ability Enhancement Courses (AEC)	8	8
Skill Enhancement Courses (SEC)	9	9
Value Added Courses common for all UG	6	6
Summer Internship	4	4
Research Project / Dissertation	NA	12
Total	**120**	**160**

Section 4: *Level of Courses*

4.1 NHEQF levels:

The NHEQF levels represent a series of sequential stages expressed in terms of a range of learning outcomes against which typical qualifications are positioned/located. NHEQF level 4.5 represents learning outcomes appropriate to the first year (first two semesters) of the undergraduate program of study, while Level 8 represents learning outcomes appropriate to the doctoral-level program of study.

Table: 5: NHEQF Levels

NHEQF level	**Examples of higher education qualifications located within each level**	**Credit Requirements**
Level 4.5	Undergraduate Certificate. Program duration: First year (first two semesters) of the undergraduate program, followed by an exit 4-credit skills-enhancement course(s).	40
Level 5	Undergraduate Diploma. Program duration: First two years (first four semesters) of the undergraduate program, followed by an exit 4-credit skills-enhancement course(s) lasting two months.	80
Level 5.5	Bachelor's Degree. Program duration: First three years (Six semesters) of the four-year undergraduate program.	120
Level 6	Bachelor's Degree (Honours/ Honours with Research). Program duration: Four years (eight semesters).	160
Level 6	Post-Graduate Diploma. Program duration: One year (two semesters) for those who exit after successful completion of the first year (two semesters) of the 2-year master's program	160
Level 6.5	Master's degree. Program duration: Two years (four semesters) after obtaining a 3- year bachelor's degree (e.g. B.A., B.Sc., B.Com. etc.).	80
Level 6.5	Master's degree. Program duration: One year (two semesters) after obtaining a 4 -year bachelor's degree. (Honours/ Honours with Research) (e.g. B.A., B.Sc., B.Com. etc.).	40
Level 7	Master's degree. (e.g., M.E./MTech. etc.) Program duration: Two years (four semesters) after obtaining a 4-year bachelor's degree. (e.g., B.E./B.Tech. etc.)	80
Level 8	Doctoral Degree	Credits for course work, Thesis, and published work

4.2. Course Code based on Learning Outcomes:

Courses are coded based on the learning outcomes, level of difficulty, and academic rigor. The coding structure is as follows:

i. **0-99:** ***Pre-requisite courses*** required to undertake an introductory course which will be a pass or fail course with no credits. It will replace the existing informal way of offering bridge courses that are conducted in some of the colleges/ universities.

ii. **100-199:** ***Foundation or introductory courses*** that are intended for students to gain an understanding and basic knowledge about the subjects and help decide the subject or discipline of interest. These courses may also be prerequisites for courses in the major subject. These courses generally would focus on foundational theories, concepts, perspectives, principles, methods, and procedures of critical thinking to provide a broad basis for taking up more advanced courses.

iii. **200-299:** ***Intermediate-level courses*** including subject-specific courses intended to meet the credit requirements for minor or major areas of learning. These courses can be part of a major and can be pre-requisite courses for advanced-level major courses.

iv. **300-399:** ***Higher-level courses*** which are required for majoring in a disciplinary/interdisciplinary area of study for the award of a degree.

v. ***400-499: Advanced courses*** which would include lecture courses with practicum, seminar-based course, term papers, research methodology, advanced laboratory experiments/software training, research projects, hands-on-training, internship/apprenticeship projects at the undergraduate level or First year postgraduate theoretical and practical courses.

vi. **500-599:** ***Courses at first-year PG degree level*** for a 2-year post-graduate degree program.

vii. **600-699:** ***Courses for second year of 2-year PG*** or 1-year post-graduate degree program

viii. **700 -799 & above:** Courses limited to doctoral students.

Section 5: Course Structure of the Framework

Table 6. Semester wise and component wise distribution of credit (Four Year UGP - Single Major)

Year	Semester	Component	Couse code	Number of Courses	Credit per Course	Total credit in the component
First Y	I	Major (Core)	C-101, C-102	2	3	6
		Minor (May or may not be related to major)	M-101	1	3	3
		Interdisciplinary	IDC-1	1	3	3
		AEC1- Language	AEC-1	1	2	2
		SEC- (To choose from a pool of courses. To be related to Major)	SEC-1	1	3	3

				3/5		**20**

Section 6: Graduate Attributes & Learning Outcomes

6.1. Introduction:

As per the NHEQF, each student on completion of a program of study must possess and demonstrate the expected ***Graduate Attributes*** acquired through one or more modes of learning, including direct in-person or face-to-face instruction, online learning, and hybrid/blended modes. The graduate attributes indicate the quality and features or characteristics of the graduate of a program of study, including learning outcomes relating to the disciplinary area(s) relating to the chosen field(s) of learning and generic learning outcomes that are expected to be acquired by a graduate on completion of the program(s) of study.

The graduate profile/attributes must include,

- capabilities that help widen the current knowledge base and skills,
- gain and apply new knowledge and skills,
- undertake future studies independently, perform well in a chosen career, and
- play a constructive role as a responsible citizen in society.

The graduate profile/attributes are acquired incrementally through development of cognitive levels and describe a set of competencies that are transferable beyond the study of a particular subject/disciplinary area and program contexts in which they have been developed.

Graduate attributes include,

- ***learning outcomes that are specific to disciplinary areas*** relating to the chosen field(s) of learning within broad multidisciplinary/interdisciplinary/ transdisciplinary contexts.
- ***generic learning outcomes*** that graduate of all programs of study should acquire and demonstrate.

6.2. Graduate Attributes:

Table: 7: The Learning Outcomes Descriptors and Graduate Attributes

Sl. No.	Graduate Attribute	**The Learning Outcomes Descriptors** ***(The graduates should be able to demonstrate the capability to:)***
GA1	Disciplinary Knowledge	acquire knowledge and coherent understanding of the chosen disciplinary/interdisciplinary areas of study.
GA 2	Complex problem solving	solve different kinds of problems in familiar and non-familiar contexts and apply the learning to real-life situations.
GA 3	Analytical & Critical thinking	apply analytical thought including the analysis and evaluation of policies, and practices. Able to identify relevant assumptions or implications. Identify logical flaws and holes in the arguments of others. Analyse and synthesize data from a variety of sources and draw valid conclusions and support them with evidence and examples.
GA 4	Creativity	create, perform, or think in different and diverse ways about the same objects or scenarios and deal with problems and situations that do not have simple solutions. Think 'out of the box' and generate solutions to complex problems in unfamiliar contexts by adopting innovative, imaginative, lateral thinking, interpersonal skills, and emotional intelligence.
GA 5	Communication Skills	listen carefully, read texts and research papers analytically, and present complex information in a clear and concise manner to different groups/audiences. Express thoughts and ideas effectively in writing and orally and communicate with others using appropriate media.
GA 6	Research-related skills	develop a keen sense of observation, inquiry, and capability for asking relevant/ appropriate questions. Should acquire the ability to problematize, synthesize and articulate issues and design research proposals, define problems, formulate appropriate and relevant research questions, formulate hypotheses, test hypotheses using quantitative and qualitative data, establish hypotheses, make inferences based on the analysis and interpretation of data, and predict cause-and-effect relationships. Should develop the ability to acquire the understanding of basic research ethics and skills in practicing/doing ethics in the field/ in personal research work.
GA 7	Collaboration	work effectively and respectfully with diverse teams in the interests of a common cause and work efficiently as a member of a team.
GA 8	Leadership readiness/qualities	plan the tasks of a team or an organization and setting direction by formulating an inspiring vision and building a team that can help achieve the vision.

GA 9	Digital and technological skills	use ICT in a variety of learning and work situations. Access, evaluate, and use a variety of relevant information sources and use appropriate software for analysis of data.
GA 10	Environmental awareness and action	mitigate the effects of environmental degradation, climate change, and pollution. Should develop the technique of effective waste management, conservation of biological diversity, management of biological resources and biodiversity, forest and wildlife conservation, and sustainable. development and living.

6.3. Program Learning Outcomes (PLO)

The outcomes described through learning outcome descriptors in Table 6 are attained by students through learning acquired on the completion of a program of study relating to the chosen fields of learning, work/vocation, or an area of professional practice. The term 'program' refers to the entire scheme of study followed by learners leading to a qualification. Individual programs of study will have defined learning outcomes that must be attained for the award of a specific certificate/diploma/degree.

The Departments and Schools of the University are responsible for ensuring that individual program learning outcomes align with the relevant graduate attributes. Programme learning outcomes (PLOs) include outcomes that are specific to disciplinary areas of learning associated with the chosen field (s) of learning.

The program learning outcomes would also focus on knowledge and skills that prepare students for further study, employment, and responsible citizenship. The following are the program outcomes for Bachelor of Business Administration students.

PO1: Disciplinary knowledge of Business Administration: Demonstrate extensive and coherent knowledge of management and its applications in the real business world.

PO2: Complex problem solving: Assess and provide solutions to the difficult/unsolved business problems in rapidly changing environment, inculcating entrepreneurial skills.

PO3: Analytical & Critical thinking: Analyse the business situations from different perspectives and critically assess the situation for optimal results.

PO4: Creativity: acquire innovative managerial skills and develop a creative approach toward solving real life entrepreneurial and business problems.

PO5: Communication Skills: Acquire various soft skills (like business communication, public speaking etc.) and leadership skills required to manage complete business situations as well as life situations.

PO6: Research-related skills: Perform investigations by defining business problems, collecting data and analyzing to gain insights for decision making.

PO7: Collaboration: Work in teams of diverse cultures, backgrounds, and cross functional areas.

PO8: Leadership readiness/qualities: acquire effective decision-making skills, problem solving, teamwork and ability to motivate and guide others.

PO9: Digital and technological skills: Demonstrate sufficient understanding of ICT tools in business decision making.

PO10: Environmental awareness and action: acquire heightened environmental awareness and consciousness of the impact of business decisions and develop a sense of responsibility toward sustainable practices.

PO11: Lifelong learning: Develop attitude necessary for participating in learning activities throughout life.

6.4. Course Learning Outcomes (CLOs)

The program learning outcomes are attained by learners through the essential learnings acquired on the completion of selected courses of study within a program of study. The term 'course' is used to mean the individual courses of study that make up the scheme of study for a program. The Departments and Schools of the University are expected to map the relevant program learning outcomes when setting the course learning outcomes for the undergraduate certificate/diploma, bachelor's degree, Bachelor's degree with honours/ honours with research or master's degree programs.

Course learning outcomes are specific to the learning for a given course of study related to a disciplinary or interdisciplinary/multi-disciplinary area of learning. Some courses of study are highly structured, with a closely laid down progression of compulsory/core courses to be taken at different phases/stages of learning.

Course-level learning outcomes are expected to be aligned with relevant program learning outcomes and should be designed based on the Cognitive Level based on Bloom's Taxonomy. At the course level, each course may well have links to some but not all graduate attributes as these are developed through the totality of student learning experiences across the period/ semesters of their study.

The course outcomes for each course are mentioned in the syllabi of program. Students attain the outcomes and attributes described in previously through learning acquired on completion of program of study.

6.5 The Qualification Specifications:

Table: 8: NHEQF Qualification Specifications

Qualification type	**Purpose of the qualification**
Undergraduate Certificate	The students will be able to apply technical and theoretical concepts and specialized knowledge and skills in a broad range of contexts to undertake skilled or paraprofessional work and/or to pursue further study/learning at higher levels.
Undergraduate Diploma	The students will be able to apply specialized knowledge in a range of contexts to undertake advanced skilled or paraprofessional work and/or to pursue further learning/study at higher levels.
Bachelor's degree	The students will be able to apply a broad and coherent body of knowledge and skills in a range of contexts to undertake professional work and/or for further learning.
Bachelor's degree (Honours/ Honours with Research)	The students will be able to apply the knowledge in a specific context to undertake professional work and for research and further learning.
	The students will be able to apply an advanced body of knowledge in a range of contexts to undertake professional work and apply specialized knowledge and skills for research and scholarship, and/or for further learning relating to the chosen field(s) of learning, work/vocation, or professional practice.
Master's degree (1 year/2 semesters of study)	The students will be able to apply an advanced body of knowledge in a range of contexts for professional practice, research, and scholarship and as a pathway for further learning. Graduates at this level are expected to possess and demonstrate specialized knowledge and skills for research, and/or professional practice and/or for further learning.
Master's degree (2 years /4 semesters of study)	The students will be able to apply an advanced body of knowledge in a range of contexts for professional practice, research, and scholarship and as a pathway for further learning. Graduates at this level are expected to possess and demonstrate specialized knowledge and skills for research, and/or professional practice and/or for further learning. Master's degree holders are expected to demonstrate the ability to apply the established principles and theories to a body of knowledge or an area of professional practice.

Doctoral degree	The Doctoral degree qualifies students who can ask relevant and new questions and develop appropriate methodologies and tools for collecting information in pursuit of generating new knowledge and new data sets; and apply a substantial body of knowledge to undertake research and investigations to generate new knowledge, in one or more fields of inquiry, scholarship or professional practice. Graduates at this level is expected to have a systematic and critical understanding of a complex field of learning and specialized research skills for the advancement of knowledge and/or professional practice and making a significant and original contribution to the creation of new knowledge relating to a field of learning or in the context of an area of professional practice.

6.6 Teaching Process and Course Evaluation

The courses will be delivered using the following teaching-learning tools.

- Lecture
- Assignment
- Individual/ Group Presentation
- Tutorials
- Case Studies
- Numerical Problem Solving
- Role play
- Simulations
- Practical Classes on ICT
- Analysis of Relevant Videos

Course Evaluation is done in the following way.

<table>
<tr><th>Sl.No</th><th>Component of Evaluation</th><th>Marks</th><th>Frequency</th><th>CODE</th><th>Weightage (%)</th></tr>
<tr><td>A</td><td colspan="5">Continuous Evaluation</td></tr>
<tr><td rowspan="2">I</td><td>Class test</td><td rowspan="2">(2+5=7)</td><td>1</td><td>C</td><td rowspan="5">45%</td></tr>

SEMESTER -I

Management Process and Organizational Behaviour

Subject Code:BSA032M101	Course Level: 100
Credit Unit: 3	Scheme Of Evaluation: (T)
L-T-P-C : 2-1-0-3	

Course Objective: To make the students understand the functions of management and the needs and features of human behaviour in an organization.
After the completion of the course, the students will be able to:

CO.	Course outcome	Bloom's Tax Onomy Level
CO1	Identify key management theories and their proponents.	BT-I
CO2	Interpret the significance of each management function in organizational effectiveness.	BT-II
CO3	Apply key concepts in organizational behaviour, such as motivation, leadership, and group dynamics.	BT-III
CO4	Analyze various theories and concepts to develop a comprehensive understanding of management process and organizational behavior.	BT-IV

Modules	Course Content	Periods
I	**Principles of Management –Introduction** Management- Definition, Importance, Role of managers, Skills of managers, Management and Administration, Management process, Levels of Management, Trends and Challenges of Management in the global scenario. Evolution of Management Thought.	**17**
II	**Management functions** Planning- Planning Premises, Types of Plans, Planning process Decision Making - Types of decisions - Decision Making Process, Organizing- Meaning, concept and types, Departmentation - Span of control, Delegation of authority, Staffing, Controlling process, types of control and techniques of control.	**16**
III	**Organizational Behaviour –Individuals** **Attitudes:** Concept**,** Components, Job related attitudes **Personality**- Meaning, Importance, Determinants of personality, Theories of Personality, Personality and Organizational behaviour. **Perception:** Concept, Perceptual process, Factors that influence perception **Learning**- Concept, Nature, Theories of Learning, Reinforcement-Types, use in organizations.	**16**
IV	**Organizational Behaviour – Group** **Interpersonal Behaviour**: Tools to improve interpersonal behaviour- Johari Window and Transactional Analysis. (Exercise based/ activity based) **Group Behaviour:** Concept of group, Types of groups, Stages of Group formation. **Leadership:** Definitions and Characteristics, Significance of Leadership, Leadership styles, Leadership Theories.	**17**
	Total	**66**

Marketing Management

Subject Code: BSA032M102	Course Level: 100
Credit Unit: 3	Scheme of Evaluation: (T)
L-T-P-C=2-1-0-3	

Course Objective:
To impart knowledge and enhance skills to analyse the business environment for marketing decision-making, encouraging the students to understand the subject through experiential learning.

After the completion of the course, the students will be able to:

COs	Course outcome	Bloom's Taxonomy Level
CO1	List the various marketing concepts adapted by the companies	BT-I
CO2	Summarize the factors influencing consumer Behaviour and marketing decisions.	BT-II
CO3	Apply marketing concepts to develop marketing strategies for different products and services.	BT- III
CO4	Analyse market trends and competitive landscapes to identify marketing opportunities and threats.	BT- IV

Modules	Course Content	Periods
I	**Introduction** Definition, Nature, Scope, functions and Importance, Evolution of Marketing; Core marketing concepts; Concept of customer and consumer, Different Marketing orientation, Holistic marketing concept, Marketing Environment: Micro and Macro, Marketing Mix (goods & services) - contemporary, New Marketing Realities, concept of customer value	**17**
II	**Consumer Behaviour and STP** Types of buyers, buying motives – Factors influencing buyer behaviour, buying decision process: Industrial and consumer market, Market segmentation – segmentation bases – Targeting –Positioning, Brand - definition, role & scope.	**16**
III	**Marketing Mix: Product &Pricing Decisions** Product concept, classification– New Product Development process – Product Life Cycle, Product mix – Packaging Labelling, Pricing – Factors influencing pricing decisions – pricing objectives –Types of Pricing Strategy	**16**
IV	**Marketing Mix: Place & Promotion Decisions** Distribution Strategy - Meaning, need for and Importance of Distribution Channel, Factors Influencing Channel Decisions, Types of Channels, Functions of Channel Members, Channel conflict, Concept of Promotion Mix, Factors determining promotion mix: Promotional Tools, Basics of online marketing, Integrated Marketing, Communication	**17**

Media Literacy and Critical Thinking(Minor for RSB)

Subject Code:BSA032N102	Course Level: 100
Credit Unit : 3	Scheme of Evaluation: (T)
L-T-P-C=2-1-0-3	

Course Objective:

This course equips students with essential media literacy and critical thinking skills to analyze and navigate various media forms. It covers the dynamics of media production and ownership in India, ethical and regulatory considerations, and enhances digital literacy for responsible online engagement. Through comprehensive study and practical exercises, students will learn to critically engage with media content, uncover biases, and make informed decisions in media consumption and production.

After the completion of the course, the students will be able to:

CO.	Course outcome	Bloom's Taxonomy Level
CO1	Define media literacy principles for navigating digital media landscapes and evaluating credibility.	BT-I
CO2	Outline the complexities of media production, distribution, and audience behavior.	BT-II
CO3	Identify ethical standards in media content creation and consumption	BT-III
CO4	Analyse responsible digital citizenship by navigating online information critically and combating misinformation.	BT-IV

Modules	Course Content	Periods
I	Foundations of Media Literacy and Critical Thinking: Core principles of media literacy and critical thinking; Definition and significance of media literacy, its historical evolution within the Indian context; Understanding media as a powerful communication tool and its role in shaping societal perceptions and behaviors.	**17**
II	Deconstructing Media Texts: Forms of media texts, including print, broadcast, digital, and social media; Textual analysis and the deconstruction of visual media using semiotics; The impact of media representations on individual perceptions and societal attitudes, from relevant case studies in the Indian context.	**16**

III	Media Consumption and Production Dynamics : Dynamics of media production, distribution, and consumption in India: Influence of ownership and control structures on media content; Techniques for critically evaluating media content and analysing audience consumption patterns	**16**
IV	Ethics, Regulation, and Digital Media Literacy : Ethical and regulatory considerations inherent in media practices and the evolving landscape of digital media literacy. Ethical principles in media, the regulatory framework governing media content, and the role of self-regulatory bodies in upholding ethical standards; Digital media's impact on contemporary media literacy practices, strategies for navigating online information, and promoting digital citizenship.	**17**

Introduction to Indian Knowledge System–I

Subject Code:BSA032I01	Course Level: 100
Credit Unit: 3	Scheme of Evaluation: (T)
L-T-P-C=2-1-0-3	

Course Objective:

This Foundation course is designed to present an overall introduction to all the streams of IKS relevant to the programme. It would enable students to explore the most fundamental ideas that have shaped Indian Knowledge Traditions over the centuries.

COs	Course outcome	Bloom's Taxonomy Level
CO1	Recall about the natural endowments	BT I
CO2	Illustrate literature of Indian civilization-the Vedic– Itihasas ,languages, mathematics ,and Ayurveda.	BTII
CO3	Explain observation of the emotion of celestial bodies in the Vedic corpus	BTII

Modules	Course Content	Periods
I	Bharata Varsha—A Land of Rare Natural Endowments Demographical features of the ancient Bharat Varsha, Largest cultivable area in the world. Protected and nurtured by Himalayas. The Sindhu-Ganga plain and the great coastal plains. The great rivers of India. Climatic changes: Abundant rains, sunshine and warmth, vegetation, animals, and mineral wealth. Most populous country in the world.India'sprosperityheld theworld in thrall.Splen did geographicalisolationofIndiaandtheuniquenessofInd ianculture.	17

II	Foundational Literature of Indian Civilization: The Vedic Corpus. The Itihasas—Ramayana and Mahabharata, and their important regional versions. The Puranas. Foundational Texts of IndianPhilosophies,includingtheJainandBauddha. Foundational Texts of Indian Religious Sampradayas, from the Vedic period to the Bhakti traditions of different regions. i. The Vedangas and Other Streams of IndianKnowledgeSystem:TheVedicCorpus: Introduction to Vedas and synopsis of the four Vedas and Sub-classification of Vedas; Messages Vedas; Introduction to Vedangas : Siksha, Vyakarana, Chanda's, Nirukta, Jyotisha and Kalpa ; Vedic Life: Distinctive Features. Other streams of Indian Knowledge System such as Ayurveda, Sthapatya, Natyasastra, Dharma sastra, Artha sastra, etc. The Indian way of continuing the evolution of knowledge through commentaries, interpretationsandrevisionsofthefoundationaltexts.ThelargecorpusofliteratureinIn Indian languages. ii. Indian Language Sciences: Language Sciences and the preservation of the Vedic corpus. Varna Mala of Indian languages based on classification of sounds on the Basis of their origin and effort involved. The special feature of the scripts of most Indian languages, that each symbol is associated with a unique sound. Word formation inSanskritandIndianlanguages.MajorinsightsintheScienceofVyakaranaasestablis hedbyPanini.ImportanttextsofIndianLanguageSciences—Sikshaorphonetics,Niruktaoretymology,VyakaranaorGrammar,ChandasorProsod y.NavyanyayaandNavya-vyakaranainNavadvipa,VaranasiandWestandSouthIndia.	**17**

	iii.IndianMathematics: Numbers, fractionsandgeometryintheVedas.Decimalnomenclature of numbers in the Vedas. Zero and Infinity. Simple constructions fromSulba-sutras. The development of the decimal place value system which resulted in asimplificationofallarithmeticaloperations.Linguisticrepresentationofnumbers.I important texts of Indian mathematics. Brief introduction to the development of algebra,trigonometry,andcalculus.HowIndianmathematicscontinuedtoflourishint he18/19/20thcenturies. Kerala School. Ramanujan.	
III	Indian Astronomy: Ancient records of the observation of the motion of celestialbodiesin theVediccorpus.Sun, Moon,Nakshatra&Graha. Astronomy as thescience of determination of time, place, and direction by observing the motion of thecelestialbodies. ThemotionoftheSunandMoon.Motion of equinoxes and solstices. Elements of Indian calendar systems as followed in different regions of India. Important texts of Indian Astronomy. Basic ideas of the planetary model ofAryabhata and its revision by Nilakantha. Astronomical instruments. How Indianastronomy continued to flourish in the 18/19th centuries. Astronomical endeavours ofJaisingh, Sankaravarman, Chandrasekhara Samanta.	16

IV	Indian Health Sciences: Vedic foundations of Ayurveda. Ayurveda is concerned both with maintenance of good health and treatment of diseases. Basic concepts of Ayurveda.ThethreeGunasandThreeDoshas,Pancha-mahabhutaandSapta-dhatu.Theimportance of Agni (digestion). Six Rasas and their relation to Doshas. Ayurvedic viewofthecauseofdiseases. Dinacharyaordailyregimenfor the maintenance of good health. Ritucharya or seasonal regimen. Important Texts of Ayurveda. Selected extracts from Astāngahrdaya (selections from Sūtrasthāna)andSuśruta-Samhitā 15 (sectionsonplasticsurgery,cataractsurgeryandanalfistula).Thelargepharma copeiaof Ayurveda. Charaka and Sushruta on the qualities of a Vaidya. The whole world is a teacher of the good Vaidya. Charaka's description of a hospital. Hospitals in ancient and medieval India. How Ayurveda continued to flourish till 18/19th centuries. Surgicalpractices,inoculation. Current revival of Ayurveda and Yoga.	16

Introduction to Indian Knowledge System - II

Subject Code: BSA032I02	Course Level:200
Credit Unit: 3	Scheme of Evaluation: (T)
L-T-P-C=3-0-0-3	

Course Objective:

This Foundation course is designed to present an overall introduction to all the streams of IKS relevant to the UG program. It would enable students to explore the most fundamental ideas that have shaped Indian Knowledge Traditions over the centuries.

COs	Course outcome	Bloom's Taxonomy Level
CO1	Recall traditional Indian knowledge traditions constituting Indian culture	BT-I
CO2	Summarize differences between classical literature in Sanskrit and other Indian languages	BT-II
CO3	Compare knowledge traditions originating in NE India	BT-III
CO4	Appreciate the contribution of Indian Knowledge Systems to the world	BT-IV

Modules	Course Content	Periods
I	**Indian Classical Literature:** A Brief Introduction; Ancient Indian Spiritual Poetics – Kavya; Contribution of Kalidasa **Diversity and Indian Culture:** Indigenous Faith and Religion; Preservation of culture and indigenous knowledge The Purpose of Knowledge: **Understanding Self-Awareness and Spirituality;** Indian concept and purpose of Knowledge and Education; Understanding Spirituality and Materialism: Para and Apara Vidya	**17**
II	**Methodology of Indian Knowledge System** Shruti and Smriti traditions; Introduction to Shastras; Manuscriptology The art and science of documenting knowledge; Repositories of ancient manuscripts with special reference to the Northeast India Indian Architecture and Town Planning: Ancient Indian architecture; Shatapatha-Veda; Indigenous tools & techniques for town planning & temple architecture. Examples: Lothal, Mohan Jo Daro, Lepakshi Temple, Jagannath Puri, Konark Sun TempleVernacular architecture of Assam: Special reference to Bhamputati Village	**17**
III	**Indian Agricuture Han Civilization**; Sustainah Aerigultue: Historical siunifieatice of agriculture and sustainable farning in India;Step Cultivation of India Spocial reference to Northeast India; Wet rice cultivation ofAssam **Indian Textiles:** What is Textile?Tradition of cotton and silk textiles in India,Historical contribution of textile and weaving to Indian economy,Varieties of textiles and dyes developed in different regions of India,Special reference to Northeast India	**16**

IV	Indian Polity and Economy Understanding Kingship and Chiefdom: Role of a king Indian idea of decentralized polity and flourishing economy, The Chakravarti System: Administrative System of Ancient Bharatavarsha,Village governance system: Northeast India Arthashastra: Brief Synopsis, The Outreach of Indian Knowledge Systems Across Geographical Boundaries: Indian Languages, Scripts, Linguistics, Ayurveda, Yoga and Meditation Textile, Decimal value place system–based arithmetic, Algebra and Astronomy	**16**
Total		**66**

AEC II
CEN II: Approaches to Verbal and Non-Verbal Communication

Subject Code: CEN982A201	Course Level :100
Credit Unit: 1	Scheme Of Evaluation: (T)
L-T-P-C=1-0-0-1	

Course Objective: To introduce the students to the various forms of technical communication and enhance their knowledge in the application of both verbal and non-verbal skills in communicative processes.

Sl No.	Course outcome	Bloom's Taxonomy Level
CO1	Identify the different types of technical communication, their characteristics, their advantages, and disadvantages	BT 1
CO2	Explain the barriers to communication and ways to overcome them.	BT 2
CO3	Discover the means to enhance conversation skills.	BT 3
CO4	Determine the different types of non-verbal communication and their significance.	BT4

Modules	Course Content	Periods
I	**Technical Communication** Communicating about technical or specialized topics, Different forms of technology-enabled communication tools used in organizations Telephone, Teleconferencing, Fax, Email, Instant messaging, Blog, podcast, Videos, videoconferencing, social media	**8**
II	**Communication Barriers** Types of barriers: Semantic, Psychological, Organisational, Cultural, Physical, and Physiological. Methods to overcome barriers to communication.	**4**
III	**Conversation skills/Verbal Communication** Conversation – Types of Conversation, Strategies for Effectiveness, Conversation Practice, Persuasive Functions in Conversation, Telephonic Conversation and Etiquette Dialogue Writing, Conversation Control.	**4**
IV	**Non-verbal Communication** Introduction; Body language- Personal Appearance, Postures, Gestures, Eye Contact, Facial expressions Paralinguistic Features-Rate, Pause, Volume, Pitch/Intonation/ Voice/ modulation Proxemics, Haptics, Artifacts, Chronemics	**6**
	Total	**22**

Credit Distribution

Behavioural Science II

Subject Code: :BHS982A202	Course Level :100
Credit Unit : 1	Scheme Of Evaluation: (T)
L-T-P-C=1-0-0-1	

Course Objective:
To increase one's ability to draw conclusions and develop inferences about attitudes and behaviour, when confronted with different situations that are common in modern organizations.

COs	Course outcome	Bloom's Taxonomy Level
CO1	Develop an elementary level of understanding of culture and its implications on personality of people.	BT-I
CO2	Understand the concept of leadership spirit and to know its impact on performance of employees.	BT-II
CO3	Understand and apply the concept of motivation in real life.	BT-II

Modules	Course Content	Periods
I	**Culture and Personality** Culture: Definition, Effect, relation with Personality, Cultural Iceberg, Overview of Hofstede's Framework, Discussion of the four dimensions of Hofstede's Framework.	**6**
II	**Attitudes and Values** Attitude's definition: changing our own attitudes, Process of cognitive dissonance Types of Values, Value conflicts, Merging personal and Organisational values	**4**
III	**Motivation** Definition of motivation with example, Theories of Motivation (Maslow, McClelland's theory& Theory X and Y)	**4**
IV	**Leadership** Definition of leadership, Leadership continuum, types of leadership, Importance of Leadership, New age leaderships: Transformational & transactional Leadership, Leaders as role models.	**8**
	Total	**22**

Credit Distribution		
L/T (Lecture/Tutorial)	**Practicum (P)**	**Experiential Learning**

IT Tools in Management-II

Subject Code: BSA032S211	Course Level: 100
Credit Unit: 3	Scheme of Evaluation: (P)
L-T-P-C= 2-0-2-3	

Course Objective: To enable the student to understand and implement the various concepts in solving real life problems.
After the completion of the course, the students will be able to:

COs	Course outcome	Bloom's Taxonomy Level
CO-1	Remember and recognize basic Excel features and functions.	BT-I
CO-2	Understand how to use Excel tools and functions.	BT-II
CO-3	Use Excel tools and functions to complete tasks.	BT-III
CO4	Evaluate and Analyse data using Excel to make decisions.	BT IV

Modules	Course Content	Periods
I	**Excel Introduction** • An overview of the screen, navigation, and basic spreadsheet concepts • Various selection techniques • Shortcut Keys • Formatting and Proofing	**18**
II	**Mathematical Functions** • SumIf, SumIfsCountIf, CountIfsAverageIf, AverageIfs, Nested IF, IF ERROR Statement, AND, OR NOT Protecting Excel • File Level Protection • Workbook, Worksheet Protection **What If Analysis** • Goal Seek • Scenario Analysis • Data Tables (PMT Function) • Solver Tool	**16**
III	**Logical Functions** • If Function • How to Fix Errors – if error • Nested If • Complex if and or functions **Data Validation** • Number, Date & Time Validation • Text and List Validation • Custom validations based on formula for a cell • Dynamic Dropdown List Creation using Data Validation – Dependency List **Lookup Functions** • Vlookup / HLookup • Index and Match • Creating Smooth User Interface Using Lookup • Nested VLookup • Reverse Lookup using. Choose Function • Worksheet linking using Indirect • Vlookup with Helper Column	**18**

IV	**Pivot Tables** • Creating Simple Pivot Tables • Basic and Advanced Value Field Setting • Classic Pivot table • Choosing Field • Filtering PivotTables • Modifying PivotTable Data • Grouping based on numbers and Dates • Calculated Field & Calculated Items • Arrays Functions • What are the Array Formulas, Use of the Array Formulas • Basic Examples of Arrays (Using ctrl+shift+enter). • Array with if, len and mid functions formulas. • Array with Lookup functions. • Advanced Use of formulas with Array. **Charts and slicers** • Various Charts i.e. Bar Charts / Pie Charts / Line Charts • Using SLICERS, Filter data with Slicers • Manage Primary and Secondary Axis	**16**

SEMESTER - III

Quantitative Techniques

Subject Code:BSA032M301	Course level: 200
Credit Unit : 4	Scheme of Evaluation: (T)
L-T-P-C= 3-1-0-4	

Course Objective: To understand and develop analytical insights and knowledge base of various concepts of quantitative techniques.

After the completion of the course, the students will be able to:

COs	Course outcome	**Bloom's Taxonomy Level**
CO1	Define quantitative techniques and their applications in decision-making.	BT I
CO2	Interpret the results of quantitative analysis in a business context.	BT II
CO3	Apply mathematical and statistical methods to Analyse data and draw meaningful conclusions.	BT III
CO4	Analyse data using quantitative techniques to solve business problems	BT IV

Modules	**Course Content**	**Periods**
I	Basic Algebraic concepts, Indices and Logarithms, Quadratic Equations, Set, Relation and Function, Arithmetic, and geometric progressions. Determinants, Matrix Algebra	**22**
II	Differential Calculus: 1st order derivative, 2nd order derivative, Applications of derivatives to solve business problem- Maxima and Minima	**22**
III	Introduction to Statistics, Measure of Central Tendency-Mean, Median, Mode; Measures of Dispersion – Range, Quartile Deviation, Mean Deviation, Standard Deviation, Coefficient of Variation, Simple Correlation and Regression, Time Series Analysis	**22**
IV	Theory of Probability-Meaning, basic concepts, Addition rule, Multiplication rule, conditional probability, Probability distributions – Discrete and Continuous Probability distributions - Binomial, Poisson, and Normal distribution	**22**
Total		**88**

Financial Management

Subject Code: BSA032M302	Course Level: 200
Credit Units: 4	Scheme of Evaluation: (T)
L-T-P-C =3-1-0-4	

Course Objective:

To acquaint the students with the techniques of financial management and their applications for business decision making.

After the completion of the course, the students will be able to:

COs	Course outcome	Bloom's Taxonomy Level
CO1	Define key financial management terms and concepts.	BT-I
CO2	Describe the relationship between risk and return in financial decision-making	BT-II
CO3	Analyse financial statements to assess the financial health of a company	BT-III
CO4	Evaluate investment opportunities using techniques like Net Present Value (NPV) and Internal Rate of Return (IRR)	BT-IV

Modules	Course Content	Periods
I	**INTRODUCTION** Nature, Scope, and Functions of Financial Management, Profit vs Wealt Maximization. Risk and Return, Time value of money. Calculating Present aFuture Value. Valuation of securities – Bonds and Equities	**20**
II	**INVESTMENT DECISIONS** The Capital Budgeting Process, Cash flow Estimation, Payback Period Method Accounting Rate of Return, Net Present Value (NPV), Net Terminal Value Internal Rate of Return (IRR), Profitability Index, Capital budgeting under Risk – Uncertainty and Risk Adjusted Discount Rate.	**22**
III	**FINANCING DECISION** Cost of capital and Financing Decision: Sources of long-term financing Meaning & Significance of cost of capital, Factors affecting Cost of Capital Determining component Costs of capital & Weighted Average Cost of Capital, Defining Capital Structure, Determinants of Capital Structure, Relevance of Capital Structure- NI & Traditional Views, Irrelevance of Capital Structure- NO Approach and MM Theory, Optimum Capital Structure, Meaning of Financial Leverage & its Measures, Financial Leverages, and the Shareholder's Return, Combining Financial and Operating Leverage.	**24**
IV	**DIVIDEND DECISION & WORKING CAPITAL DECISION** Dividend Policy: Meaning and Kinds of Dividend, Theories on Dividend Policies, Practical Considerations in Dividend policy, Relevance of dividend policy on Firm's Value, Factors influencing a Firm's dividend policy. Working Capital Management: Concepts of Working Capital, Operating and Cas Conversion Cycle, Permanent and Variable Working Capital, Determinants of Working Capital, Estimation of Working Capital Needs, Cash management receivable management.	**22**
	Total	**88**

Fundamentals of International Business (Minor For RGU Business Administration)

Subject Code: BSA032N301	Course Level: 200
Credit Unit: 4	Scheme of Evaluation: (T)
L-T-P-C=3-1-0-4	

Course Objective: To impart and demonstrate amongst the students an understanding of the basic concepts and theoretical knowledge used in international business.
After the completion of the course, the students will be able to:

COs	Course outcome	Bloom's Taxonomy Level
CO1	Define international business and its key concepts	BT I
CO2	Summarize the theories of international trade, framework, and international agreement.	BT II
CO3	Apply international business theories to analyse real-world international business situations.	BT III

Modules	Course Content	Periods
I	**Introduction to International Business:** Concepts of Globalisation, Dimensions, Factors influencing globalization, Concept of International Business, Reasons for International expansion, Modes of entry in international markets, Overview of world's trade and India's trade, Balance of Payments.	22
II	**Institution framework and Trade Agreements:** International economic institutions- WTO, IMF, UNCTAD, ADB etc. Institutional Framework for International Trade in India, Overview of WTO Agreements, Ministerial Conferences and Emerging issues, WTO and Developing countries. **International Economic Integrations:** Different Levels of Integration, Major Regional Trade Agreements, India's participation and role.	22
III	**International Environment and International Marketing:** Cultural, Political and Legal Environment Concept of Culture, Comparison of Cross-Cultural Behaviour, fundamentals of International Marketing Mix Decisions -Product, Pricing, International distribution channels, communication and Promotion Decisions	22
IV	**International Finance and Documentation:** International Monetary System. Foreign Exchange market, Exchange risk management, Modes of payment and international trade finance Export import procedure, Terms of Delivery. Documentation- Commercial documents, Regulatory documents.	22

International Business (Minor For RSB Management)

Subject Code: BSA032N302	Course Level: 200
Credit Unit: 4	Scheme of Evaluation: (T)
L-T-P-C=3-1-0-4	

Course Objective:

The course aims to help students to understand the evolution and significance of international trade in contemporary business environment and examine various economic integration by analyzing the emerging trends in International Business.
After the completion of the course, the students will be able to:

COs	Course outcome	Bloom's Taxonomy Level
CO1	Demonstrate the fundamental theories of international business and Trade	BT I
CO2	Explain the impact of political, legal, economic, and cultural environments on international business operations.	BT II
CO3	Develop an understanding of the concept of Foreign Direct Investment and its impact on various world economy	BT III
CO4	Analyse the significance of economic Integration in International Business	BT-IV

Modules	Course Content	Periods
I	**Introduction to International Business** Introduction to International Business Stages of Internationalization – EPRG Framework - International Trade Theories: Theories of International Trade Mercantilists, Absolute Cost and Comparative Advantage, Factor Proportions, Neo-factor Proportions Theories, Country Similarity Theory, Intra-industry Trade, Tariff and Non-Tariff Barriers in Global Businesses	22
II	**Introduction of Foreign Direct Investment** Introduction Foreign Direct Investment in the World Economy, Trends in FDI Theories of Foreign Direct Investment, Greenfield and Brownfield FDI, Benefits and Costs of FDI, International Institutions and the Liberalization of FDI, CAGE Model.	22
III	**Economic Integration :** Economic indicators and their impact on international business decisions, Regional Economic Integration and Trade Blocs, Basic Principles of Multilateral Trade Negotiations, Instruments of Trade Regulation, FDA, custom union, common market economic union, Emerging Markets and Developing Economies.	22
IV	**Emerging Trends in International Business** International Entrepreneurship and Born Global Firms, Ethical Considerations - CSR Frameworks and Approaches and ethical considerations, ESG investing and reporting standards, corporate responses to climate change and social justice issues, Implications of Brexit on international business laws, the rise of digital platforms, and ecommerce. Re-shoring and Nearshoring Trend, Impact of pandemic on International Business.	22

Innovation Management(IDC for RGU)

Subject Code: BSA032I301	Course Level:200
Credit Unit: 3	Scheme of Evaluation: (T)
L-T-P-C=2-1-0-3	

Course Objective: The objective of this course is to introduce and explore innovation management concepts, learn to manage innovation and to understand the intellectual property and patents to protect innovations.

COs	**Course outcome**	**Bloom's Taxonomy Level**
CO1	Define the innovation process and the various components involving Innovation Management.	BT I
CO2	Summarize the factors to achieve success and manage the uncertainties	BT II
CO3	Identify the different forms of protection from intellectual property and learn how to handle patents through its various components	BT III

Modules	**Course content**	**Periods**
I	**Introduction to Innovation Management:** Concepts, Innovation and Invention, Types of Innovation, Models of Innovation, Innovation as a Management Process.	**17**
II	**Market adoption and Technology diffusion:** Innovation and the market, Innovation diffusion theories, Adopting new products and embracing change.	**16**
III	**Managing Innovation within Firms:** Managing uncertainty, Organizational characteristics facilitating innovation process, Organizational structures and innovation, Management tools for innovation.	**16**
IV	**Managing Intellectual Property:** An introduction to patents, Expiry of a patent and patent extensions, Trademarks, Using brands to protect intellectual property, Remedy against infringement.	**17**
Total		**66**

Design Thinking and Innovation (IDC for RSB)

Subject Code: BSA032NI303	Course Level:200
Credit Unit: 3	Scheme of Evaluation: (T)
L-T-P-C=2-1-0-3	

Course Objective: The primary focus of DTI is to help learners develop creative thinking skills and apply design-based approaches/tools for identifying and implementing innovation opportunities into implementable projects.

COs	Course outcome	Bloom's Taxonomy Level
CO1	Recall the fundamental concepts, principles, and stages of design thinking and innovation.	BT I
CO2	Explain wicked problems and how to frame them in a consensus manner that is agreeable to all stakeholders using appropriate frameworks, strategies, techniques during prototype development	BT II
CO3	Identify real-time innovative product designs and choose appropriate frameworks, strategies, techniques during prototype development.	BT III
CO4	Analyze emotional experience and Inspect emotional expressions to better understand users while designing innovative products	

Modules	Course content	Periods
I	**Basics of Design Thinking :** Concept of innovation and its significance in business. Creative thinking process and problem-solving approaches. Know Design Thinking approach and its objective Design Thinking and customer centricity – real world examples of customer challenges, use of Design Thinking to Enhance Customer Experience, Parameters of Product experience, Alignment of Customer Expectations with Product. Discussion of a few global success stories like AirBnB, Apple, IDEO, Netflix etc. Stages of Design Thinking Process – Empathize, Define, Ideate, Prototype, Implement.	**17**
II	**Learning to Empathize and Define the Problem :** Importance of empathy in innovation process – how can students develop empathy using design tools. Observing and assimilating information. Individual differences & Uniqueness Group Discussion and Activities to encourage the understanding, acceptance and appreciation of individual differences. Wicked problems- Definition, Identification of wicked problems and the potential impact of their solutions	**16**
III	**Ideate, Prototype and Implement** Templates of ideation like brainstorming, systems thinking**.** Concept of brainstorming – how to reach consensus on wicked problems**.** Mapping customer experience for ideation**.** Methods of prototyping, purpose of rapid prototyping. Implementation.	**16**
IV	**Feedback, Re-Design & Re-Create:** Feedback loop, focus on User Experience, address ergonomic challenges, user focused design, Final concept testing, Final Presentation – Solving Problems through innovative design concepts & creative solution.	**17**
	Total	**66**

CEN III: Fundamentals of Business Communication

Subject Code: CEN982 A301	Course Level :200
Credit Units: 1	Scheme of Evaluation: (T)
L-T-P-C=1-0-0-1	

Course Objective: The aim of the course is to develop essential business communication skills, including effective writing, speaking, and interpersonal communication, to enhance professional interactions, collaboration, and successful communication strategies within diverse corporate environments.

Sl No.	Course outcome	Bloom's Taxonomy Level
CO1	Define and list business documents using appropriate formats and styles, demonstrating proficiency in written communication for various business contexts.	**BT -I**
CO2	Demonstrate confident verbal communication skills through persuasive presentations, active listening, and clear articulation to engage and influence diverse stakeholders.	**BT -II**
CO3	Apply effective interpersonal communication strategies, including conflict resolution and active teamwork, to foster positive relationships and contribute to successful organizational communication dynamics	**BT -III**
CO4	Devise mechanisms to make the students understand professionalism in terms of workplace behaviour and workplace relationships. With practical orientation.	**BT IV**

Modules	Course Content	Periods
I	**Business Communication: Spoken and Written** • The Role of Business Communication • Classification and Purpose of Business Communication • The Importance of Communication in Management • Communication Training for Managers • Communication Structures in Organizations • Information to be Communicated at the Workplace Writing Business Letters, Notice, Agenda and Minutes	**4**

II	**Negotiation Skills in Business Communication**
	• The Nature and Need for Negotiation
	  ◦ Situations requiring and not requiring negotiations.
	• Factors Affecting Negotiation
	  ◦ Location, Timing, Subjective Factors
	• Stages in the Negotiation Process
	  ◦ Preparation, Negotiation, Implementation Negotiation Strategies
		6

III	**Ethics in Business Communication** • Ethical Communication • Values, Ethics and Communication • Ethical Dilemmas Facing Managers • A Strategic Approach to Business Ethics • Ethical Communication on Internet Ethics in Advertising	8
IV	**Business Etiquettes and Professionalism** • Introduction to Business Etiquette • Interview Etiquette • Social Etiquette • Workplace Etiquette • Netiquette	4
	Total	22

SEC
Basics of Tally

Subject Code:BSA032S311	Course Level: 200
Credit Unit: 3	Scheme of Evaluation: (P)
L-T-P-C=2-0-2-3	

Course Objective:
To impart knowledge and skills for software application of financial accounting and acquaint students with practical problem solving.

Sl No.	Course outcome	Bloom's Taxonomy Level
CO1	Define the specific tools for documenting financial	BT -I
CO2	Interpret the financial statement using Tally.	BT -II
CO3	Develop skills to prepare account manually and computerized.	BT -III
CO4	Devise a Company, Ledgers and Groups creation, stock groups, Stock items, stock unit's formation, various Vouchers Entry, etc. in tally software.	BT IV

Module	Contents	Periods
I	ERP basic features – benefits – selection-implementation	18
II	Tally basic and advance features – Company Creation-configure and features settings-Ledger Creation with predefined primary Groups, Predefined Subgroup and New Subgroup – Creating Stock, Items and Groups.	16
III	Preparation of Ledger accounts on Tally- Preparation of Invoices- Vouchers Entry, Generating Reports.	18
IV	Preparation of Cash Books, Ledger Accounts, Trail Balance, Profit and Loss Accounts, Balance Sheet, Funds Flow Statement, Cash Flow Statement and Display of Final accounts- Ratios-Selecting and Shutting a company – Backup and Restore data of a Company	16
	Total	**68**

SEMESTER – IV

Managerial Economics

Subject Code: BSA032M401	Course Level:200
Credit Units: 4	Scheme of Evaluation: (T)
L-T-P-C=-3-1-0-4	

Course Objective: To enable the students to understand the laws of supply and demand and various contributing factors; various laws of production and costs; various types of market structures.
After the completion of the course, the students will be able to:

COs	Course outcome	Bloom's Taxonomy Level
CO1	List the basic concepts and importance of managerial economics	BT I
CO2	Describe various variables of consumer behaviour	BT II
CO3	Analyse how changes in supply and demand affect market equilibrium	BT III
CO4	Compare and contrast different market structures in terms of their efficiency and welfare implications.	BT IV

Modules	Course Content	Periods
I	Nature, Scope, Definitions of Business Economics, Contribution and Application of Business Economics to Business. Objectives of a firm. Opportunity Costs, Risk, Return and Profits. Demand- Demand function, Individual and Market demand, Law of demand and supply, exceptions to the law of demand, change in demand, Elasticity of demand- price, income and cross elasticity, Methods, and degrees of price elasticity, Point and arc elasticity	22
II	Consumer Behaviour: Consumer sovereignty-limitations. Approaches to the study of consumer behaviour - cardinal approach-the law of equip- marginal utility, ordinal approach – indifference curve analysis-properties – consumer surplus – meaning-analysis limitations. Price, income and substitution effects. Giffen goods. Engel curve.	22
III	Modern cost concepts, Relationship between Marginal Cost and Average Cost, Cost of production: Short-run and long run, Production function-linear and homogeneous production function, stages of production; Isoquants, Iso-cost line, Returns to scale; Economies and diseconomies of scale	22
IV	Perfect competition: Basic features, short run equilibrium of firm/industry, long run equilibrium of firm/industry, Monopoly: basic features& price determination; Monopolistic competition: basic features and price determination, Oligopoly: concepts and price determination	22

Business Research Methods

Subject Code: BSA032M402	Course Level: 200
Credit Units: 4	Scheme of Evaluation:(T)
L-T-P-C=-3-1-0-4	

Course Objective: To enable students to conduct business research to investigate, analyses and interpret data to understand the business problem using relevant tools.

After the completion of the course, the students will be able to:

COs	Course outcome	Bloom's Taxonomy Level
CO1	Define business research and its importance in decision-making.	BT I
CO2	Summarize the steps involved in conducting a business research project.	BT II
CO3	Use statistical tools and techniques to Analyse research data.	BT III
CO4	Assess the impact of research on business decision-making.	BT IV

Modules	Course Content	Periods
I	**Introduction to Research** Meaning of Research, Types of Research, Process of Research, Research Dilemma, Defining Research Problem, Formulating the Research hypotheses, Developing Research problem, Research design	**22**
II	**Sampling, Measurement & Scaling and Data Collection** Population and Sample, Sampling for research, Type of Sampling Methods, Characteristics of a good Sampling Design. Types of data –sources, methods of data collection (Primary and Secondary Data) Questionnaire Design	**22**
III	**Data Analysis and Interpretation:** Descriptive Statistics, Univariate and Bivariate Analysis of Data, Testing of Hypothesis Process steps, Type-I & Type-II Error Parametric Test and Non-parametric test (using SPSS/ MS Excel/ any other statistical package as well)	**22**
IV	**Introduction to Advanced Data Analysis & Research Report** Introduction to Factor analysis, Correlation and Regression analysis techniques, Report writing and presentation- Layout, Contents, Qualities of research report, Ethical issues in Business Research	**22**
	Total	**88**

CENIV-Communicative English – IV:

Subject Code: CEN982A401	Course Level :200
Credit Unit: 1	Scheme Of Evaluation: (T)
L-T-P-C: 1-0-0-1	

Course Objective: This course is designed to enhance employability and maximize the students' potential by introducing them to the principles that determine personal and professional success, thereby helping them acquire the skills needed to apply these principles in their lives and careers.

COs	Course outcome	Bloom's Taxonomy Level
CO 1	Demonstrate understanding the importance of verbal and non-verbal skills while delivering an effective presentation.	BT -II
CO 2	Develop professional documents to meet the objectives of the workplace	BT -VI
CO 3	Define and identify different life skills and internet competencies required in personal and professional life.	BT -I
CO 4	Illustrate ways through which students can correlate and are well equipped with the state-of-the-art tools such as digital skills along with life skills in their day-to-day operations	BT IV

Modules	Course Content	Periods
I	• **Presentation Skills** Importance of presentation skills, Essential characteristics of a good presentation, Stages of a presentation, Visual aids in presentation, Effective delivery of a presentation	**5**
II	• **Business Writing** Report writing: Importance of reports, Types of reports, Format of reports, Structure of formal reports. Proposal writing: Importance of proposal, Types of proposal, structure of formal proposals. Technical articles: Types and structure	**5**
III	• **Preparing for jobs** Employment Communication and its Importance, Knowing the four-step employment process, writing resumes, Guidelines for a good resume, Writing cover letters. Interviews: Types of interviews, what does a job interview assess, strategies of success at interviews, participating in group discussions.	**5**

IV	**Digital Literacy and Life Skills** **Digital literacy:** Digital skills for the '21st century', Collegestudentsand technology, information management using Webspace, Dropbox, directory, and folder renaming conventions. Social Media Technology and Safety, Web 2.0. **Life Skills**: Overview of Life Skills: Meaning and significance of life skills, Life skills identified by WHO: self-awareness, Empathy, Critical thinking, Creative thinking, Decision making, problem-solving, Effective communication, interpersonal relationship, coping with stress, coping with emotion. Application of life skills: opening and operating bank accounts, applying for pan, passport, online bill payments, ticket booking, gas booking	**7**

Introduction to Human Resource Management (Minor for RGU Business Administration)

Subject Code: BSA032N401	Course Level 200
Credit Unit: 3	Scheme of Evaluation: (T)
L-T-P-C=2-1-0-3	

Course Objective:

This course provides an overview of human resource management functions, including how firms hire, develop, and manage their people. The training focuses on providing a general grasp of all the HR functions involved in employee life cycle management.

After the completion of the course, the students will be able to:

COs	Course outcome	Bloom's Taxonomy Level
CO1	Define the key issues related to administering the human element such as motivation, compensation, appraisal, career planning and training	BT-I
CO2	Summarize various tools required for the development, implementation, and evaluation of HRM practices in national and international contexts.	BT-II
CO3	Implement HRM strategies to enhance employee development and retention.	BT-III

Modules	Course Content	Periods
I	**Introduction to Human Resource Management:** Evolution of HRM, Objectives of HRM, Functions, HRM and Personnel Management, Future Role of HRM, Strategic Human resource management.	**17**
II	**Human Resource Procurement:** Human Resource Planning- Characteristics, Significance. Job Analysis and Design–Introduction, Process, Job Description and Job Specification, Job Design- Definition, Importance. Recruitment and selection Selection, Placement, Orientation, Induction.	**16**
III	**Human Resource Development:** Employee Training- Significance, Training wheel and Methods of Training, Organization Change- Definition, Change Agents, Organizational resistance, Organization Development.	**16**
IV	**Human Resource Evaluation and Compensation** Performance Evaluation-Process, Evaluation Methods, Compensation Administration-Introduction, Objectives, Components of salary, types of Incentive, Executive compensation.	**17**

Management Information System (Minor for Business Administration)

Subject Code: BSA032N402	Course Level 200
Credit Unit: 3	Scheme of Evaluation: (T)
L-T-P-C=2-1-0-3	

Course Objective:

The course aims to provide students with comprehensive knowledge and practical skills in managing information systems (MIS), database management, information system applications, and project management using modern tools and methodologies. Students will learn to analyze, design, and implement effective MIS solutions in various business contexts

After the completion of the course, the students will be able to:

COs	Course outcome	Bloom's Taxonomy Level
CO1	Define the basic concepts, types, dimensions, and components of MIS, and evaluate the benefits and evolution of IT infrastructure in the digital firm era.	BT-I
CO2	Illustrate and Interpret project management objectives and methodologies, including agile practices such as SCRUM, and manage projects effectively to control risk factors and understand ethical, social, and political issues in the information era	BT-II
CO3	Apply database management principles by setting up and managing DBMS packages, creating Entity-Relationship diagrams, and understanding data models,data warehouses, and administration techniques.	BT-III
CO4	Analyze various MIS applications, including DSS, GDSS, and knowledge management systems, and develop e-commerce solutions by leveraging enterprise models, business process reengineering, and digital communication strategies	BT-IV

Modules	Course Content	Periods
I	**Fundamentals concepts of MIS** Basics concepts of MIS/ Types of MIS, Dimension and components of IS, Benefits of MIS, IT infrastructure, and IT infrastructure evolution, Components of IT infrastructure, New approaches for system building in the digital firm era	**17**
II	**Data base management system:** Objectives of data base approach- Characters of database Management systems- Data processing system- Components of DBMS packages - Data base administration- Entity – Relationship (conceptual)	**16**
III	**Information system applications:** MIS applications, DSS – GDSS - DSS applications in E enterprise - Knowledge Management System and Knowledge Based Expert System - Enterprise Model System and E-Business, E- Commerce, E-communication, Business Process Reengineering.	**16**
IV	**Managing Projects :** Objectives of project management, Fundamentals of project management information systems with agile methodologies -Introduction of SCRUM, Roles and meetings, User	**17**

	stories, Project risk, Controlling risk factors, Ethical, social, and political issues in the information era.

Introduction to Financial Management (Minor for RGU Business Admiration)

Subject Code: BSA032N402	Course Level 200
Credit Unit: 3	Scheme of Evaluation: (T)
L-T-P-C=2-1-0-3	

Course Objective:

The course aims to provide an understanding of the concept of finance and how influential the time value of money is. It further familiarizes the learners with various Principles and practices of financial management while pursuing them with the various decisions involved in managing finance.

After the completion of the course, the students will be able to:

COs	Course outcome	Bloom's Taxonomy Level
CO1	Define key financial management terms and concepts.	BT-I
CO2	Interpret financial data presented in statements and reports.	BT-II
CO3	Apply financial management techniques to solve real-world financial problems.	BT-III

Modules	Course Content	Periods
I	**INTRODUCTION** Nature, Scope, and Functions of Financial Management, Profit vs Wealth Maximization. Risk and Return, Time value of money. Calculating Present and Future Value. Valuation of securities – Bonds and Equities	17
II	**INVESTMENT DECISIONS** The Capital Budgeting Process, Cash flow Estimation, Payback Period Method, Accounting Rate of Return, Net Present Value (NPV), Net Terminal Value, Internal Rate of Return (IRR).	16
III	**FINANCING DECISION** Defining Capital Structure, Determinants of Capital Structure, Relevance of Capital Structure- NI & Traditional Views, Irrelevance of Capital Structure- NOI Approach and MM Theory, Optimum Capital Structure. Meaning of Financial Leverage & its Measures, Financial Leverages, and the Shareholder's Return, Combining Financial and Operating Leverage.	16
IV	**DIVIDEND DECISION & WORKING CAPITAL DECISION** Dividend Policy: Meaning and Kinds of Dividend, Theories on Dividend Policies, Practical Considerations in Dividend policy, Relevance of dividend policy on Firm's Value, Factors influencing a Firm's dividend policy. Working Capital Management: Concepts of Working Capital, Operating and Cash Conversion Cycle, Permanent and Variable Working Capital, Determinants of Working Capital, Estimation of Working Capital Needs.	17

Project Management (Minor for Management)

Subject Code: BSA032N404	Course Level 200
Credit Unit: 3	Scheme of Evaluation: (T)
L-T-P-C=2-1-0-3	

Course Objective:

This course is designed to introduce students to the fundamental aspects of planning, executing, monitoring, and closing projects across diverse industries. The course emphasizes the use of project management tools, particularly Microsoft Project, to manage timelines and resources efficiently. Through exploring risk management, stakeholder communication, and Agile methodologies, students will develop the critical thinking and practical skills necessary for successful project management.

After the completion of the course, the students will be able to:

COs	**Course Outcome**	**Bloom's Taxonomy Level**
CO1	Define the fundamental principles, key phases, processes, and core concepts of project management, including scope, time, cost, and quality.	**BT-I**
CO2	Interpret project management frameworks and explain their application in real-world projects.	**BT-II**
CO3	Develop skills in stakeholder management and communication strategies essential for project success	**BT-III**
CO4	Analyze project scenarios to identify potential risks, resource constraints, and critical success factors**.**	**BT-IV**

Module	**Course content**	**Period**
CO1	**Fundamentals of Project Management** : This unit covers the core concepts of project management, including the project life cycle, the role of the project manager, and the organizational context of projects. Students will learn about the stages of a project from initiation to closure and the key responsibilities of a project manager in driving project success.	17
CO2	**Project Planning and Tools:** Focusing on the planning phase of project management, this unit explores setting project scope and objectives, developing a Work Breakdown Structure (WBS), and managing time through scheduling techniques such as Gantt charts and PERT/CPM. Practical application includes using Microsoft Project to create and manage schedules, emphasizing the integration of project management tools to streamline project planning.	16
CO3	**Executing and Monitoring Projects :** This unit delves into resource allocation, budgeting, and quality control within project execution. Students will also learn about risk management processes including identification, analysis, and response strategies. Practical exercises will include resource management and performance tracking using Microsoft Project, highlighting effective control measures to ensure project alignment with planned objectives.	17
CO4	**Concluding Projects and Agile Methodologies:** The final unit discusses the closing phase of projects, including performance	16

	measurement, stakeholder communication, and post-project evaluation. Additionally, this unit introduces Agile project management principles and the Scrum framework, comparing Agile with traditional project management methods to provide students with a broader understanding of managing projects in dynamic environments.

SEMESTER – V

Production and Operation Management

Subject Code: BSA032M501	Course Level 300
Credit Unit: 4	Scheme of Evaluation: (T)
L-T-P-C=3-1-0-4	

Course Objective: This course aims to improve students understanding of the concepts, principles, problems, and practices of operations management for effective operations in both goods- producing and service-rendering organization.

After the completion of the course, the students will be able to:

COs	Course outcome	Bloom's Taxonomy Level
CO1	Identify key concepts in production and operations management.	BT I
CO2	Summarize the factors influencing production and operations decisions.	BT II
CO3	Apply production planning techniques to optimize resource utilization.	BT III
CO4	Evaluate different production and operations strategies in terms of their impact on organizational performance.	BT IV

Modules	Course Content	Periods
I	**Introduction to Production and Operations Management** Introduction, Operations and Productivity, Types and Characteristics of Manufacturing systems, Services Systems, **Design of Work Systems** - Method study and work measurement, measuring productivity, ways of improving productivity. Recent trends in Production and Operations Management, Global Challenges of Production and Operations Management	22
II	**Designing of Production and Operations Management** Designing of Goods and Services – Product Design, Issues in product design, Service design, Facility Location analysis – steps, techniques, factors affecting location analysis. Facility Layout Analysis – types of layouts, factors affecting layout, assembly line balancing.	22
III	**Managing Production and Operations Management** Inventory Management: Basic Inventory models, EOQ Models, Concept of Safety Stock, Material Requirement Planning (MRP), Aggregate Planning: Different types of aggregate planning strategies.	22
IV	**Quality Management** Nature and Evolution of Quality Management, Contribution of Quality Gurus, Total Quality Management concepts, Quality control tools	22
	Total	**88**

SEMESTER -VII

Environmental Science and Sustainability

Subject Code:BSA032M701	Course Level :400
Credit Unit: 4	Scheme Of Evaluation: (T)
L-T-P-C=3-1-0-4	

Course Objective:

This course aims to familiarize students with basic environmental concepts, their relevance to business operations, and forthcoming sustainability challenges. It will equip students to make decisions that consider environmental consequences and enable future business graduates to become environmentally sensitive and responsible managers.

After the completion of the course, the students will be able to:

COs	Course Outcome	Bloom's Taxonomy Level
CO1	Recall the basic concepts of environment, ecology, biodiversity, and natural resources.	BT-I
CO2	Explain the interrelationship between human activities and environmental sustainability.	BT-II
CO3	Apply knowledge of environmental science to assess environmental issues and suggest sustainable solutions.	BT-III
CO4	Analyze environmental problems by evaluating scientific, social, and economic dimensions for sustainable development	BT-IV

Detailed Syllabus:

Module	Course Content	Periods
I	**Understanding Environment, Natural Resources, and Sustainability :** Fundamental environmental concepts and their relevance to business operations; Components and segments of the environment, the man-environment relationship, and historical environmental movements. Concept of sustainability; Classification of natural resources, issues related to their overutilization, and strategies for their conservation. Sustainable practices in managing resources, including deforestation, water conservation, energy security, and food security issues. The conservation and equitable use of resources, considering both intergenerational and intergenerational equity, and the importance of public awareness and education.	22
II	**Ecosystems, Biodiversity, and Sustainable Practices :** Various natural ecosystems, learning about their structure, functions, and ecological characteristics. The importance of biodiversity, the threats it faces, and the methods used for its conservation. Ecosystem resilience, homeostasis, and carrying capacity, emphasizing the need for sustainable ecosystem management. Strategies for in situ and ex situ conservation, nature reserves, and the significance of India as a mega diverse nation.	22
III	**Environmental Pollution, Waste Management, and Sustainable Development:** Types of environmental pollution, including air, water, noise, soil, and marine pollution, and their impacts on businesses and communities. Causes of pollution, such as global climate change, ozone layer depletion, the greenhouse effect, and acid rain, with a particular focus on pollution episodes in India. Importance of adopting cleaner technologies; Solid waste management; Natural and man-made disasters, their management, and the role of businesses in	22

	mitigating disaster impacts.	
IV	**Social Issues, Legislation, and Practical Applications:** Dynamic interactions between society and the environment, with a focus on sustainable development and environmental ethics. Role of businesses in achieving sustainable development goals and promoting responsible consumption. Overview of key environmental legislation and the judiciary's role in environmental protection, including the Water (Prevention and Control of Pollution) Act of 1974, the Environment (Protection) Act of 1986, and the Air (Prevention and Control of Pollution) Act of 1981. Environmental justice, environmental refugees, and the resettlement and rehabilitation of affected populations; Ecological economics, human population growth, and demographic changes in India	22

Enterprise System and Platforms

Subject Code:BSA032M702	Course Level :400
Credit Unit: 4	Scheme Of Evaluation: (T)
L-T-P-C=3-1-0-4	

Course Objective:

The course aims to provide students with comprehensive knowledge and practical skills in the field of Enterprise Resource Planning (ERP). Students will learn to design, implement, and manage ERP systems, as well as understand advanced ERP features and future trends, using various free or student-accessible tools.

After the completion of the course, the students will be able to:

COs	Course Outcome	Bloom's Level
CO1	Define fundamental concepts and components of enterprise systems and platforms including ERP, SCM, and CRM.	BT-I
CO2	Explain the architecture, functionalities, and benefits of different enterprise platforms in supporting business processes	BT-II
CO3	Identify the use of enterprise resource planning (ERP) tools and platforms for solving real-world business problems.	BT-III
CO4	Analyze how integration of enterprise platforms like ERP, SCM, and CRM enhances decision-making and organizational efficiency.	BT-IV

Detailed Syllabus:

Module	Course Content	Periods
I	**Introduction to Enterprise Resource Systems :** Overview of Enterprise Resource Planning (ERP), Definition and Evolution of ERP, Key Drivers for ERP Implementation, ERP Components and Architecture, Core Modules (Finance, HR, Supply Chain, etc.), Common Challenges and Solutions	22
II	ERP System Design and Architecture ERP System Design, System Development Life Cycle (SDLC) for ERPs, Customization vs. Standardization, ERP Architecture, Three-Tier Architecture, Integration of ERP with Other Systems, ERP Vendors and Solutions, Overview of Major ERP Vendors (SAP, Oracle, Microsoft, etc.), Comparison of ERP Solutions	22
III	**ERP Implementation and Management:** Implementation Strategies, Planning and Preparation, Data Migration and Integration, Project Management for ERP Implementation, Project Planning and Execution, Risk Management and Mitigation, Post-Implementation Activities, Training and Support, Continuous Improvement and Maintenance.	22

IV	**Advanced Topics and Future Trends in ERP :** Advanced ERP Features, Business Intelligence and Analytics, Cloud-Based ERP Solutions, Emerging Trends in ERP, Internet of Things (IoT) and ERP Integration, Artificial Intelligence and Machine Learning in ERPs, Impact of ERP on Business Strategy, Strategic Decision Making with ERP, ERP and Digital Transformation	22
	Total	**88**

Technology and Innovation Management

Subject Code:BSA032M703	Course Level :400
Credit Unit: 4	Scheme Of Evaluation: (T)
L-T-P-C=3-1-0-4	

Course Objective:

The course aims to develop students' capacity in creating and executing innovative strategies, overseeing innovation initiatives, and leading teams with diverse areas of expertise. They shall possess expertise in innovative systems, public programmers, and external finance, and have the ability to provide practical ideas and problem-solving skills.

COs	Course Outcome	Bloom's Level
CO1	Define the concepts and methodologies related to technology and innovation management	BT-I
CO2	Interpret the problems, employ critical analysis, and provide innovative solutions to challenges	BT-II
CO3	Apply the life cycle concept of technology manage innovation	BT-III
CO4	Analyze the innovation strategies for decision making.	BT-IV

Detailed Syllabus:

Module	Course Content	Periods
I	Evolution of Markets: innovation adoption, diffusion, market growth, new product entry, competitor responses, understanding customer needs, product development as a problem-solving process, Key drivers of innovation, Sources of innovation, Types of Innovation, Scope and content of innovation management, strategic analysis frameworks of innovation management.	**22**
II	Introduction to Technology; Classification of technology; Management of Technology (MOT), Conceptual framework for MOT, Critical factors in managing technology – creativity factor, invention and innovation, technology-price relationship, change strategies	**22**
III	Management of Technology: New Paradigms, Issues in managing technology – resources ,business environment, structure and management of organizations, project planning and management, management of human resources	**22**
IV	Technology Lifecycle S curve of technology processes, technology and market interaction, competition at different phases of the technology lifecycle, diffusion of technologies Process of technological innovation, technology audit model and TAM.	**22**

Data Analytics using R/ Python (Minor for RSB Management)

Subject Code:BSA032N702	Course Level :400
Credit Unit: 4	Scheme Of Evaluation: (T)
L-T-P-C=3-1-0-4	

Course Objective:

To provide students with a comprehensive understanding of the R programming language, enabling them to proficiently handle data analysis tasks, visualize data insights, and apply statistical methods using R's diverse functions and packages.

COs	Course Outcome	Bloom's Level
CO1	Recall basic data structures such as arrays, lists, and data frames, and recognize operations like sorting, merging, and sub-setting used in data preparation.	BT-I
CO2	Demonstrate proficiency in R programming essentials, including data types, vectors, matrices, and operators, establishing a strong foundation for advanced data manipulation.	BT-II
CO3	Apply control flow mechanisms, including decision-making and looping constructs, and develop custom functions to perform repetitive analytical tasks	BT-III
CO4	Analyze data sets and create appropriate visual representations, such as bar charts, histograms, line graphs, and pie charts, to support data-driven decision-making.	BT-IV

Detailed Syllabus:

Module	Course Content	Periods
I	**Introduction:** Features of R – How to install and run R – Comments in R – Reserved words – Identifiers – Constants – Variables – Operators (Arithmetic, Relational, Logical, Assignment, Miscellaneous Operators) – Operator Precedence – Strings. Basic Data Types (Numeric, Integer, Complex, Logical, Character) – Creating, combining vectors – Accessing Vector Elements – Modifying Vectors – Deleting Vectors- Vector arithmetic and Recycling – Vector Element Sorting – Reading Vectors – Creating Lists Accessing List elements – Updating List Elements – Merging Lists – List to Vector conversion – Creating matrices – Accessing Matrix Elements – Matrix Arithmetic – Matrix Manipulation – Matrix Operations	22
II	**Arrays, Factors and Data Frames :** Creating Arrays – Accessing Array Elements – Array Element Manipulation – Array Arithmetic – Creating factors – Accessing Factor Components – Modifying factors – Creating Data Frames – Accessing Data Frames Components – Modifying Data Frames Aggregating Data – Sorting Data – Merging Data – Reshaping data – Sub-setting data – Data Type Conversion	22
III	**Flow Control & Functions:** Decision making (using if statement - if…else statement - Nested If…Else statement - ifelsefunction - Switch statement) – Loops (for loop – while Loop – repeat Loop) – Loop Control statements – break statement – next	22

	statement – Function definition and Function Calling – Function without arguments – Built-in functions (Mathematical functions – Character functions – statistical functions – date and time functions – other functions – Recursive function)	
IV	**Charts & Graphs :** Bar charts (Plotting bars vertically and horizontally – Plotting categorical data – Grouped bar chart – Stacked bar chart) – Histogram (Simple histogram – Histogram with labels, breaks and density lines) – Line graphs (Simple line graph & Graphs with Multiple lines) – Pie charts (Simple and 3D pie charts)	22
	Total	**88**

SEMESTER -VIII

Business Ethics and Sustainability Development

Subject Code: BSA032M801	Course Level :400
Credit Unit: 4	Scheme Of Evaluation: (T)
L-T-P-C=3-1-0-4	

Course Objective:

The course aims to impart abilities or practical skills to study, understand, analyze, criticize, and manage ethical problems related to business, sustainability issues, corporate social responsibility through corporate governance and laws and regulations.

COs	Course Outcome	Bloom's Taxonomy Level
CO1	Define the theoretical frameworks of business ethics and values	BT-I
CO2	Interpret the ethical problems related to various functions of management	BT-II
CO3	Apply the key principles of sustainability in business practice	BT-III
CO4	Analyze the efficacy of sustainability initiatives/plans.	BT-IV

Detailed Syllabus:

Module	Course Content	Periods
I	**Conceptual Framework of Business Ethics:** Business ethics, Nature of ethics as moral value, Ethics vs. Law, Culture vs. Universal Norms, Sustainability of eastern values to western business, Pragmatism ethics, Criticism of socialism, social market economy, Ethical decision-making, Decision-making process, Classification of decision making	22
II	**Ethical Foundation in Business:** Purpose of business: profit maximization to CSR, Western teleological, deontological and modern theories, Workplace ethics-hiring, employee promotion, discharge, gender and caste discrimination, sexual harassment, Marketing ethics-pricing, packaging, advertising, product promotion, consumer safety, financial ethics-transparent system, financial record keeping, financial disclosures, Organizational ethics-abuse of official position, bribes, gifts, entertainment, whistle blowing	22
III	**Introducing Sustainability:** Sustainability in relation to business organization, Issues related to environment, Conserving resources, Carbon footprint, Pollution & carbon emission, Safeguarding communities and bio-diversities.	22
IV	**Global Perspective of Sustainability:** MDGs and SDGs, UN's agenda for sustainable development for 2030, Creating sustainable and equitable economy, Creating environmentally sustainable economy, Triple bottom line approach, corporate environment responsibility.	22
	Total	**88**

Advance Research Methodology (Minor for RSB Management)

Subject Code: BSA032N801	Course Level :400
Credit Unit: 4	Scheme Of Evaluation: (T)
L-T-P-C=3-1-0-4	

Course Objective:

To develop the understanding of the basic framework of research process and the ability to conduct the research independently.

COs	Course Outcome	Bloom'sTaxonomy Level
CO1	Relate the concepts and key terms of business research methods	BT-I
CO2	Compare the different theories, design, methods of business research	BT-II
CO3	Construct conceptual models based on theories	BT-III
CO4	Analyze the methods and techniques for the acquisition, analysis of data and reporting of the findings	BT-IV

Detailed Syllabus:

Module	Course Content	Periods
I	**Introducing Research:** Meaning and overview of business research, Research Method and Research Methodology, Role of Business research, Types of Research, Research Process, Research Problem identification, Types of Research Design, Choosing a Research Design. Ethics in research.	22
II	**Data Sources, Measurement and Data Collection** Sampling Considerations- Methods, Size determination, Scales of Measurement, Scale Construction, Scale Evaluation – Reliability, Validity and Practicality. Observation: Different types of observation, Criteria of selection of an ideal method in different situations. Qualitative Research Methods, Quantitative Research Methods, Questionnaire-Variables identification, construction and design and Pilot testing	22
III	**Data handling and Analysis (with application of Software)** Editing, Coding, Decoding and Data entry, Descriptive statistics, hypothesis testing- steps, formulation. Parametric and Non parametric test-Normality test, Chi Square, difference t, Z, ANOVA, test of relationship, Wilcoxon Signed Rank, Maan-Whitney U test, Friedman test	22
IV	**Advanced Data Analysis, Interpretation and Reporting:** Introduction to Factor Analysis, Discriminant Analysis, Conjoint Analysis, MDS in business research Research Report writing: Content and layout, Quality of Reporting, Referencing and Bibliography.	22
	Total	**88**

Supply Chain Management

Subject Code: BSA032M802	Course Level :400
Credit Unit: 4	Scheme Of Evaluation: (T)
L-T-P-C=3-1-0-4	

Course Objective:

The course aims to develop an understanding of supply chain management practices and their inter-relationships with other organizational functions. This course provides students the necessary analytical tools and prepares them for managing the supply chain operations.

COs	Course Outcome	Bloom's Taxonomy Level
CO1	Define the framework and scope of supply chain management	BT-I
CO2	Demonstrate an in-depth understanding of supply chain operating areas and their inter-relationships	BT-II
CO3	Construct a competitive supply chain using strategies, models, techniques and information technology	BT-III
CO4	Analyze the emerging trends and impact on supply chain	BT-IV

Detailed Syllabus:

Module	Course Content	Periods
I	**Introduction to Supply Chain Management** Understanding the supply chain, historical perspective, objective of a supply chain, decision phases in a supply chain, enablers of supply chain performance, supply chain strategies, achieving strategic fit, expanding strategic scope, challenges of achieving strategic fit	22
II	**Management components of Supply Chain** Supply chain drivers and metrics, designing of distribution network, network design in the supply chain, coordination in a supply chain, bullwhip effect, sourcing decisions in supply chains	22
III	**Supply Chain Management techniques** Demand forecasting, Inventory management techniques, EOQ models, concept of safety stock, buffer stock, aggregate planning, transportation decisions in supply chain	22
IV	**Use of IT in Supply Chain Management** IT in supply chain management, supply chain IT framework, CRM and supply chain, IT enabled pricing and revenue management in supply chain, IT enabled collaborative planning forecasting and replenishment (CPFR), Role of IT in managing uncertainty in supply chain	22
	Total	**88**

Legal Aspects of Business

Subject Code:BSA032M803	Course Level :400
Credit Unit: 4	Scheme Of Evaluation: (T)
L-T-P-C=3-1-0-4	

Course Objective:

The course aims to enhance students' understanding of legal issues in business, enabling business managers to make decisions in line with local laws, understanding the basic nature of law, dispute resolution, and its connection to various fields.

COs	Course Outcome	Bloom's Taxonomy Level
CO1	Outline the various laws on business	BT-I
CO2	Explain the fundamental legal principles behind contractual Agreements	BT-II
CO3	Identify the rules and regulations impacting managerial functions	BT-III
CO4	Examine the legal aspects of business using cases.	BT-IV

Detailed Syllabus:

Module	Course Content	Periods
I	Indian Mercantile Law – concept and elements - Law of contract: Nature – classification - Agreement and Contract - Offer and Acceptance - Consideration and Capacity to Contract - Free Consent, Performance & Discharge of Contract - Breach of Contract - Contract of Agency. **The Sale- of Goods Act :** **Contract of sale:** Essentials of a Contract of Sale, Sale & Agreement of Sale distinguished, Goods- Meaning and Classification, Effect of Perishing of Goods, Price & Mode of Fixation of Price. **Conditions & Warranties**: Conditions defined & Kinds of Conditions, Warranties defined & Kinds of Warranties, Doctrine of Caveat Emptor, Transfer of Ownership in Goods, Passing of Risk. **Unpaid Seller**: Unpaid Seller defined, Rights of unpaid seller.	22
II	**Law relating to Partnership:** **The Law of Partnership:** Definition of Partnership & its Essential Characteristics, True test of Partnership, Formation of Partnership. Registration of a firm, Effects of Non- Registration, Rights & Duties of a Partner, Liability of a Partner, Implied Authority of Partner. Distinction between Dissolution of a Partnership & Dissolution of a Firm, Reconstitution and Dissolution of a Firm. **Limited Liability Partnership (LLP):** Meaning & Nature of LLP, Advantages of LLP, Main Features of LLP, LLP Vs. Partnership, LLP Vs. Company, LLP Agreement, Incorporation of LLP, Accounts & Return, Winding UP & Dissolution.	22

III	**The Consumer Protection Act,2019: Genesis of Consumer Protection Law in India,** Objects, Applicability, Basic definitions and Concepts, Rights of Consumers, Consumer Protection Councils, Central Consumer Protection Authority, Concept of Product Liability Redressal Mechanism under CP Law, Nature & Scope of Remedies available to Consumers. Intellectual Property Rights: Regulatory Structure and compliance, The Patent Act, 1970, The Copyright Act, 1957 and The Trade Mark Act, 1999	22
IV	**Introduction to company law:** Scope of Company's Act, 2013, Machineries set up for company law administration, Meaning, Nature & features of a company, Kinds of Companies, Lifting the corporate veil. **Formation of a company:** Promotion of a company, Promoters & their Position, Incorporation of a company, Memorandum of Association, Articles of Association Conversion of companies already registered, Doctrine of Ultra-Vires. Prospectus and Allotment of Securities: Public offer Vs. Private Placement, Prospectus & its contents, Statement in lieu of Prospectus, Shelf Prospectus, Red herring prospectus, Golden rule of framing of Prospectus, Misstatement in Prospectus & Remedies for misstatement, Allotment of shares, Irregular Allotment & its effects. **Share Capital:** Kinds of share capital, Voting rights, Transfer and Transmission of Securities, Issue of Sweat equity shares, Issue of Right & Bonus shares, Power of company to purchase its own securities, Issue of shares at a premium. **Membership of a company:** Member & Shareholder, Eligibility for membership, Modes of acquiring membership, Termination of membership, Rights & Liabilities of members. **Company Administration & Meetings:** **Board of Directors:** Board Constitution & Powers, Board Composition, Board Committee Directors & Types of Directors, Appointment & Reappointment of Directors, , Disqualifications of Directors, Vacation of office, Resignation, Retirement & Removal of Directors , Removal& Resignation of Directors, Rights & Duties of Directors. Board Meetings & General Meetings: Requisites of a valid Meeting, Resolutions, Minutes, Types of General Meetings, Voting & its types. **Accounts of Companies**: Books of Accounts, Financial Statements, Annual Return, Annual Report.	22
	Total	**88**

Social Media and Web Analytics

Subject Code:BSA032M804	Course Level :400
Credit Unit: 4	Scheme Of Evaluation: (T)
L-T-P-C=3-1-0-4	

Course Objective:

This course aims to equip students with the knowledge and skills to effectively leverage social media for marketing. Students will learn to develop comprehensive social media marketing plans, utilize analytics tools, manage social media data, and execute campaigns across various platforms to drive engagement, lead generation, and conversions.

COs	Course Outcome	Bloom' sTaxo nomy Level
CO1	Define key concepts and terminologies related to social media platforms and web analytics.	BT-I
CO2	Explain the working principles of social media tools and web analytics techniques used to assess user engagement and digital marketing performance	BT-II
CO3	Apply various social media strategies and analytics tools (such as Google Analytics, Facebook Insights) to monitor and improve campaign effectiveness.	BT-III
CO4	Analyze data collected from web and social platforms to extract actionable insights and optimize digital content strategy	BT-IV

Detailed Syllabus:

Module	Course Content	Periods
I	**Introduction:** Social media and its role within Marketing, Rules of engagement for Social media marketing Target audience – Influencers – Message/Content, Developing a Social media marketing plan Scope and marketing utility of blogging, micro-blogging, Using blogs for brand building & lead generation, Blog Analytics and Performance Tracking, social networks, social bookmarking, collaboration, video sharing, podcasts, picture sharing, live streaming, webinars	22
II	**Social Media Data Management :** Social media analytics, social media metrics – Introduction to analytics tools for popular social media (Facebook, Twitter, LinkedIn, YouTube, Instagram), Social media monitoring and Online reputation management.	22
III	**Social Media Measurements:** Pay per Click Marketing (PPC)-Definition, Need ,Google AdWords Account Structure, Facebook PPC Account Structure, CPC &"Click-through-Rate" (CTRs), "Cost/Conversion, Method of increasing CTR &Conversion, Tracking Code, Doing Keyword Research for PPC, Difference between SEO & PPC keywords, Ads for PPC Campaigns, Bidding, Quality Score, Score Effect on Bids, Increase Position on Search, Conversion rates, 'Calls to Action' (CTA), Cost/Conversion, PPC reporting structure, Campaign Performance Reports	22
IV	**Introduction to Web Analytics** Definition and Importance of Web Analytics, Key Metrics: Page Views, Visits, Unique Visitors, Bounce Rate, Conversion Rate, Understanding Website Traffic Sources: Direct, Referral, Organic, Paid	22

	Google Analytics Fundamentals: Setting Up Google Analytics Account, Tracking Code Implementation, Dashboard Overview and Customization, Understanding Reports: Real-Time, Audience, Acquisition, Behavior, and Conversions
