TABLEOF CONTENTS

Preamble

The National Education Policy (NEP) 2020 conceives a new vision for India's highereducation system. It recognizes that higher education plays an extremely important rolein promoting equity, human as well as societal well-being and in developing India asenvisionedinitsConstitution.Itisdesiredthathighereducationwillsignificantlycontribute towards sustainable livelihoods and economic development of the nation asIndiamovestowardsbecomingaknowledgeeconomyandsociety.

If we focus on the 21st century requirements, the higher education framework of thenation must aim to develop good, thoughtful, well-rounded, and creative individuals andmust enable an individual to study one or more specialized areas of interest at a deeplevel,andalsodevelopcharacter,ethicalandConstitutionalvalues,intellectualcuriosity,scientifictem per,creativity,spiritofservice,andtwenty-first-centurycapabilitiesacrossarangeofdisciplinesincludingsciences,socialsciences,arts,humanities,languages,aswellasprofessional,technical,andvocationalsubjects.Aquality higher education should be capable enough to enable personal accomplishmentand enlightenment, constructive public engagement, and productive contribution to thesociety.Overall,itshouldfocusonpreparingstudentsformoremeaningfulandsatisfying livesandworkrolesand enableeconomicindependence.

Towardstheattainmentofholisticandmultidisciplinaryeducation,theflexiblecurricula of the University will include credit-based courses, projects in the areas ofcommunityengagementandservice,environmentaleducation,andvalue-basededucation.Aspartofholisticeducation,studentswillalsobeprovidedwithopportunities for internships with local industries, businesses, artists, crafts persons,and so on, as well as research internships with faculty and researchers at the University,so that students may actively engage with the practical aspects of their learning andtherebyimprovetheiremployability.

The undergraduate curriculums are diverse and have varied subjects to be covered tomeettheneedsoftheprograms.AspertherecommendationsfromtheUGC, introduction of courses related to Indian Knowledge System (IKS) is being incorporatedin the curriculum structure which encompasses all of the systematized disciplines ofKnowledgewhichweredevelopedtoahighdegreeofsophisticationinIndiafromancient times and all of the traditions and practises that the various communities ofIndia—includingthetribalcommunities—haveevolved,refinedandpreservedovergenerations,like forexampleVedicMathematics,Vedangas,IndianAstronomy,FineArts,Metallurgy,etc.

At RGU, we are committed that at the societal level, higher education will enable eachstudent to develop themselves to be an enlightened, socially conscious, knowledgeable,and skilled citizen who can find and implement robust solutions to its own problems.For the students at the University, Higher education is expected to form the basis forknowledge creation andinnovation thereby contributing toa more vibrant, sociallyengaged,cooperativecommunityleadingtowardsahappier,cohesive,cultured,productive,innovative,progressive,andprosperousnation.”

Abbreviations

1. Cr. - Credit
2. Major - Core Courses of a Discipline
3. Minor - May/may not be related to Major.
4. SEC - Skill Enhancement Course
5. VAC - Value Addition Course
6. AEC - Ability Enhancement Course
7. GEC - Generic Elective Course

8.	IKS	- Indian Knowledge System
9.	AICTE	- All India Institute of Technical Education
10.	CBCS	- Choice Based Credit System
11.	HEIs	- Higher Education Institutes
12.	MSDE	- Ministry of Skill Development and Entrepreneurship
13.	NAC	- National Apprenticeship Certificate
14.	NCrF	- National Credit Framework
15.	NCVET	- National Council for Vocational Education and Training
16.	NEP	- National Education Policy
17.	NHEQF	- National Higher Education Qualification Framework
18.	NSQF	- National Skill Qualifications Framework
19.	NTA	- National Testing Agency
20.	SDG	- Sustainable Development Goals
21.	UGC	- University Grants Commission
22.	VET	- Vocational Education and Training
23.	ME-ME	- Multiple Entry Multiple Exit
24.	OJT	- On Job Training
25.	NCH	- Notional Credit Hours

1. 1. Introduction:

The National Education Policy (NEP) 2020 clearly indicates that higher education plays an extremely important role in promoting human as well as societal well-being in India. As envisioned in the 21st-century requirements, quality higher education must aim to develop good, thoughtful, well-rounded, and creative individuals. According to the new education policy, assessments of educational approaches in undergraduate education will integrate the humanities and arts with Science, Technology, Engineering and Mathematics (STEM) that will lead to positive learning outcomes. This will lead to develop creativity and innovation, critical thinking and higher-order thinking capacities, problem-solving abilities, teamwork, communication skills, more in-depth learning, and mastery of curricula across fields, increases in social and moral awareness, etc., besides general engagement and enjoyment of learning. and more in-depth learning.

The NEP highlights that the following fundamental principles that have a direct bearing on the curricula would guide the education system at large, viz.

i. Recognizing, identifying, and fostering the unique capabilities of each student to promote her/his holistic development.

ii. Flexibility, so that learners can select their learning trajectories and programmes, and thereby choose their own paths in life according to their talents and interests.

iii. Multidisciplinary and holistic education across the sciences, social sciences, arts, humanities, and sports for a multidisciplinary world.

iv. Emphasis on conceptual understanding rather than rote learning, critical thinking to encourage logical decision-making and innovation; ethics and human & constitutional values, and life skills such as communication, teamwork, leadership, and resilience.

v. Extensive use of technology in teaching and learning, removing language barriers, increasing access for Divyang students, and educational planning and management.

vi. Respect for diversity and respect for the local context in all curricula, pedagogy, and policy.

vii. Equity and inclusion as the cornerstone of all educational decisions to ensure that all students can thrive in the education system and the institutional environment are responsive to differences to ensure that high-quality education is available for all.

viii. Rootedness and pride in India, and its rich, diverse, ancient, and modern culture, languages, knowledge systems, and traditions.

1.2. Credits in Indian Context:

1.2.1. Choice Based Credit System (CBCS) By UGC

Under the CBCS system, the requirement for awarding a degree or diploma or certificate is prescribed in terms of number of credits to be earned by the students. This framework is being implemented in several universities across States in India. The main highlights of CBCS are as below:

- The CBCS provides flexibility in designing curriculum and assigning credits based on the course content and learning hours.
- The CBCS provides for a system wherein students can take courses of their choice, learn at their own pace, undergo additional courses and acquire more than the required credits, and adopt an interdisciplinary approach to learning.
- CBCS also provides opportunity for vertical mobility to students from a bachelor's degree programme to masters and research degree programmes.

1.3. Definitions

1.3.1. Academic Credit:

An academic credit is a unit by which a course is weighted. It is fixed by the number of hours of instructions offered per week. As per the National Credit Framework;

1 Credit = 30 NOTIONAL CREDIT HOURS (NCH)

Yearly Learning Hours = 1200 Notional Hours (@40 Credits x 30 NCH)

30 Notional Credit Hours		
Lecture/Tutorial	**Practicum**	**Experiential Learning**
1 Credit = 15 -22 Lecture Hours	10-15 Practicum Hours	0-8 Experiential Learning Hours

1.3.2. Course of Study:

Course of study indicate pursuance of study in a particular discipline/programme. Discipline/Programmes shall offer Major Courses (Core), Minor Courses, Skill Enhancement Courses (SEC), Value Added Courses (VAC), Ability Enhancement Compulsory Courses (AECCs) and Interdisciplinary courses.

1.3.3. Disciplinary Major:

The major would provide the opportunity for a student to pursue in-depth study of a particular subject or discipline. Students may be allowed to change major within the broad discipline at the end of the second semester by giving her/him sufficient time to explore interdisciplinary courses during the first year. Advanced-level disciplinary/interdisciplinary courses, a course in research methodology, and a project/dissertation will be conducted in the seventh semester. The final semester will be devoted to seminar presentation, preparation, and submission of project report/dissertation. The project work/dissertation will be on a topic in the disciplinary programme of study or an interdisciplinary topic.

1.3.4. Disciplinary/interdisciplinary minors:

Students will have the option to choose courses from disciplinary/interdisciplinary minors and skill-based courses. Students who take a sufficient number of courses in a discipline or an interdisciplinary area of study other than the chosen major will qualify for a minor in that discipline or in the chosen interdisciplinary area of study. A student may declare the choice of the minor at the end of the second semester, after exploring various courses.

1.3.5. Courses from Other Disciplines (Interdisciplinary):

All UG students are required to undergo 3 introductory-level courses relating to any of the broad disciplines given below. These courses are intended to broaden the intellectual experience and form part of liberal arts and science education. Students are not allowed to choose or repeat courses already undergone at the higher secondary level (12th class) in the proposed major and minor stream under this category.

i. ***Natural and Physical Sciences:*** Students can choose basic courses from disciplines such as Natural Science, for example, Biology, Botany, Zoology, Biotechnology, Biochemistry, Chemistry, Physics, Biophysics, Astronomy and Astrophysics, Earth and Environmental Sciences, etc.

ii. ***Mathematics, Statistics, and Computer Applications:*** Courses under this category will facilitate the students to use and apply tools and techniques in their major and minor disciplines. The course may include training in programming software like Python among others and applications software like STATA, SPSS, Tally, etc. Basic courses under this category will be helpful for science and social science in data analysis and the application of quantitative tools.

iii. ***Library, Information, and Media Sciences:*** Courses from this category will help the students to understand the recent developments in information and media science (journalism, mass media, and communication)

iv. ***Commerce and Management:*** Courses include business management, accountancy, finance, financial institutions, fintech, etc.,

v. ***Humanities and Social Sciences:*** The courses relating to Social Sciences, for example, Anthropology, Communication and Media, Economics, History, Linguistics, Political Science, Psychology, Social Work, Sociology, etc. will enable students to understand the individuals and their social behaviour, society, and nation. Students be introduced to survey methodology and available large-scale databases for India. The courses under humanities include, for example, Archaeology, History, Comparative Literature, Arts & Creative expressions, Creative Writing and Literature, language(s), Philosophy, etc., and interdisciplinary courses relating to humanities. The list of Courses can include interdisciplinary subjects such as Cognitive Science, Environmental Science, Gender Studies, Global Environment & Health, International Relations, Political Economy and Development, Sustainable Development, Women's, and Gender Studies, etc. will be useful to understand society.

1.3.6. Ability Enhancement Courses (AEC): Modern Indian Language (MIL) & English language focused on language and communication skills. Students are required to achieve competency in a Modern Indian Language (MIL) and in the English language with special emphasis on language and communication skills. The courses aim at enabling the students to acquire and demonstrate the core linguistic skills, including critical reading and expository and academic writing skills, that help students articulate their arguments and present their thinking clearly and coherently and recognize the importance of language as a mediator of knowledge and identity. They would also enable students to acquaint themselves with the cultural and intellectual heritage of the chosen MIL and English language, as well as to provide a reflective understanding of the structure and complexity of the language/literature related to both the MIL and English language. The courses will also emphasize the development and enhancement of skills such as communication, and the ability to participate/conduct discussion and debate.

1.3.7. Skill Enhancement Course (SEC): These courses are aimed at imparting practical skills, hands-on training, soft skills, etc., to enhance the employability of students and should be related to Major Discipline. They will aim at providing hands-on training, competencies, proficiency, and skill to students. SEC course will be a basket course to provide skill-based instruction. For example, SEC of English Discipline may include Public Speaking, Translation & Editing and Content writing.

A student shall have the choice to choose from a list, a defined track of courses offered from 1st to 3rd semester.

1.3.8. Value-Added Courses (VAC):

- ***Understanding India:*** The course aims at enabling the students to acquire and demonstrate the knowledge and understanding of contemporary India with its historical perspective, the basic framework of the goals and policies of national development, and the constitutional obligations with special emphasis on constitutional values and fundamental rights and duties. The course would also focus on developing an understanding among student-teachers of the Indian knowledge systems, the

Indian education system, and the roles and obligations of teachers to the nation in general and to the school/community/society. The course will attempt to deepen knowledge about and understanding of India's freedom struggle and of the values and ideals that it represented to develop an appreciation of the contributions made by people of all sections and regions of the country, and help learners understand and cherish the values enshrined in the Indian Constitution and to prepare them for their roles and responsibilities as effective citizens of a democratic society.

- ***Environmental science/education:*** The course seeks to equip students with the ability to apply the acquired knowledge, skills, attitudes, and values required to take appropriate actions for mitigating the effects of environmental degradation, climate change, and pollution, effective waste management, conservation of biological diversity, management of biological resources, forest and wildlife conservation, and sustainable development and living. The course will also deepen the knowledge and understanding of India's environment in its totality, its interactive processes, and its effects on the future quality of people's lives.

- ***Digital and technological solutions:*** Courses in cutting-edge areas that are fast gaining prominences, such as Artificial Intelligence (AI), 3-D machining, big data analysis, machine learning, drone technologies, and Deep learning with important applications to health, environment, and sustainable living that will be woven into undergraduate education for enhancing the employability of the youth.

- ***Health & Wellness, Yoga education, sports, and fitness:*** Course components relating to health and wellness seek to promote an optimal state of physical, emotional, intellectual, social, spiritual, and environmental well-being of a person. Sports and fitness activities will be organized outside the regular institutional working hours. Yoga education would focus on preparing the students physically and mentally for the integration of their physical, mental, and spiritual faculties, and equipping them with basic knowledge about one's personality, maintaining self-discipline and self-control, to learn to handle oneself well in all life situations. The focus of sports and fitness components of the courses will be on the improvement of physical fitness including the improvement of various components of physical and skills-related fitness like strength, speed, coordination, endurance, and flexibility; acquisition of sports skills including motor skills as well as basic movement skills relevant to a particular sport; improvement of tactical abilities; and improvement of mental abilities.

These are a common pool of courses offered by different disciplines and aimed towards embedding ethical, cultural and constitutional values; promote critical thinking. Indian knowledge systems; scientific temperament of students.

1.3.9. Summer Internship /Apprenticeship:

The intention is induction into actual work situations**.** All students must undergo internships / Apprenticeships in a firm, industry, or organization or Training in labs with faculty and researchers in their own or other HEIs/research institutions during the ***summer term***. Students should take up opportunities for internships with local industry, business organizations, health and allied areas, local governments (such as panchayats, municipalities), Parliament or elected representatives, media organizations, artists, crafts persons, and a wide variety of organizations so that students may actively engage with the practical side of their learning and, as a by-product, further improve their employability. Students who wish to exit after the first two semesters will undergo a 4-credit work-based learning/internship during the summer term to get a UG Certificate.

1.3.9.1. Community engagement and service: The curricular component of 'community engagement and service' seeks to expose students to the socio-economic issues in society so that the theoretical learnings can be supplemented by actual life experiences to generate solutions to real-life problems. This can be part of summer term activity or part of a major or minor course depending upon the major discipline.

1.3.9.2. Field-based learning/minor project: The field-based learning/minor project will attempt to provide opportunities for students to understand the different socio-economic contexts. It will aim at giving students exposure to development-related issues in rural and urban settings. It will provide opportunities for students to observe situations in rural and urban contexts, and to observe and study actual field situations regarding issues related to socioeconomic development. Students will be given opportunities to gain a first-hand understanding of the policies, regulations, organizational structures, processes, and programmes that guide the development process. They would have the opportunity to gain an understanding of the complex socio-economic problems in the community, and innovative practices required to generate solutions to the identified problems. This may be a summer term project or part of a major or minor course depending on the subject of study.

1.3.10. Indian Knowledge System:

In view of the importance accorded in the NEP 2020 to rooting our curricula and pedagogy in the Indian context all the students who are enrolled in the four-year UG programmes should be encouraged to take an adequate number of courses in IKS so that the ***total credits of the courses taken in IKS amount to at least five per cent of the total mandated credits*** *(i.e. min. 8 credits for a 4 yr. UGP & 6 credits for a 3 yr. UGP)***.** The students may be encouraged to take these courses, preferably *during the first four semesters of the UG programme*. At least half of these mandated credits should be in courses in disciplines which are part of IKS and are related to the major field of specialization that the student is pursuing in the UG programme. They will be included as a part of the total mandated credits that the student is expected to take in the major field of specialization. The rest of the mandated credits in IKS can be included as a part of the mandated Multidisciplinary courses that are to be taken by every student. All the students should take a Foundational Course in Indian Knowledge System, which is designed to present an overall introduction to all the streams of IKS relevant to the UG programme. The foundational IKS course should be broad-based and cover introductory material on all aspects.

Wherever possible, the students may be encouraged to choose a suitable topic related to IKS for their project work in the 7/8th semesters of the UG programme.

1.3.11. Experiential Learning:

One of the most unique, practical & beneficial features of the National Credit Framework is assignment of credits/credit points/ weightage to the experiential learning including relevant experience and professional levels acquired/ proficiency/ professional levels of a learner/student. Experiential learning is of two types:

i. ***Experiential learning as part of the curricular structure***of academic or vocational program. E.g., projects/OJT/internship/industrial attachments etc. This could be either within the Program- internship/ summer project undertaken relevant to the program being studied or as a part time employment (not relevant to the program being studied- up to certain NSQF level only). In case where experiential learning is a part of the curricular structure the credits would be calculated and assigned as per basic principles of NCrF i.e., 40 credits for 1200 hours of notional learning.

ii. ***Experiential learning as active employment*** (both wage and self) post completion of an academic or vocational program. This means that the experience attained by a person after undergoing a particular educational program shall be considered for assignment of credits. This could be either Full or Part time employment after undertaking an academic/ Vocation program.

In case where experiential learning is as a part of employment the learner would earn credits as weightage. The maximum credit points earned in this case shall be double of the credit points earned with respect to the qualification/ course completed. The credit earned and assigned by virtue of relevant experience would enable learners to progress in their career through the work hours put in during a job/employment.

2. Approachto CurriculumPlanning:

Thefundamentalpremiseunderlyingthelearningoutcomes-basedapproachtocurriculumplanninganddevelopmentisthathighereducationqualificationssuchasaBachelor'sDegree(Hons)programmesareearnedandawardedonthebasisof(a)demonstratedachievement of outcomes (expressed in terms of knowledge, understanding, skills, attitudes andvalues)and(b)academic standardsexpected ofgraduatesofa programme ofstudy.

The expected learning outcomes are used as reference points that would help formulategraduate attributes, qualification descriptors, programme learning outcomes and course learningoutcomes which in turn will help in curriculum planning and development, and in the design,delivery,andreviewofacademicprogrammes.

Learningoutcomes-basedframeworksinanysubjectmustspecifywhatgraduatescompleting a particular programme of study are (a) expected to know, (b) understand and (c) beable to do at the end of their programme of study. To this extent, LOCF in Economics iscommittedtoallowingforflexibilityandinnovationin(i) programmedesignandsyllabidevelopmentbyhighereducationinstitutions(HEIs),(ii)teaching-learningprocess,(iii) assessment of student learning levels, and (iv) periodic programme review within institutionalparametersaswellasLOCFguidelines,(v)generatingframework(s)ofagreedexpectedgraduateattributes,qualificationdescriptors,programmelearningoutcomesandcourselearningoutcomes.

ThekeyoutcomesthatunderpincurriculumplanninganddevelopmentattheundergraduatelevelincludeGraduateAttributes,QualificationDescriptors,ProgrammeLearningOutcomes,andCourseLearningOutcomes.

The LOCF for undergraduate education is based on specific learning outcomes andacademic standards expected to be attained by graduates of a programme of study. However, anoutcome-basedapproachidentifiesmoveswayfromtheemphasisonwhatistobetaughttofocusonwhatislearntbywayofdemonstrableoutcomes.Thisapproachprovidesgreaterflexibilitytothe teachers to develop—and the students to accept and adopt—different learning and teachingpedagogyinaninteractiveandparticipatoryecosystem.Theideaistointegratesocialneedsandteaching practices in a manner that is responsive to the need of the community. HEIs, on theirturn, shalladdress to thesituations of their students byidentifying relevantand commonoutcomesandbydevelopingsuchoutcomesthatnotonlymatchthespecificneedsofthestudentsbut alsoexpands theiroutlookandvalues.

3. Award of Degree

The structure and duration of undergraduate programmes of study offered by the University as per NEP 2020 include:

3.1. Undergraduate programmes of either 3 or 4-year duration with Single Major, with multiple entry and exit options, with appropriate certifications:

3.1.1. UG Certificate: Students who opt to exit after completion of the first year and have secured 40 credits will be awarded a UG certificate if, in addition, they complete one vocational course of 4 credits during the summer vacation of the first year. These students are allowed to re-enter the degree programme within three years and complete the degree programme within the stipulated maximum period of seven years.

3.1.2. UG Diploma: Students who opt to exit after completion of the second year and have secured 80 credits will be awarded the UG diploma if, in addition, they complete one vocational course of 4 credits during the summer vacation of the second year. These students are allowed to re-enter within a period of three years and complete the degree programme within the maximum period of seven years.

3.1.3. 3-year UG Degree: Students who will undergo a 3-year UG programme will be awarded UG Degree in the Major discipline after successful completion of three years, securing 120 credits and satisfying the minimum credit requirement.

3.1.4. 4-year UG Degree (Honours): A four-year UG Honours degree in the major discipline will be awarded to those who complete a four-year degree programme with 160 credits and have satisfied the credit requirements as given in Table 6 in Section 5.

3.1.5. 4-year UG Degree (Honours with Research): Students who secure 75% marks and above in the first six semesters and wish to undertake research at the undergraduate level can choose a research stream in the fourth year. They should do a research project or dissertation under the guidance of a Faculty Member of the University. The research project/dissertation will be in the major discipline. The students who secure 160 credits, including 12 credits from a research project/dissertation, will be awarded UG Degree (Honours with Research).

(Note: ***UG Degree Programmes with Single Major:*** A student must secure a minimum of 50% credits from the major discipline for the 3-year/4-year UG degree to be awarded a single major. For example, in a 3-year UG programme, if the total number of credits to be earned is 120, a student of Mathematics with a minimum of 60 credits will be awarded a B.Sc. in Mathematics with a single major. Similarly, in a 4-year UG programme, if the total number of credits to be earned is 160, a student of Chemistry with a minimum of 80 credits will be awarded a B.Sc. (Hons./Hon. With Research) in Chemistry in a 4-year UG programme with single major. Also the **4-year Bachelor's degree programme with Single Major** is considered as the preferred option since it would allow the opportunity to experience the full range of holistic and multidisciplinary education in addition to a focus on the chosen major and minors as per the choices of the student.)

Table: 1. Award of Degree and Credit Structure with ME-ME

Award	Year	Credits to	Additiona	Re-entry allowed	Years to

		earn	l Credits	within (yrs)	Complete
UG Certificate	1	40	4	3	7
UG Diploma	2	80	4	3	7
3-year UG Degree (Major)	3	120	x	x	x
4-year UG Degree (Major)	4	160	x	x	x
4-year UG Degree (Honors with Research)	4	160	Students who secure cumulative 75% marks and above in the first six semesters		

4. Graduate Attributes

The Learning Outcomes Descriptors and Graduate Attributes

Sl. No.	GraduateAttribute	**TheLearningOutcomesDescriptors** ***(Thegraduatesshouldbeabletodemonstratethecapabilityto:)***
GA1	Disciplinary Knowledge	acquireknowledgeandcoherentunderstanding ofthechosendisciplinary/interdisciplinaryareasofstudy.
GA2	Complex problemsolving	solvedifferentkindsofproblemsinfamiliarandnon-familiarcontextsandapplythelearningto real-lifesituations.
GA3	Analytical&Critical thinking	apply analytical thought including the analysisand evaluation of policies, and practices. Able toidentify relevant assumptions or implications.Identifylogicalflawsandholesintheargumentsof others. Analyse and synthesize data from avarietyofsources anddraw validconclusions andsupportthemwithevidenceandexamples.
GA4	Creativity	create, perform, or think in different and diverseways about the same objects or scenarios anddeal with problems and situations that do nothave simple solutions. Think ‘out of the box’ andgenerate solutions to complex problems inunfamiliarcontexts byadoptinginnovative, imaginative,lateralthinking,interpersonalskills,and emotionalintelligence.
GA5	Communication Skills	listen carefully, read texts and research papersanalytically,andpresentcomplex informationina clear and concise manner to differentgroups/audiences. Express thoughts and ideaseffectivelyinwritingandorallyandcommunicate withothersusingappropriatemedia.
GA6	Research-relatedskills	developakeensenseofobservation,inquiry,andcapability for asking relevant/ appropriatequestions. Should acquire the ability toproblematize, synthesize and articulate issuesand design research proposals, define problems,formulate appropriate and relevant researchquestions,formulatehypotheses,testhypothesesusing quantitative and qualitative data, establishhypotheses, make inferences based on theanalysis and interpretation of data, and predictcause-and-effect relationships. Should developthe ability to acquire the understanding of basicresearch ethicsandskillsinpracticing/doing ethicsinthefield/inpersonalresearchwork.

GA7	Collaboration	work effectively and respectfully with diverseteams intheinterestsofacommoncauseand workefficientlyas amemberofateam.
GA8	Leadershipreadiness/qualities	plan the tasks of a team or an organization andsettingdirectionbyformulating aninspiring vision and building a team that can help achievethevision.
GA9	Digitaland technological skills	useICT inavarietyoflearning andwork situations. Access, evaluate, and use a variety of relevant information sources and use appropriate software for analysis of data.
GA10	Environmental awareness andaction	mitigatetheeffectsofenvironmentaldegradation, climate change, and pollution.Should develop the technique of effective wastemanagement,conservationofbiologicaldiversity,management of biological resources andbiodiversity,forestandwildlifeconservation,and sustainabledevelopmentandliving.

5. Programme Learning Outcomes (PLO)

The outcomes described through learning outcome descriptors in Table 6 are attained by students through learning acquired on the completion of a programme of study relating to the chosen fields of learning, work/vocation, or an area of professional practice. The term 'programme' refers to the entire scheme of study followed by learners leading to a qualification. Individual programmes of study will have defined learning outcomes that must be attained for the award of a specific certificate/diploma/degree.

PLO-1: Knowledge of Psychology

- A systematic or coherent understanding of the academic field of Psychology, its different learning areas and applications, and its linkages with related disciplinary areas/subjects;
- Procedural knowledge that creates different types of professionals in various areas like research and development, teaching and government and public service;
- Skills in areas related to specialization area relating to the subfields and current developments in the academic field of Psychology.

PLO2: Develop Problem Solving Skills:

Capacity to use the earned knowledge to solve different non-familiar problems and apply the learning to real world situations.

PLO3: Develop Analytical &Critical Thinking skills:

a. Ability to employ analytic thought to a body of knowledge and evaluate evidence, arguments, claims, beliefs on the basis of empirical evidence.

b. Ability to inculcate inductive and deductive reasoning; to comprehend the basic structure and interrelationship; to deduct inferences of various concept of psychology.

PLO4: Develop Skills to Create:

Ability to create or think in different and diverse ways to deal with problems that do not have simple solutions.

PLO5: Develop Effective Communications skills:

Capability to express various concepts of Psychology in effectively in writing and speaking.

PLO6: Develop Research-related skills:

Potentiality to think and inquire about relevant/appropriate questions, ability to define problems, formulate and test hypotheses, formulate mathematical arguments and proofs, draw conclusions; ability to write the obtained results clearly.

PLO7: Develop Skills for Teamwork:

Ability of working effectively in diverse teams in both classroom and field-based situations.

PLO8: Develop Leadership qualities

The ability to articulate, motivate oneself, inspire others, organize and plan well, have a sense of abundant positivity that energizes everyone around them, having a clear sense of purpose, self-awareness and adaptability.

PLO9: Develop Information Literacy/ Digital literacy:

Ability to use computers in a variety of learning situations, demonstrate ability to access, evaluate, and use a variety of relevant information sources and use appropriate software for analysis of data.

PLO10: Develop Environmental awareness and ability to address the issue:

Ability to understand their roles and identities as citizens, consumers and environmental actors in a complex, interconnected world.

6. Programme Specific Outcomes

PSO 1: Moral and ethical awareness and reasoning involving objective and unbiased work attitude, avoiding unethical behaviours such as data fabrication and plagiarism, observing code of conduct, respecting intellectual property rights and being aware of the implications and ethical concerns of research studies.

PSO 2: Commitment to health and wellbeing at different levels (e.g. individual, organization, community, society).

PSO 3: Developing positive attributes such as empathy, compassion, social participation, and accountability.

PSO 4: Appreciating and tolerating different perspectives.

7. TeachingLearningProcess

Teaching and learning in this programme involve classroom lectures as well tutorials.Itallows-

- Thetutorialsallowacloserinteractionbetweenthestudentsandtheteacheraseachstudentgets individualattention.
- Writtenassignmentsandprojectssubmittedbystudents
- theproject-basedlearning
- Groupdiscussion
- Homeassignments
- Quizzesandclasstests
- PPTpresentations,Seminars,interactivesessions

- Co-curricular activityetc.
- IndustrialTour or Fieldvisit

8. AssessmentMethods

- The Programme structures and examinations shall normally be based on Semester System. However, the Academic Council may approve Trimester/Annual System for specified programmes.
- In addition to end term examinations, student shall be evaluated for his/her academic performance in a Programme through, presentations, analysis, homework assignments, term papers, projects, field work, seminars, quizzes, class tests or any other mode as may be prescribed in the syllabi. The basic structure of each Programme shall be prescribed by the Board of Studies and approved by the Academic Council.
- Each Programme shall have a number of credits assigned to it depending upon the academic load of the Programme which shall be assessed on the basis of weekly contact hours of lecture, tutorial and laboratory classes, self-study. The credits for the project and the dissertation shall be based on the quantum of work expected.
- Depending upon the nature of the programme, the components of internal assessment may vary. However, the following suggestive table indicates the distribution of marks for various components in a semester: -

	Component of evaluation	**Marks**	**Frequency**	**Code**	**Weightage (%)**
A	**Continuous evaluation**				
	Analysis/Class test	Combination of any three from (i) to (v) with 5 marks each	1-3	C	
	Home Assignment		1-3	H	
	Project		1	P	
	Seminar		1-2	S	
	Viva-Voce/Presentation		1-2	V	
	MSE	MSE shall be of 10 marks	1-3	Q/CT	
	Attendance	Attendance shall be of 5 marks	100%	A	5%
	Semester end examination		1	SEE	70%
					100%

9. Programme Structure

Table 2. Semester wise and component wise distribution of credit (Four Year UGP - Single Major)

Year	Semester	Component	Cousecode	Number of Courses	Credit per Course	Total credit in the component
First Year	I	Major(Core)	M-101,M-102	2	3	6

Note: As mentioned in the Guidelines for incorporating IKS in Higher Education Curricula, we need to offer 5% of the total credits to IKS (i.e., min. 8 credits). Of the total 8 credits, 50% should be offered as a part of Major Discipline (i.e., 4 credits) and rest as Interdisciplinary/ Multidisciplinary courses within first 4 semesters. Thereby we may offer IKS-1 and IKS -2 in the 1st and 2nd semesters (Credit – 3 x 2 = 6) as Interdisciplinary courses and 1 course as a part of Major Courses in 4th Semester (Credit - 4) thereby totalling to 10 credits.

Detailed Syllabus of B.A. Psychology

SYLLABUS (1st SEMESTER)

Subject Name: Introduction to Psychology I	**Subject Code: PSY062M101**
Level of Course: 100	**L-T-P-C: 3-0-0-3**
Credit Units: 3	**Scheme of Evaluation: T**

Objective: The objective of **Introduction to Psychology I** is to introduce students to the basic concepts of the field of psychology with an emphasis on applications of psychology in everyday life.

Course Outcomes:

After successful completion of the course, student will be able to		
CO	**Course Outcome**	**Bloom's Taxonomy Level**
CO1	**Define** the key concepts and theories in Psychology.	BT1
CO2	**Understand** the fundamental processes underlying human behavior such as sensation, perception, memory, motivation, emotion, individual differences.	BT2
CO3	**Apply** the principles of psychology in day-to-day life for a better understanding of themselves and others	BT3
CO4	**Analyze**the concept of individual differences in examining human mental processes	BT4

Detailed Syllabus

Modules	**Topics / Course content**	**Hours**
I.	**Introduction** Definition and goals of Psychology, Role of a Psychologist in society, Scientific Method, Historical Development, Schools of Psychology, and Current Status	**15**
II.	**Perception** Attention & Perception - Nature, Processing of information, Selective and Divided Attention, Perceptual processes: laws of perceptual organizations, depth perception, constancies, factors affecting perception &Application.	**15**
III.	**Memory and Forgetting** Learning – Conditioning, Cognitive Learning, Observation learning, Verbal learning. Memory – Stages and Models, Theories of forgetting and improving memory.	**15**
IV.	**Motivation & Emotion** Understanding motivation and emotion, Types of Motives, Theories of motivation, Functions of Emotions; Theories of emotions, Bodily changes and Emotions; Culture & emotions.	**15**
	TOTAL	60

Lecture/Tutorial	Practicum	Experiential learning
60 hrs	-	30 hrs

SYLLABUS (1st SEMESTER)

Subject Name: Developmental Psychology I	**Subject Code: PSY062M102**
Level of Course: 100	**L-T-P-C: 3-0-0-3**
Credit Units: 3	**Scheme of Evaluation: T**

Objective: The objective of **Developmental Psychology** is to understand the basic nature concept of social psychology.

Course Outcomes:

After successful completion of the course, student will be able to

CO	Course Outcome	Bloom's Taxonomy Level
CO1	**Define** the concepts of growth and development	BT1
CO2	**Understand** the Physical, Cognitive and Language development	BT2
CO3	**Apply** the principles of psychology in human development	BT3
CO4	**Differentiate** the psychological needs of each stage of development.	BT4

Detailed Syllabus

Modules	Topics / Course content	Hours
I.	**GROWTH AND DEVELOPMENT**: Nature and characteristics, maturation, comparison between development and growth, relationship between development and maturation, factors influencing attitudes toward developmental change, factors influencing developmental task, stages of development, theories, basic methods of studying human Development,	**15**
II.	**PRE-NATAL DEVELOPMENT** **a) Conception** - Stages in prenatal development - Germinal stage, Embryonic stage and Fetal stage. **b) Prenatal Environmental Influences -** Teratogens, Prescription and Nonprescription, Drugs-illegal drugs, Tobacco, Alcohol, Radiation, Environmental Pollution, Maternal, Disease and other Maternal Factors. **c) Child birth** – Stages of child birth **d) New Born Assessment –** APGAR scale, Brazelton Neonatal Behavioural Assessment Scale. **e) Chromosomal and Gene linked abnormalities** – Chromosomal	**15**

	abnormalities - Down Syndrome; Abnormalities of the sex chromosomes - Kleinfelters, Fragile x, Turner's, XXX, XYY; Gene linked abnormalities - PKU, Sickle Cell Anaemia, Tay Sachs Disease. **f) Genetic Counselling, Postpartum period:** Physical, Emotional, Psychological and bonding	
III.	**PHYSICAL, COGNITIVE AND LANGUAGE DEVELOPMENT** **a) MOTOR DEVELOPMENT**: Reflexes – Some new born reflexes; Sleeping, Crying. **Motor development in infancy** – meaning; sequence of motor development – Gross motor development; fine motor development. **b) PERCEPTUAL DEVELOPMENT -** Touch, Taste and Smell, Hearing, Vision. **COGNITIVE DEVELOPMENT -** Piaget's theory of cognitive development. Vygotsky's Theory of cognitive Development- Zone of Proximal Development and Scaffolding. **d) LANGUAGE DEVELOPMENT** – components of language development; Pre-linguistic development – receptivity to language, first speech sounds. Phonological development; Semantic development; Grammatical Development, Pragmatic development; Bilingualism.	**15**
IV.	**EMOTIONAL , SOCIAL AND MORAL DEVELOPMENT** **a) EMOTIONAL DEVELOPMENT -** Development of emotional expression- Basic Emotions, Self-Conscious Emotions, Emotional self-Regulation, Acquiring Emotional Display Rules, Understanding and Responding to Emotions of Others - Social Referencing, Empathy and Sympathy. **b) SOCIAL DEVELOPMENT -** Social Orientation, Development of attachment, security of attachment. Cultural Influences. Development of Self Awareness and Understanding Self. **c) MORAL DEVELOPMENT -** Kohlberg's theory of Moral development.	**15**

SYLLABUS (3rd SEMESTER) Minor

Subject Name: Psychology of abnormal Behaviour I	**Subject Code: PSY062N301**
Level of Course: 200	**L-T-P-C: 4-0-0-4**
Credit Units: 4	**Scheme of Evaluation: T**

Objective: The objective of **Psychology of abnormal Behaviour I**is to introduce students the aspects of psychopathology.

Course Outcomes:

After successful completion of the course, student will be able to

CO	Course Outcome	Bloom's Taxonomy Level
CO1	**Define** abnormal behaviour	BT1
CO2	**Understand** different types of psychological disorders	BT2
CO3	**Apply** different types of treatment to deal with the disorders	BT3
CO4	**Analyse** the different types of treatment methods specific to the disorder	BT4

Detailed Syllabus

Modules	Topics / Course content	Hours
I.	**Introduction and Theoretical Perspective** Defining Abnormal Behaviour, Criteria of Abnormal Behaviour, Brief Mention of DSM and IC D classification systems, Causes of Abnormal Behaviour Necessary, Predisposing, Precipitating and ReinforcingCauses.	**15**
II.	**Mood disorders and Suicide** Unipolar Mood Disorders, Bipolar Mood Disorders,Suicide: Classification, Frequency, Causes, Treatment. Identification andPrevention	**15**
III.	**Anxiety disorder** Panic Disorder, Generalized Anxiety Disorder, Phobic Disorder andObsessive Compulsive Disorder with Causal Factors.	**15**
IV.	**Personality disorders** Introduction Clinical Features and Brief Descriptions of Cluster A, B, and CPersonality Disorders with Psychosocial Causal Factors	**15**
	TOTAL	**60**

Lecture/Tutorial	Practicum	Experiential learning

60 hrs	-	30 hrs

Textbook:

SYLLABUS (3rd SEMESTER) SEC II

Subject Name: Psychological Practical	**Subject Code: PSY062S3111**
Level of Course: 200	**L-T-P-C: 0-0-0-6**
Credit Units: 3	**Scheme of Evaluation: P**

Objective: The objective of **Psychological Practical**is to familiarize students with the application of different psychological test.

Course Outcomes:

After successful completion of the course, student will be able to		
CO	**Course Outcome**	**Bloom's Taxonomy Level**
CO1	**Recall** the importance of psychological testing.	BT1
CO2	**Understand** the procedure of conducting various psychological test	BT2
CO3	**Application** of specific psychological test in different setting	BT3
CO4	**Analyze** the findings of various psychological testings	BT4

Detailed Syllabus

Modules	**Topics / Course content**	**Hours**
I.	**Intelligence test** (will be selected from the tools available in the psychological lab)	**5**
II.	**Personality Test (**will be selected from the tools available in the psychological lab)	**10**
III.	**Aptitude Test** (will be selected from the tools available in the psychological lab)	**5**

IV.	**Clinical Assessment** Anxiety assessment, Depression assessment, memory	**5**
	TOTAL	**25**

Lecture/Tutorial	Practicum	Experiential learning
60 hrs	-	30 hrs

Textbook:

SYLLABUS (4th SEMESTER)

Subject Name: Abnormal Psychology II	**Subject Code: PSY062M401**
Level of Course: 200	**L-T-P-C: 4-0-0-4**
Credit Units: 4	**Scheme of Evaluation: T**

Objective: The objective of **Abnormal Psychology II** is to make the students understand various behavioural dysfunctions and use the same in day-to-day life

Course Outcomes:

After successful completion of the course, student will be able to

CO	Course Outcome	Bloom's Taxonomy Level
CO1	**Recall** different types of psychological disorder	BT1
CO2	**Understand** the criteria for psychological disorders	BT2
CO3	**Apply** different types of treatment to deal with the disorders	BT3
CO4	**Analyse** the different types of treatment methods specific to the disorder	BT4

Detailed Syllabus

Modules	Topics / Course content	Hours
I.	**Somatoform and Dissociative disorder** **Somatoform Disorders**: Somatization Disorder, Somatoform Pain disorder, and Conversion Disorder with Symptoms and Causal Factors. **Dissociative disorder**: Dissociative identity disorder, dissociative amnesia, depersonalization/ derealisation disorder.	**15**
II.	**Disorders of childhood and adolescence** Intellectual disability - Definition, Levels, Clinical Types and Causal Factors; Autism spectrum disorders, Learning Disorder, Attention-Deficit/Hyperactivity Disorder, Conduct disorder, Opposition defiant disorder	**15**
III.	**Psychotic disorders** Schizophrenia: types, symptoms, treatment and management ,delusion, other psychotic disorders; Clinical characteristics.	**15**
IV.	**Sexual and Gender Variants** Transgender, types The Paraphilia's and Gender Identity Disorders with Causal Factors,	**15**

	symptoms of sexual and gender identity disorder, treatment.	
	TOTAL	**60**

Lecture/Tutorial	Practicum	Experiential learning
60 hrs	-	30 hrs

Textbook:

SYLLABUS (4th SEMESTER)

Subject Name: Social Psychology	**Subject Code: PSY062M402**
Level of Course: 200	**L-T-P-C: 4-0-0-4**
Credit Units: 4	**Scheme of Evaluation: T**

Objective: The objective of **Social Psychology** is to understand the basic nature concept of social psychology.

Course Outcomes:

After successful completion of the course, student will be able to		
CO	**Course Outcome**	**Bloom's Taxonomy Level**
CO1	**Define** the key concepts and theories of Social Psychology.	BT1
CO2	**Understand** the social influences on Human Behaviour	BT2
CO3	**Apply** the principles of attributions and biases in day-to-day life	BT3
CO4	**Analyze**the role of cognition in Social Psychology.	BT4

Detailed Syllabus

Modules	**Topics / Course content**	**Hours**
I.	**Historical and conceptual issues in social psychology** Definition of social psychology; Growth of social psychology; alternative conceptions of social psychology, importance of social psychology	**15**
II.	**Social interaction** Social Perception and cognition; Theories of attribution; Biases and errors in attribution; Prejudice, Stereotypes and Discrimination	**15**
III.	**Social influences** Groups: Small groups and its functions; Social influence processes in groups. Altruism: Problems of definition; Influences of helping; Long-term helpfulness.	**15**
IV.	**Social issues** Environmental stresses and social behavior. Social psychological perspectives on health and illness. Marriage, divorce and Unemployment	**15**

		TOTAL	**60**

Lecture/Tutorial	Practicum	Experiential learning
60 hrs	-	30 hrs

Textbook:

SYLLABUS (4th SEMESTER)

Subject Name: Community Psychology	**Subject Code: PSY062M403**
Level of Course: 200	**L-T-P-C: 4-0-0-4**
Credit Units: 4	**Scheme of Evaluation: T**

Objective: The objective of **Community Psychology** is to to develop a community based orientation towards mental health.

Course Outcomes:

After successful completion of the course, student will be able to

CO	Course Outcome	Bloom's Taxonomy Level
CO1	**Define** the concept of community psychology.	BT1
CO2	**Understand** the importance of community research.	BT2
CO3	**Apply** the findings of community research to understand mental health issues	BT3
CO4	**Examine** the effectiveness of research in community psychology	BT4

Detailed Syllabus

Modules	Topics / Course content	Hours
I.	**Introduction to Community Psychology** Definition of community psychology, emergence and association to field of Psychology, core values; Historical and social contexts of community psychology: concept, evolution and nature of community psychology; Role of community psychologist.	**15**
II.	**Research in Community psychology** Aims of community research; Models of research in community Psychology; Methods of community research	**15**
III.	**Individuals within communities** Person in context; Understanding communities; Sense of community; Human diversity.	**15**
IV.	**Applying community research to individual issues** Understanding stress and coping in context: social support, mutual help groups; Preventing Problem behavior; Promoting Social competence.	**15**
	TOTAL	**60**

SYLLABUS (4th SEMESTER) Minor

Subject Name: Psychology of Positivity	**Subject Code: PSY062N402**
Level of Course: 200	**L-T-P-C: 3-0-0-3**
Credit Units: 3	**Scheme of Evaluation: T**

Objective: The objective of **Psychology of positivity** is to equip the students with the skill and competence to apply positive psychology principles in a range of environments to increase individual and collective wellbeing.

Course Outcomes:

After successful completion of the course, student will be able to

CO	Course Outcome	Bloom's Taxonomy Level
CO1	**Define** positive psychology, health psychology, development psychology and clinical psychology	BT1
CO2	**Understand** human strengths and virtues	BT2
CO3	**Apply** the principles of positive psychology in real life situation	BT3
CO4	**Examine** the importance of self control and personal goal	BT4

Detailed Syllabus

Modules	Topics / Course content	Hours
I.	**Introduction** Positive psychology: Definition; goals and assumptions; Relationship with health psychology, developmental psychology, clinical psychology Activities: Personal mini experiments; Collection of inspiring life stories (magazines, websites, films etc)	**15**
II.	**Positive emotions, Well-being and Happiness** Positive emotions: Broaden and build theory; Cultivating positive	**15**

	emotions; Happiness- hedonic and Eudaimonic; Well- being: negative vs positive functions; Subjective well- being: Emotional, social and psychological well-being; Models of positive mental health	
III.	**Positive States and Processes** Self-control: The value of self-control; Personal goals and self-regulation; Personal goal and well-being; goals that create self-regulation. (SWOT analysis) Resilience: Developmental and clinical perspectives; Sources of resilience in children; Sources of resilience in adulthood and later life; Optimism- How optimism works; variation of optimism and pessimism	**15**
IV.	**Applications of Positive Psychology** Positive schooling, Positive parenting, Components; Positive coping strategies; Gainful employment Mental health: Moving toward balanced conceptualization; Lack of a developmental perspectives. (An action plan for coping)	**15**
	TOTAL	**60**

Lecture/Tutorial	Practicum	Experiential learning
60 hrs	-	30 hrs

Textbook:

SYLLABUS (5th SEMESTER)

Subject Name: Bio-psychology	**Subject Code: PSY062M501**
Level of Course: 300	**L-T-P-C: 4-0-0-4**
Credit Units: 4	**Scheme of Evaluation: T**

Objective: The objective of **Bio-psychology** is to *to* familiarize students with an introductory knowledge of the topics and methods of biological psychology to create an understanding of the underlying biological foundations of human behaviour.

Course Outcomes:

After successful completion of the course, student will be able to		
CO	**Course Outcome**	**Bloom's Taxonomy Level**
CO1	**Recall** the biological basis of experience and behaviour	BT1
CO2	**Understand** the influence of behaviour, cognition, and the	BT2

	environment on bodily system	
CO3	**Apply** the biological foundations for behaviour regulation	BT3
CO4	**Analyses** the influence of biological foundation in behaviour regulation	BT4

Detailed Syllabus

Modules	Topics / Course content	Hours
I.	**Introduction** Roots**:** The origins and nature of biopsychology, basic cytology and biochemistry, Mind Brain relationship. **Methods of study of research in biopsychology:** anatomical methods, degeneration techniques, lesion techniques, stereotaxic surgery, Histological methods, Tracing neural connections, Studying the structure of the living human brain	**15**
II.	Neurons and neuronal conduction Structure of neurons, types, functions, neural conduction, communication between neurons, Synaptic conduction, Neurotransmitters	**15**
III.	**The Brain***:* Basic Features of Nervous System, Central Nervous System, Peripheral nervous system: Cranial Nerves, Autonomous nervous system; Major structures and functions, spinal cord, Brain: Fore brain, Mid brain, Hind brain, Cerebral cortex, temporal, parietal and occipital lobes; prefrontal cortex. Reflex behaviour, Reflex Model, Anatomy and Physiology of Reflex	**15**
IV.	Sensory and motor nervous systems , Endocrine System Anatomy of the Visual System, Analysis of visual information: Visual messages to the brain, Optic nerve conduction of stimulus. Audition – Auditory nervous system, auditory coding : Neuroendocrine system: Structure, functions and abnormalities of major glands: Thyroid, Adrenal, Gonads, Pituitary	**15**
	TOTAL	**60**

SYLLABUS (5th SEMESTER)

Subject Name: Statistics in Psychological Research I	**Subject Code: PSY062M502**
Level of Course: 300	**L-T-P-C: 4-0-0-4**
Credit Units: 4	**Scheme of Evaluation: T**

Objective: The objective of **Statistics in Psychological Research I** isto introduce students to the basic concepts of statistics with an emphasis on its application in psychological research.

Course Outcomes:

After successful completion of the course, student will be able to		
CO	**Course Outcome**	**Bloom's Taxonomy Level**
CO1	**Recall** the importance of Statistics in Psychological Research	BT1
CO2	**Describe** the various methods of statistics	BT2
CO3	**Application** of the principles of statistics in Social Sciences researches	BT3
CO4	**Analyze** raw data and draw logical conclusion	BT4

Detailed Syllabus

Modules	Topics / Course content	Hours
I.	**Introduction** Statistics in Psychological Research; Relevance of Statistics in Psychological Research; Descriptive and Inferential Statistics; Variables and Constants; Scales of Measurement, Frequency Distributions, Percentiles, and Percentile Ranks, Graphic Representation of Data	**15**
II.	**Measures of central tendency and dispersion** Measures of Central Tendency: The Mode; The Median; The Mean; Properties and Comparison of Measures of Central Tendency; Central Tendency Measures in Normal and Skewed Distributions Measures of Variability: The Range; The Semi-Interquartile Range; The Variance; The Standard Deviation; Properties and Comparison of Measures of Variability; Effects of Linear Transformations on Measures of Variability.	**15**
III.	**Normal Distribution** Standard (z) Scores: Standard Scores; Properties of z-scores; Transforming raw scores into z-scores, Determining a raw score from a z-score, Some Common Standard Scores, Comparison of z-scores and Percentile Ranks. The Normal Probability Distribution: Nature and Properties of the Normal Probability Distribution; Standard Scores and the Normal Curve; The Standard Normal Curve: Finding Areas when the Score is Known, Finding Scores when the Area is Known; The Normal Curve as a Model for Real Variables; The Normal Curve as a Model for Sampling Distributions; Divergence from Normality (Skewness and Kurtosis).	**15**
IV.	**Correlation** The Meaning of Correlation; The Scatterplot of Bivariate Distributions; Correlation: A Matter of Direction; Correlation: A Matter of Degree; The Coefficient of Correlation, Spearman's Rank-Order Correlation Coefficient; correlation and causation; cautions concerning correlation coefficients	**15**

	TOTAL	**60**

SYLLABUS (5th SEMESTER)

Subject Name: Health Psychology	**Subject Code: PSY062M503**
Level of Course: 300	**L-T-P-C: 4-0-0-4**
Credit Units: 4	**Scheme of Evaluation: T**

Objective: The objective of **Health Psychology** is to introduce the relationship between psychological factors and physical health and learn how to enhance well-being.

Course Outcomes:

After successful completion of the course, student will be able to		
CO	**Course Outcome**	**Bloom's Taxonomy Level**
CO1	**Define** the concept of health psychology	BT1
CO2	**Understand**the models and theories that are used to explain health risk and health-enhancing behaviours	BT2
CO3	**Apply** different types of health enhancing behaviours	BT3
CO4	**Analyze** the chronic illness and its management	BT4

Detailed Syllabus

Modules	Topics / Course content	Hours
I.	**Introduction** Definition; Mind-body relationship; Functions and need of health psychologists ; Bio- psychosocial model	**15**
II.	**Stress and Coping** Theories of stress (Selye and Lazarus) , Stress and health: Sources of Chronic Stress, Stress related illness(PTSD and Acute stress disorder, Digestive system disorders, Asthma, Recurrent Headaches) Psychoneuroimmunology ,Moderators of the stress experience , Coping with Stress	**15**
III.	**Pain and Chronic Illness** Pain: Psychological factors and pain, Individual differences in reactions to	**15**

	pain, Types of Pain, Assessment of Pain, Pain Control Techniques Cardiovascular diseases, Cancer, AIDS (12 Hours) Living with chronic illness, Quality of life, Emotional response to chronic illness, Rehabilitation, psychological interventions	
IV.	**Health and Behaviour** Health compromising behaviours: Smoking, Alcoholism and substance abuse Health enhancing behaviour: Weight control, Diet, Exercise, Yoga	**15**
	TOTAL	**60**

SYLLABUS (6th SEMESTER)

Subject Name: Counselling Psychology	**Subject Code: PSY062M602**
Level of Course: 300	**L-T-P-C: 4-0-0-4**
Credit Units: 4	**Scheme of Evaluation: T**

Objective: The objective of **Counselling Psychology** is to introduce the theoretical basis of counselling skills, interviewing techniques.

Course Outcomes:

After successful completion of the course, student will be able to		
CO	**Course Outcome**	**Bloom's Taxonomy Level**
CO1	**Define** counselling psychology	BT1
CO2	**Understand** the concepts and techniques of various approaches of therapies	BT2
CO3	**Apply** the knowledge of counselling in practice	BT3
CO4	**Analyse** ethics and professional issues in counselling	BT4

Detailed Syllabus

Modules	**Topics / Course content**	**Hours**
I.	**Introduction to Counselling psychology:** Definition: Aims and Allied Professions, A brief overview of scope of counselling and psychotherapy; Goals of counselling in various areas; Counselling psychotherapy, types of counselling.	**15**
	Approaches to Counselling Therapy: The humanistic approach person-	

II.	centered therapy): Historical Context, Carl Roger's Contribution, Key Concepts and Techniques in the Humanistic Approach, The Counsellor-Client Relationship, Application of the Humanistic Approach; Cognitive behaviour therapy: History Context of Cognitive Behavior Therapy; Gestalt therapy, Psychoanalytic therapy.	**15**
III.	**Counselling as a process:** Understanding counselling as a process- Outcome & process goals in counselling; Psychoanalysis: Introduction- Assumptions- acquisition- Maintenance- Practice. The counsellor as a Person- Personality characteristics, Self-awareness and Needs of the Counsellor Motivations of Becoming a Counsellor Role and Functions of a counsellor.	**15**
IV.	**Ethical and Legal Consideration:** Ethics and Professional Issues in Counselling, Definition of ethics, Ethics and Counselling, Professional codes of ethics and standards, the Development of Code of Ethics of Counsellors, Ethical counselling, legal concerns of counsellors, Conflicts within and among ethical codes, Ethical decision making, The Right of Informed Consent, Dimensions of Confidentiality, The Counselling Code of Ethics- Foundation- Purpose- Content- Violations- Considerations, Ethical Issues in Multi-Cultural counselling. Mental Health Care Act 2017	**15**
	TOTAL	**60**

Lecture/Tutorial	Practicum	Experiential learning

SYLLABUS (6th SEMESTER)

Subject Name: Statistics in Psychological Research II	**Subject Code: PSY062M603**
Level of Course: 300	**L-T-P-C: 4-0-0-4**
Credit Units: 4	**Scheme of Evaluation: T**

Objective: The objective of **Statistics in Psychological Research II** isto introduce students to the basic concepts of statistics to be applied in the field of psychology.

Course Outcomes:

After successful completion of the course, student will be able to

CO	Course Outcome	Bloom's Taxonomy Level
CO1	**Recall** the importance of Statistics in Psychological Research	BT1
CO2	**Describe** the various methods of statistics	BT2
CO3	**Application** of the principles of statistics in Social Sciences researches	BT3
CO4	**Analyze** raw data and draw logical conclusion	BT4

Detailed Syllabus

Modules	Topics / Course content	Hours
I.	**Introduction to Inferential Statistics and Hypothesis Testing:** The meaning of Statistical Inference and Hypothesis Testing;; Null and the Alternative Hypotheses; Choice of*HA*: One-Tailed and Two-Tailed Tests; Steps for Hypothesis Testing; The Statistical Decision regarding Retention and Rejection of Null Hypothesis	15
II.	**Hypothesis Testing About the Difference between Two Independent and Dependent (Correlated) Means** Determining a Formula for*t*; Degrees of Freedom for Tests of No Difference between Independent and Dependent Means; Testing a Hypothesis about Two Independent and Dependent Means; Assumptions When Testing a Hypothesis about the Difference between Two Independent and Dependent Means.	15
III.	**Hypothesis Testing for Differences among Three or More Groups: One-Way Analysis of Variance (ANOVA)** The Basis of One-Way Analysis of Variance: Assumptions Associated with ANOVA; Variation within and between Groups; Partition of the Sums of Squares; Degrees of Freedom; Variance Estimates and the *F* Ratio; The ANOVA Summary Table; Raw-Score Formulas for Analysis of Variance only; Comparison of *t* and *F*.	15
IV.	**Hypothesis Testing for Categorical Variables and Inference about Frequencies** The Chi-Square as a Measure of Discrepancy between Expected and Observed Frequencies; Logic of the Chi-Square Test; Assumptions of Chi-Square; Calculation of the Chi- Square Goodness-of-Fit-Test- One Way Classification; Chi Square for Two Classification Variables-Contingency Table Analysis; Interpretation of the Outcome of a Chi-Square Test. Nonparametric Approaches to Data: Introduction to Distribution-free	15

SYLLABUS (8th SEMESTER)

Subject Name: Qualitative Research Methods	**Subject Code: PSY062M801**
Level of Course: 400	**L-T-P-C: 4-0-0-4**
Credit Units: 4	**Scheme of Evaluation: T**

Objective: The objective of **Qualitative Research Methods** is to provide theoretical foundation on qualitative research methods in psychology.

Course Outcomes:

After successful completion of the course, student will be able to		
CO	**Course Outcome**	**Bloom's Taxonomy Level**
CO1	**Recall** the key concept of qualitative research	BT1
CO2	**Understand** the different types of qualitative research.	BT2
CO3	**Apply** the research methods in appropriate settings with reference to individual, groups and situation.	BT3
CO4	**Analyse** the data through qualitative data analysis techniques.	BT4

Detailed Syllabus

Modules	Topics / Course content	Hours
I.	**Foundations of qualitative research** Defining qualitative research; Historical development of qualitative research; Key philosophical and methodological issues in qualitative research; Different traditions of qualitative research: Grounded theory, Narrative approach, Ethnography, Action research	**15**
II.	**Qualitative research design** Conceptualizing research questions, Issues of paradigm; Designing samples; Theoretical sampling, contrasting qualitative with quantitative approach in research process; Issues of Credibility and trustworthiness	**15**
III.	**Methods of collecting qualitative data** What is qualitative data? Various methods of collecting qualitative data: participant observation, interviewing, focus groups, life history and oral history, documents, diaries, photographs, films and videos, conversation, texts and case studies	**15**
IV.	**Analysing qualitative data** Different traditions of qualitative data analysis; thematic analysis, Interpretative phenomenological analysis, Narrative analysis, Discourse analysis, Content analysis	**15**
	TOTAL	**60**
