				3/5		20

Section 6: Graduate Attributes & Learning Outcomes

6.1. Introduction:

As per the NHEQF, each student on completion of a program of study must possess and demonstrate the expected ***Graduate Attributes*** acquired through one or more modes of learning, including direct in-person or face-to-face instruction, online learning, and hybrid/blended modes. The graduate attributes indicate the quality and features or characteristics of the graduate of a program of study, including learning outcomes relating to the disciplinary area(s) relating to the chosen field(s) of learning and generic learning outcomes that are expected to be acquired by a graduate on completion of the program(s) of study.

The graduate profile/attributes must include,

- capabilities that help widen the current knowledge base and skills,
- gain and apply new knowledge and skills,
- undertake future studies independently, perform well in a chosen career, and
- play a constructive role as a responsible citizen in society.

The graduate profile/attributes are acquired incrementally through development of cognitive levels and describe a set of competencies that are transferable beyond the study of a particular subject/disciplinary area and program contexts in which they have been developed.

Graduate attributes include,

- ***learning outcomes that are specific to disciplinary areas*** relating to the chosen field(s) of learning within broad multidisciplinary/interdisciplinary/ transdisciplinary contexts.
- ***generic learning outcomes*** that graduate of all programs of study should acquire and demonstrate.

6.2. Graduate Attributes:

Table: 7: The Learning Outcomes Descriptors and Graduate Attributes

Sl. No.	Graduate Attribute	The Learning Outcomes Descriptors (The graduates should be able to demonstrate the capability to:)
GA1	Disciplinary Knowledge	acquire knowledge and coherent understanding of the chosen disciplinary/interdisciplinary areas of study.
GA 2	Complex problem solving	solve different kinds of problems in familiar and non-familiar contexts and apply the learning to real-life situations.
GA 3	Analytical & Critical thinking	apply analytical thought including the analysis and evaluation of policies, and practices. Able to identify relevant assumptions or implications. Identify logical flaws and holes in the arguments of others. Analyse and synthesize data from a variety of sources and draw valid conclusions and support them with evidence and examples.
GA 4	Creativity	create, perform, or think in different and diverse ways about the same objects or scenarios and deal with problems and situations that do not have simple solutions. Think 'out of the box' and generate solutions to complex problems in unfamiliar contexts by adopting innovative, imaginative, lateral thinking, interpersonal skills, and emotional intelligence.
GA 5	Communication Skills	listen carefully, read texts and research papers analytically, and present complex information in a clear and concise manner to different groups/audiences. Express thoughts and ideas effectively in writing and orally and communicate with others using appropriate media.
GA 6	Research-related skills	develop a keen sense of observation, inquiry, and capability for asking relevant/ appropriate questions. Should acquire the ability to problematize, synthesize and articulate issues and design research proposals, define problems, formulate appropriate and relevant research questions, formulate hypotheses, test hypotheses using quantitative and qualitative data, establish hypotheses, make inferences based on the analysis and interpretation of data, and predict cause-and-effect relationships. Should develop the ability to acquire the understanding of basic research ethics and skills in practicing/doing ethics in the field/ in personal research work.
GA 7	Collaboration	work effectively and respectfully with diverse teams in the interests of a common cause and work efficiently as a member of a team.
GA 8	Leadership readiness/qualities	plan the tasks of a team or an organization and setting direction by formulating an inspiring vision and building a team that can help achieve the vision.

GA 9	Digital and technological skills	use ICT in a variety of learning and work situations. Access, evaluate, and use a variety of relevant information sources and use appropriate software for analysis of data.
GA 10	Environmental awareness and action	mitigate the effects of environmental degradation, climate change, and pollution. Should develop the technique of effective waste management, conservation of biological diversity, management of biological resources and biodiversity, forest and wildlife conservation, and sustainable development and living.

6.3. Program Learning Outcomes (PLO)

The outcomes described through learning outcome descriptors in Table 6 are attained by students through learning acquired on the completion of a program of study relating to the chosen fields of learning, work/vocation, or an area of professional practice. The term ‘program’ refers to the entire scheme of study followed by learners leading to a qualification. Individual programs of study will have defined learning outcomes that must be attained for the award of a specific certificate/diploma/degree.

The Departments and Schools of the University are responsible for ensuring that individual program learning outcomes align with the relevant graduate attributes. Programme learning outcomes (PLOs) include outcomes that are specific to disciplinary areas of learning associated with the chosen field (s) of learning.

The program learning outcomes would also focus on knowledge and skills that prepare students for further study, employment, and responsible citizenship. The following are the program outcomes for Bachelor of Business Administration students.

PO1: Disciplinary knowledge of Business Administration: Demonstrate extensive and coherent knowledge of management and its applications in the real business world.

PO2: Complex problem solving: Assess and provide solutions to the difficult/unsolved business problems in rapidly changing environment, inculcating entrepreneurial skills.

PO3: Analytical & Critical thinking: Analyse the business situations from different perspectives and critically assess the situation for optimal results.

PO4: Creativity: acquire innovative managerial skills and develop a creative approach toward solving real life entrepreneurial and business problems.

PO5: Communication Skills: Acquire various soft skills (like business communication, public speaking etc.) and leadership skills required to manage complete business situations as well as life situations.

PO6: Research-related skills: Perform investigations by defining business problems,

collecting data and analyzing to gain insights for decision making.

PO7: Collaboration: Work in teams of diverse cultures, backgrounds, and cross functional areas.

PO8: Leadership readiness/qualities: acquire effective decision-making skills, problem solving, teamwork and ability to motivate and guide others.

PO9: Digital and technological skills: Demonstrate sufficient understanding of ICT tools in business decision making.

PO10: Environmental awareness and action: acquire heightened environmental awareness and consciousness of the impact of business decisions and develop a sense of responsibility toward sustainable practices.

PO11: Lifelong learning: Develop attitude necessary for participating in learning activities throughout life.

6.4. Course Learning Outcomes (CLOs)

The program learning outcomes are attained by learners through the essential learnings acquired on the completion of selected courses of study within a program of study. The term ‘course’ is used to mean the individual courses of study that make up the scheme of study for a program. The Departments and Schools of the University are expected to map the relevant program learning outcomes when setting the course learning outcomes for the undergraduate certificate/diploma, bachelor’s degree, Bachelor’s degree with honours/ honours with research or master’s degree programs.

Course learning outcomes are specific to the learning for a given course of study related to a disciplinary or interdisciplinary/multi-disciplinary area of learning. Some courses of study are highly structured, with a closely laid down progression of compulsory/core courses to be taken at different phases/stages of learning.

Course-level learning outcomes are expected to be aligned with relevant program learning outcomes and should be designed based on the Cognitive Level based on Bloom’s Taxonomy. At the course level, each course may well have links to some but not all graduate attributes as these are developed through the totality of student learning experiences across the period/ semesters of their study.

The course outcomes for each course are mentioned in the syllabi of program. Students attain the outcomes and attributes described in previously through learning acquired on completion of program of study.

6.5 The Qualification Specifications:

Table: 8: NHEQF Qualification Specifications

Qualification type	Purpose of the qualification
Undergraduate Certificate	The students will be able to apply technical and theoretical concepts and specialized knowledge and skills in a broad range of contexts to undertake skilled or paraprofessional work and/or to pursue further study/learning at higher levels.
Undergraduate Diploma	The students will be able to apply specialized knowledge in a range of contexts to undertake advanced skilled or paraprofessional work and/or to pursue further learning/study at higher levels.
Bachelor's degree	The students will be able to apply a broad and coherent body of knowledge and skills in a range of contexts to undertake professional work and/or for further learning.
Bachelor's degree (Honours/ Honours with Research)	The students will be able to apply the knowledge in a specific context to undertake professional work and for research and further learning.
	The students will be able to apply an advanced body of knowledge in a range of contexts to undertake professional work and apply specialized knowledge and skills for research and scholarship, and/or for further learning relating to the chosen field(s) of learning, work/vocation, or professional practice.
Master's degree (1 year/2 semesters of study)	The students will be able to apply an advanced body of knowledge in a range of contexts for professional practice, research, and scholarship and as a pathway for further learning. Graduates at this level are expected to possess and demonstrate specialized knowledge and skills for research, and/or professional practice and/or for further learning.
Master's degree (2 years /4 semesters of study)	The students will be able to apply an advanced body of knowledge in a range of contexts for professional practice, research, and scholarship and as a pathway for further learning. Graduates at this level are expected to possess and demonstrate specialized knowledge and skills for research, and/or professional practice and/or for further learning. Master's degree holders are expected to demonstrate the ability to apply the established principles and theories to a body of knowledge or an area of professional practice.

Doctoral degree	The Doctoral degree qualifies students who can ask relevant and new questions and develop appropriate methodologies and tools for collecting information in pursuit of generating new knowledge and new data sets; and apply a substantial body of knowledge to undertake research and investigations to generate new knowledge, in one or more fields of inquiry, scholarship or professional practice. Graduates at this level is expected to have a systematic and critical understanding of a complex field of learning and specialized research skills for the advancement of knowledge and/or professional practice and making a significant and original contribution to the creation of new knowledge relating to a field of learning or in the context of an area of professional practice.
-----------------	--

6.6 Teaching Process and Course Evaluation

The courses will be delivered using the following teaching-learning tools.

- Lecture
- Assignment
- Individual/ Group Presentation
- Tutorials
- Case Studies
- Numerical Problem Solving
- Role play
- Simulations
- Practical Classes on ICT
- Analysis of Relevant Videos

Course Evaluation is done in the following way.

Sl.No	Component of Evaluation	Marks	Frequency	CODE	Weightage (%)
A	Continuous Evaluation				
I	Class test	(2+5=7)	1	C	45%
	Pre-Mid Term		1	P	
I	Home Assignment/Case Study	(7+7=14)	2	H

SEMESTER -I

Management Process and Organizational Behaviour

Subject Code:BSA032M101	Course Level: 100
Credit Unit: 3	Scheme Of Evaluation: (T)
L-T-P-C : 2-1-0-3	

Course Objective: To make the students understand the functions of management and the needs and features of human behaviour in an organization.

After the completion of the course, the students will be able to:

CO.	Course outcome	Bloom's Taxonomy
CO1	Identify key management theories and their proponents.	BT-I
CO2	Interpret the significance of each management function in organizational effectiveness.	BT-II
CO3	Apply key concepts in organizational behaviour, such as motivation, leadership, and group dynamics.	BT-III
CO4	Analyze various theories and concepts to develop a comprehensive understanding of management process and organizational behavior.	BT-IV

Modules	Course Content	Periods
I	Principles of Management –Introduction Management- Definition, Importance, Role of managers, Skills of managers, Management and Administration, Management process, Levels of Management, Trends and Challenges of Management in the global scenario. Evolution of Management Thought.	17
II	Management functions Planning- Planning Premises, Types of Plans, Planning process Decision Making - Types of decisions - Decision Making Process, Organizing-Meaning, concept and types, Departmentation - Span of control, Delegation of authority, Staffing, Controlling process, types of control and techniques of control.	16
III	Organizational Behaviour –Individuals Attitudes: Concept, Components, Job related attitudes Personality- Meaning, Importance, Determinants of personality, Theories of Personality, Personality and Organizational behaviour. Perception: Concept, Perceptual process, Factors that influence perception Learning- Concept, Nature, Theories of Learning, Reinforcement-Types, use in organizations.	16
IV	Organizational Behaviour – Group Interpersonal Behaviour: Tools to improve interpersonal behaviour- Johari Window and Transactional Analysis. (Exercise based/ activity based) Group Behaviour: Concept of group, Types of groups, Stages of Group formation. Leadership: Definitions and Characteristics, Significance of Leadership, Leadership styles, Leadership Theories.	17

Marketing Management

Subject Code: BSA032M102	Course Level: 100
Credit Unit: 3	Scheme of Evaluation: (T)
L-T-P-C=2-1-0-3	

Course Objective:

To impart knowledge and enhance skills to analyse the business environment for marketing decision-making, encouraging the students to understand the subject through experiential learning.

After the completion of the course, the students will be able to:

COs	Course Outcome	Bloom's Taxonomy
CO1	List the various marketing concepts adapted by the companies	BT-I
CO2	Summarize the factors influencing consumer Behaviour and marketing decisions.	BT-II
CO3	Apply marketing concepts to develop marketing strategies for different products and services.	BT- III
CO4	Analyse market trends and competitive landscapes to identify marketing opportunities and threats.	BT- IV

Modules	Course Content	Periods
I	Introduction Definition, Nature, Scope, functions and Importance, Evolution of Marketing; Core marketing concepts; Concept of customer and consumer, Different Marketing orientation, Holistic marketing concept, Marketing Environment: Micro and Macro, Marketing Mix (goods & services) - contemporary, New Marketing Realities, concept of customer value	17
II	Consumer Behaviour and STP Types of buyers, buying motives – Factors influencing buyer behaviour, buying decision process: Industrial and consumer market, Market segmentation – segmentation bases – Targeting –Positioning, Brand - definition, role & scope.	16
III	Marketing Mix: Product &Pricing Decisions Product concept, classification– New Product Development process – Product Life Cycle, Product mix – Packaging Labelling, Pricing – Factors influencing pricing decisions – pricing objectives –Types of Pricing Strategy	16
IV	Marketing Mix: Place & Promotion Decisions Distribution Strategy - Meaning, need for and Importance of Distribution Channel, Factors Influencing Channel Decisions, Types of Channels, Functions of Channel Members, Channel conflict, Concept of Promotion Mix, Factors determining promotion mix: Promotional Tools, Basics of online marketing, Integrated Marketing, Communication	17

Media Literacy and Critical Thinking(Closed Minor)

Subject Code:BSA032N102	Course Level: 100
Credit Unit : 3	Scheme of Evaluation: (T)
L-T-P-C=2-1-0-3	

Course Objective:

This course equips students with essential media literacy and critical thinking skills to analyze and navigate various media forms. It covers the dynamics of media production and ownership in India, ethical and regulatory considerations, and enhances digital literacy for responsible online engagement. Through comprehensive study and practical exercises, students will learn to critically engage with media content, uncover biases, and make informed decisions in media consumption and production.

After the completion of the course, the students will be able to:

CO.	Course outcome	Bloom's Taxonomy
CO1	Define media literacy principles for navigating digital media landscapes and evaluating credibility.	BT-I
CO2	Outline the complexities of media production, distribution, and audience behavior.	BT-II
CO3	Identify ethical standards in media content creation and consumption	BT-III
CO4	Analyse responsible digital citizenship by navigating online information critically and combating misinformation.	BT-IV

Modules	Course Content	Periods
I	Foundations of Media Literacy and Critical Thinking: Core principles of media literacy and critical thinking; Definition and significance of media literacy, its historical evolution within the Indian context; Understanding media as a powerful communication tool and its role in shaping societal perceptions and behaviors.	17
II	Deconstructing Media Texts: Forms of media texts, including print, broadcast, digital, and social media; Textual analysis and the deconstruction of visual media using semiotics; The impact of media representations on individual perceptions and societal attitudes, from relevant case studies in the Indian context.	16

III	Media Consumption and Production Dynamics : Dynamics of media production, distribution, and consumption in India: Influence of ownership and control structures on media content; Techniques for critically evaluating media content and analysing audience consumption patterns	16
IV	Ethics, Regulation, and Digital Media Literacy : Ethical and regulatory considerations inherent in media practices and the evolving landscape of digital media literacy. Ethical principles in media, the regulatory framework governing media content, and the role of self-regulatory bodies in upholding ethical standards; Digital media's impact on contemporary media literacy practices, strategies for navigating online information, and promoting digital citizenship.	17

Introduction to Indian Knowledge System–I

Subject Code:BSA032I01	Course Level: 100
Credit Unit: 3	Scheme of Evaluation: (T)
L-T-P-C=2-1-0-3	

Course Objective:

This Foundation course is designed to present an overall introduction to all the streams of IKS relevant to the programme. It would enable students to explore the most fundamental ideas that have shaped Indian Knowledge Traditions over the centuries.

COs	Course outcome	Bloom's Taxonomy
CO1	Recall about the natural endowments	BT I
CO2	Illustrate literature of Indian civilization-the Vedic–Itihasas ,languages, mathematics ,and Ayurveda.	BTII
CO3	Explain observation of the motion of celestial bodies in the Vedic corpus	BTII

Modules	Course Content	Periods
I	Bharata Varsha—A Land of Rare Natural Endowments Demographical features of the ancient Bharat Varsha, Largest cultivable area in the world. Protected and nurtured by Himalayas. The Sindhu-Ganga plain and the great coastal plains. The great rivers of India. Climatic changes: Abundant rains, sunshine and warmth, vegetation, animals, and mineral wealth. Most populous country in the world. India's prosperity held the world in thrall. Splendid geographical isolation of India and the uniqueness of Indian culture.	17

II	Foundational Literature of Indian Civilization: The Vedic Corpus. The Itihasas—Ramayana and Mahabharata, and their important regional versions. The Puranas. Foundational Texts of Indian Philosophies, including the Jain and Bauddha. Foundational Texts of Indian Religious Sampradayas, from the Vedic period to the Bhakti traditions of different regions. i. The Vedangas and Other Streams of Indian Knowledge System: The Vedic Corpus: Introduction to Vedas and synopsis of the four Vedas and Sub-classification of Vedas; Messages Vedas; Introduction to Vedangas : Siksha, Vyakarana, Chanda's, Nirukta, Jyotisha and Kalpa ; Vedic Life: Distinctive Features. Other streams of Indian Knowledge System such as Ayurveda, Sthapatya, Natyasastra, Dharma sastra, Artha sastra, etc. The Indian way of continuing the evolution of knowledge through commentaries, interpretations and revisions of the foundational texts. The large corpus of literature in Indian languages. ii. Indian Language Sciences: Language Sciences and the preservation of the Vedic corpus. Varna Mala of Indian languages based on classification of sounds on the Basis of their origin and effort involved. The special feature of the scripts of most Indian languages, that each symbol is associated with a unique sound. Word formation in Sanskrit and Indian languages. Major insights in the Science of Vyakarana as established by Panini. Important texts of Indian Language Sciences—Siksha or phonetics, Nirukta or etymology, Vyakarana or Grammar, Chanda or Prosody. Navyanyaya and Navyavyakaranain Navadvipa, Varanasi and West and South India.	17
	iii. Indian Mathematics: Numbers, fractions and geometry in the Vedas. Decimal nomenclature of numbers in the Vedas. Zero and Infinity. Simple constructions from Sulba-sutras. The development of the decimal place value system which resulted in a simplification of all arithmetical operations. Linguistic representation of numbers. Important texts of Indian mathematics. Brief introduction to the development of algebra, trigonometry, and calculus. How Indian mathematics continued to flourish in the 18/19/20th centuries. Kerala School. Ramanujan.	
III	Indian Astronomy: Ancient records of the observation of the motion of celestial bodies in the Vedic corpus. Sun, Moon, Nakshatra & Graha. Astronomy as the science of determination of time, place, and direction by observing the motion of the celestial bodies. The motion of the Sun and Moon. Motion of equinoxes and solstices. Elements of Indian calendar systems as followed in different regions of India. Important texts of Indian Astronomy. Basic ideas of the planetary model of Aryabhata and its revision by Nilakantha. Astronomical instruments. How Indian astronomy continued to flourish in the 18/19th centuries. Astronomical endeavours of Jaisingh, Sankaravarman, Chandrasekhara Samanta.	16

IV	Indian Health Sciences: Vedic foundations of Ayurveda. Ayurveda is concerned both with maintenance of good health and treatment of diseases. Basic concepts of Ayurveda. The three Gunas and Three Doshas, Pancha-mahabhuta and Saptadhatu. The importance of Agni (digestion). Six Rasas and their relation to Doshas. Ayurvedic view of the cause of diseases. Dinacharya or daily regimen for the maintenance of good health. Ritucharya or seasonal regimen. Important Texts of Ayurveda. Selected extracts from Astāngahrdaya (selections from Sūtrasthāna) and Suśruta-Samhitā 15 (sections on plastic surgery, cataract surgery and anal fistula). The large pharmacopoeia of Ayurveda. Charaka and Sushruta on the qualities of a Vaidya. The whole world is a teacher of the good Vaidya. Charaka's description of a hospital. Hospitals in ancient and medieval India. How Ayurveda continued to flourish till 18/19th centuries. Surgical practices, inoculation. Current revival of Ayurveda and Yoga.	16

CENI: Introduction to Effective Communication

Subject Code: CEN982A101	Course Level: 100
Credit Unit: 2	Scheme of Evaluation: (T)
L-T-P-C=1-0-0-1	

Course Objective:

To understand the four major aspects of communication by closely examining the processes and figuring the most effective ways to communicate with interactive activities.

COs	Course outcome	Bloom's Taxonomy
CO1	Identify the elements and processes that make for successful communication and recognize everyday activities that deserve closer attention in order to improve communication skills	BT I
CO2	Contrast situations that create barriers to effective communication and relate them to methods that are consciously devised to overcome such hindrance	BTII
CO3	Use language, gestures, and paralanguage effectively to avoid miscommunication in articulation's thoughts and build arguments more effectively	BTIII
CO4	Illustrate with suitable examples so that the students inculcate the writing skills	BTIV

Modules	Course Content	Periods
I	Introduction to Effective Communication - Listening Skills - The Art of Listening - Factors that affect Listening - Characteristics of Effective Listening Guidelines for improving Listening skills	8
II	- Speaking Skills - The Art of Speaking - Styles of Speaking - Guidelines for improving Speaking Skills Oral Communication: importance, guidelines, and barriers	4
III	- Reading Skills - The Art of Reading - Styles of Reading: skimming, surveying, scanning Guidelines for developing Reading skills	4
IV	- Writing Skills - The Art of Writing - Purpose and Clarity in Writing - Principles of Effective Writing	6

IT Tools in Management-I

Subject Code:BSA032S111	Course Level: 100
Credit Unit: 3	Scheme of Evaluation: (P)
L-T-P-C=2-0-2-3	

Course Objective: To make the students understand and learn the application of IT in the field of management.

After the completion of the course ,the students will be able to:

COs	Course outcome	Bloom's Taxonomy
CO1	Define the basic concepts of Information Systems and the key features of MS Word, MS PowerPoint, and MS Excel.	BT-I
CO2	Understand the significance of Information Systems in organizations and comprehend how MS Office applications support various business functions.	BT-II
CO3	Apply knowledge of MS Office applications to create, edit, and present information effectively in management scenarios.	BT-III
CO4	Analyse the functionalities of MS Excel for data management and evaluate the efficiency of MS Office tools in addressing management tasks.	BT-IV

Module	Course Content	Period
I	Introduction to Information Systems : Data, Information, Concept of IS and Types of Information Systems (TPS, MIS,DSS, ESS)	18
II	MSWord: Editingtext,Findingandreplacingtext,printingdocuments,CreatingandPrinting Merged Document Page Design and Layout. Editing and Profiling Tools: Checking and correcting spellings. Handling Graphic Templates and Wizards	16
III	Handling MSOffice Packages MS PowerPoint: Creating, Opening and Saving Presentations, Creating the Look of Your Presentation, with Slides ,Adding and Formatting Text, Formatting Paragraphs, Checking Spelling and Correcting Type Handouts, Drawing and Working with Objects, Adding Clip Art and other pictures, Controlling Slideshow, Printing Presentation.	16

IV	MS Excel: Spreadsheet Concepts, Creating, Saving and Editing a Workbook, Inserting, Deleting Work S Copying and Moving from selected cells, handling operators in Formulae, Functions: Mathematical Logical, statistical, text, financial, Date and Time function and using function wizard.	18

SEMESTER – II

Accounting for Managers

Subject Code:BSA032M201	Course Level:200
Credit Unit: 3	Scheme of Evaluation: (T)
L-T-P-C=2-1-0-3	

Course Objective:

To enable the student to understand the basic concepts of financial accounting & impart them with the required ability to prepare books of accounts and acquaint them with methods followed and practices adopted in the preparation & presentation of financial statements.

COs	Course outcome	Bloom's Taxonomy
CO1	Describe the basic Concepts of Accounting	BT-I
CO2	Understanding the role of accounting in Business	BT-II
CO3	Apply the basic principles and procedures of accounting	BT-III
CO4	Analyse the transactions of a business for the preparation of financial statements.	BT-IV

Modules	Course Content	Periods
I	Introduction to Financial Accounting: Accounting- Meaning, objectives, advantages, and Limitations, Qualitative Characteristics of Accounting Information. Branches of Accounting, Bases of Accounting: cash basis and accrual basis. Accounting principles; Meaning and Nature. Accounting Concepts: Entity, Money Measurement, Going Concern, cost, Accounting Period, Dual Aspect, Realization, prudence (conservatism), materiality, and Full Disclosures. Accounting as an information system, the users and Uses of Financial Accounting Information and needs.	17
II	Accounting Mechanics: Accounting cycle, Source Documents and vouchers, Accounting Equation Approach, Rules of Debit and Credit. Recording of Transactions: Book of original entry- Journal, Special Purpose Books (i) cash book- simple, cash book with Bank Column; Ledger- meaning, utility, format; posting from Journal and Subsidiary books; Balancing of Accounts. Trial balance: Meaning, objectives, and preparation.	16
III	Final Accounts -I Financial statements: Meaning and Users. Capital Expenditure, Revenue Expenditure, and Deferred Revenue Expenditure. Trading and Profit and Loss Account: Gross Profit, Operating Profit; Net Profit Balance sheet: Need, Grouping of Assets and Liabilities in Balance sheet. Preparation of Financial Statements of Sole Proprietorship. Partnership: Features, Partnership Deed, Preparation of Profit and Loss Appropriation Account, division of Profit among Partners, Methods of Valuation of Goodwill. Preparation of Financial Statements of Partnership Firm.	17

IV	Final Accounts -II Features and types of companies. Share and share Capital: Nature and Types. Statutory Provisions relating to maintenance of Books of Accounts of companies. Financial Statements of Companies, Provisions relating to the preparation of Financial Statements of companies. Format and Presentation of Statement of Profit and Loss & Balance sheet. Preparation of the Company Final Accounts	16

Credit Unit: 2	Scheme Of Evaluation: (T)
L-T-P-C=1-0-0-1	

Course Objective: To introduce the students to the various forms of technical communication and enhance their knowledge in the application of both verbal and non-verbal skills in communicative processes.

Sl No.	Course outcome	Bloom's Taxonomy
CO1	Identify the different types of technical communication, their characteristics, their advantages, and disadvantages	BT 1
CO2	Explain the barriers to communication and ways to overcome them.	BT 2
CO3	Discover the means to enhance conversation skills.	BT 3
CO4	Determine the different types of non-verbal communication and their significance.	BT4

Modules	Course Content	Periods
I	Technical Communication Communicating about technical or specialized topics, Different forms of technology-enabled communication tools used in organizations Telephone, Teleconferencing, Fax, Email, Instant messaging, Blog, podcast, Videos, videoconferencing, social media	8
II	Communication Barriers Types of barriers: Semantic, Psychological, Organisational, Cultural, Physical, and Physiological. Methods to overcome barriers to communication.	4
III	Conversation skills/Verbal Communication Conversation – Types of Conversation, Strategies for Effectiveness, Conversation Practice, Persuasive Functions in Conversation, Telephonic Conversation and Etiquette Dialogue Writing, Conversation Control.	4
IV	Non-verbal Communication Introduction; Body language- Personal Appearance, Postures, Gestures, Eye Contact, Facial expressions Paralinguistic Features-Rate, Pause, Volume, Pitch/Intonation/ Voice/ modulation Proxemics, Haptics, Artifacts, Chronemics	6
	Total	22

Subject Code: BSA032S211	Course Level: 100
Credit Unit: 3	Scheme of Evaluation: (P)
L-T-P-C= 2-0-2-3	

Course Objective: To enable the student to understand and implement the various concepts in solving real life problems.

After the completion of the course, the students will be able to:

COs	Course outcome	Bloom's Taxonomy
CO-1	Remember and recognize basic Excel features and functions.	BT-I
CO-2	Understand how to use Excel tools and functions.	BT-II
CO-3	Use Excel tools and functions to complete tasks.	BT-III
CO4	Evaluate and Analyse data using Excel to make decisions.	BT IV

Modules	Course Content	Periods
I	Excel Introduction An overview of the screen, navigation, and basic spreadsheet concepts • Various selection techniques • Shortcut Keys • Formatting and Proofing	18
II	Mathematical Functions - SumIf, SumIfsCountIf, CountIfsAverageIf, AverageIfs, Nested IF, IF ERROR Statement, AND, OR NOT Protecting Excel • File Level Protection • Workbook, Worksheet Protection What If Analysis - Goal Seek • Scenario Analysis • Data Tables (PMT Function) • Solver Tool	16
III	Logical Functions - If Function • How to Fix Errors – if error • Nested If • Complex if and or functions Data Validation - Number, Date & Time Validation • Text and List Validation • Custom validations based on formula for a cell • Dynamic Dropdown List Creation using Data Validation – Dependency List Lookup Functions - Vlookup / HLookup • Index and Match • Creating Smooth User Interface Using Lookup • Nested VLookup • Reverse Lookup using. Choose Function • Worksheet linking using Indirect • Vlookup with Helper Column	18

IV	Pivot Tables - Creating Simple Pivot Tables • Basic and Advanced Value Field Setting - Classic Pivot table • Choosing Field • Filtering PivotTables • Modifying PivotTable Data • Grouping based on numbers and Dates • Calculated Field & Calculated Items • Arrays Functions • What are the Array Formulas, Use of the Array Formulas • Basic Examples of Arrays (Using ctrl+shift+enter). • Array with if, len and mid functions formulas. • Array with Lookup functions. • Advanced Use of formulas with Array. Charts and slicers - Various Charts i.e. Bar Charts / Pie Charts / Line Charts • Using SLICERS, Filter data with Slicers • Manage Primary and Secondary Axis	16

SEMESTER - III

Quantitative Techniques

Subject Code:BSA032M301	Course level: 200
Credit Unit : 4	Scheme of Evaluation: (T)
L-T-P-C= 3-1-0-4	

Course Objective: To understand and develop analytical insights and knowledge base of various concepts of quantitative techniques.

After the completion of the course, the students will be able to:

COs	Course outcome	Bloom's Taxonomy
CO1	Define quantitative techniques and their applications in decision-making.	BT I
CO2	Interpret the results of quantitative analysis in a business context.	BT II
CO3	Apply mathematical and statistical methods to Analyse data and draw meaningful conclusions.	BT III
CO4	Analyse data using quantitative techniques to solve business problems	BT IV

Modules	Course Content	Periods
I	Basic Algebraic concepts, Indices and Logarithms, Quadratic Equations, Set, Relation and Function, Arithmetic, and geometric progressions. Determinants, Matrix Algebra	22
II	Differential Calculus: 1st order derivative, 2nd order derivative, Applications of derivatives to solve business problem- Maxima and Minima	22
III	Introduction to Statistics, Measure of Central Tendency-Mean, Median, Mode; Measures of Dispersion – Range, Quartile Deviation, Mean Deviation, Standard Deviation, Coefficient of Variation, Simple Correlation and Regression, Time Series Analysis	22
IV	Theory of Probability-Meaning, basic concepts, Addition rule, Multiplication rule, conditional probability, Probability distributions – Discrete and Continuous Probability distributions - Binomial, Poisson, and Normal distribution	22

Financial Management

Subject Code: BSA032M302	Course Level: 200
Credit Units: 4	Scheme of Evaluation: (T)
L-T-P-C =3-1-0-4	

Course Objective:

To acquaint the students with the techniques of financial management and their applications for business decision making.

After the completion of the course, the students will be able to:

COs	Course outcome	Bloom's Taxonomy
CO1	Define key financial management terms and concepts.	BT-I
CO2	Describe the relationship between risk and return in financial decision-making	BT-II
CO3	Analyse financial statements to assess the financial health of a company	BT-III
CO4	Evaluate investment opportunities using techniques like Net Present Value (NPV) and Internal Rate of Return (IRR)	BT-IV

Modules	Course Content	Periods
I	INTRODUCTION Nature, Scope, and Functions of Financial Management, Profit vs Wealth Maximization. Risk and Return, Time value of money. Calculating Present and Future Value. Valuation of securities – Bonds and Equities	20
II	INVESTMENT DECISIONS The Capital Budgeting Process, Cash flow Estimation, Payback Period Method Accounting Rate of Return, Net Present Value (NPV), Net Terminal Value Internal Rate of Return (IRR), Profitability Index, Capital budgeting under Risk – Uncertainty and Risk Adjusted Discount Rate.	22
III	FINANCING DECISION Cost of capital and Financing Decision: Sources of long-term financing Meaning & Significance of cost of capital, Factors affecting Cost of Capital Determining component Costs of capital & Weighted Average Cost of Capital, Defining Capital Structure, Determinants of Capital Structure, Relevance of Capital Structure- NI & Traditional Views, Irrelevance of Capital Structure- NO Approach and MM Theory, Optimum Capital Structure, Meaning of Financial Leverage & its Measures, Financial Leverages, and the Shareholder's Return, Combining Financial and Operating Leverage.	24
IV	DIVIDEND DECISION & WORKING CAPITAL DECISION Dividend Policy: Meaning and Kinds of Dividend, Theories on Dividend Policies, Practical Considerations in Dividend policy, Relevance of dividend policy on Firm's Value, Factors influencing a Firm's dividend policy. Working Capital Management: Concepts of Working Capital, Operating and Cash Conversion Cycle, Permanent and Variable Working Capital, Determinants of Working Capital, Estimation of Working Capital Needs, Cash management receivable management.	22

Fundamentals of International Business (Open Minor)

Subject Code: BSA032N301	Course Level: 200
Credit Unit: 4	Scheme of Evaluation: (T)
L-T-P-C=3-1-0-4	

Course Objective: To impart and demonstrate amongst the students an understanding of the basic concepts and theoretical knowledge used in international business.

After the completion of the course, the students will be able to:

COs	Course outcome	Bloom's Taxonomy
CO1	Define international business and its key concepts	BT I
CO2	Summarize the theories of international trade, framework, and international agreement.	BT II
CO3	Apply international business theories to analyse real-world international business situations.	BT III

Modules	Course Content	Periods
I	Introduction to International Business: Concepts of Globalisation, Dimensions, Factors influencing globalization, Concept of International Business, Reasons for International expansion, Modes of entry in international markets, Overview of world's trade and India's trade, Balance of Payments.	22
II	Institution framework and Trade Agreements: International economic institutions- WTO, IMF, UNCTAD, ADB etc. Institutional Framework for International Trade in India, Overview of WTO Agreements, Ministerial Conferences and Emerging issues, WTO and Developing countries. International Economic Integrations: Different Levels of Integration, Major Regional Trade Agreements, India's participation and role.	22
III	International Environment and International Marketing: Cultural, Political and Legal Environment Concept of Culture, Comparison of Cross-Cultural Behaviour, fundamentals of International Marketing Mix Decisions -Product, Pricing, International distribution channels, communication and Promotion Decisions	22
IV	International Finance and Documentation: International Monetary System. Foreign Exchange market, Exchange risk management, Modes of payment and international trade finance Export import procedure, Terms of Delivery. Documentation- Commercial documents, Regulatory documents.	22

International Business (Closed Minor)

Subject Code: BSA032N302	Course Level: 200
Credit Unit: 4	Scheme of Evaluation: (T)
L-T-P-C=3-1-0-4	

Course Objective:

The course aims to help students to understand the evolution and significance of international trade in contemporary business environment and examine various economic integration by analyzing the emerging trends in International Business.

After the completion of the course, the students will be able to:

COs	Course outcome	Bloom's Taxonomy
CO1	Demonstrate the fundamental theories of international business and trade	BT I
CO2	Explain the impact of political, legal, economic, and cultural environments on international business operations.	BT II
CO3	Develop an understanding of the concept of Foreign Direct Investment and its impact on various world economy	BT III
CO4	Analyse the significance of economic Integration in International Business	BT-IV

Modules	Course Content	Periods
I	Introduction to International Business Introduction to International Business Stages of Internationalization – EPRG Framework - International Trade Theories: Theories of International Trade Mercantilists, Absolute Cost and Comparative Advantage, Factor Proportions, Neo-factor Proportions Theories, Country Similarity Theory, Intra-industry Trade, Tariff and Non-Tariff Barriers in Global Businesses	22
II	Introduction of Foreign Direct Investment Introduction Foreign Direct Investment in the World Economy, Trends in FDI Theories of Foreign Direct Investment, Greenfield and Brownfield FDI, Benefits and Costs of FDI, International Institutions and the Liberalization of FDI, CAGE Model.	22
III	Economic Integration : Economic indicators and their impact on international business decisions, Regional Economic Integration and Trade Blocs, Basic Principles of Multilateral Trade Negotiations, Instruments of Trade Regulation, FDA, custom union, common market economic union, Emerging Markets and Developing Economies.	22
IV	Emerging Trends in International Business International Entrepreneurship and Born Global Firms, Ethical Considerations - CSR Frameworks and Approaches and ethical considerations, ESG investing and reporting standards, corporate responses to climate change and social justice issues, Implications of Brexit on international business laws, the rise of digital platforms, and ecommerce. Re-shoring and Nearshoring Trend, Impact of pandemic on International Business.	22

Innovation Management(IDC for RGU)

Subject Code: BSA032I301	Course Level:200
Credit Unit: 3	Scheme of Evaluation: (T)
L-T-P-C=2-1-0-3	

Course Objective : The objective of this course is to introduce and explore innovation management concepts, learn to manage innovation and to understand the intellectual property and patents to protect innovations.

COs	Course outcome	Bloom's Taxonomy
CO1	Define the innovation process and the various components involving Innovation Management.	BT I
CO2	Summarize the factors to achieve success and manage the uncertainties	BT II
CO3	Identify the different forms of protection from intellectual property and learn how to handle patents through its various components	BT III

Modules	Course content	Periods
I	Introduction to Innovation Management: Concepts, Innovation and Invention, Types of Innovation, Models of Innovation, Innovation as a Management Process.	17
II	Market adoption and Technology diffusion: Innovation and the market, Innovation diffusion theories, Adopting new products and embracing change.	16
III	Managing Innovation within Firms: Managing uncertainty, Organizational characteristics facilitating innovation process, Organizational structures and innovation, Management tools for innovation.	16
IV	Managing Intellectual Property: An introduction to patents, Expiry of a patent and patent extensions, Trademarks, Using brands to protect intellectual property, Remedy against infringement.	17

Design Thinking and Innovation (IDC for RSB)

Subject Code: BSA032NI303	Course Level:200
Credit Unit: 3	Scheme of Evaluation: (T)
L-T-P-C=2-1-0-3	

Course Objective : The primary focus of DTI is to help learners develop creative thinking skills and apply design-based approaches/tools for identifying and implementing innovation opportunities into implementable projects.

COs	Course outcome	Bloom's Taxonomy
CO1	Recall the fundamental concepts, principles, and stages of design thinking and innovation.	BT I
CO2	Explain wicked problems and how to frame them in a consensus manner that is agreeable to all stakeholders using appropriate frameworks, strategies, techniques during prototype development	BT II
CO3	Identify real-time innovative product designs and choose appropriate frameworks, strategies, techniques during prototype development.	BT III
CO4	Analyze emotional experience and Inspect emotional expressions to better understand users while designing innovative products	

Modules	Course content	Periods
I	Basics of Design Thinking : Concept of innovation and its significance in business. Creative thinking process and problem-solving approaches. Know Design Thinking approach and its objective Design Thinking and customer centricity – real world examples of customer challenges, use of Design Thinking to Enhance Customer Experience, Parameters of Product experience, Alignment of Customer Expectations with Product. Discussion of a few global success stories like AirBnB, Apple, IDEO, Netflix etc. Stages of Design Thinking Process – Empathize, Define, Ideate, Prototype, Implement.	17
II	Learning to Empathize and Define the Problem : Importance of empathy in innovation process – how can students develop empathy using design tools. Observing and assimilating information. Individual differences & Uniqueness Group Discussion and Activities to encourage the understanding, acceptance and appreciation of individual differences. Wicked problems- Definition, Identification of wicked problems and the potential impact of their solutions	16
III	Ideate, Prototype and Implement Templates of ideation like brainstorming, systems thinking. Concept of brainstorming – how to reach consensus on wicked problems. Mapping customer experience for ideation. Methods of prototyping, purpose of rapid prototyping. Implementation.	16
IV	Feedback, Re-Design & Re-Create: Feedback loop, focus on User Experience, address ergonomic challenges, user focused design, Final concept testing, Final Presentation – Solving Problems through innovative design concepts & creative solution.	17

AEC III

CEN III: Fundamentals of Business Communication

Subject Code: CEN982 A301	Course Level :200
Credit Units: 2	Scheme of Evaluation: (T)
L-T-P-C=1-0-0-1	

Course Objective: The aim of the course is to develop essential business communication skills, including effective writing, speaking, and interpersonal communication, to enhance professional interactions, collaboration, and successful communication strategies within diverse corporate environments.

Sl No.	Course outcome	Bloom's Taxonomy
CO1	Define and list business documents using appropriate formats and styles, demonstrating proficiency in written communication for various business contexts.	BT -I
CO2	Demonstrate confident verbal communication skills through persuasive presentations, active listening, and clear articulation to engage and influence diverse stakeholders.	BT -II
CO3	Apply effective interpersonal communication strategies, including conflict resolution and active teamwork, to foster positive relationships and contribute to successful organizational communication dynamics	BT -III
CO4	Devise mechanisms to make the students understand professionalism in terms of workplace behaviour and workplace relationships. With practical orientation.	BT IV

Modules	Course Content	Periods
I	Business Communication: Spoken and Written - The Role of Business Communication - Classification and Purpose of Business Communication - The Importance of Communication in Management - Communication Training for Managers - Communication Structures in Organizations - Information to be Communicated at the Workplace Writing Business Letters, Notice, Agenda and Minutes	4
II	Negotiation Skills in Business Communication - The Nature and Need for Negotiation - Situations requiring and not requiring negotiations. - Factors Affecting Negotiation - Location, Timing, Subjective Factors - Stages in the Negotiation Process - Preparation, Negotiation, Implementation Negotiation Strategies	6

III	Ethics in Business Communication • Ethical Communication • Values, Ethics and Communication • Ethical Dilemmas Facing Managers • A Strategic Approach to Business Ethics • Ethical Communication on Internet Ethics in Advertising	8
IV	Business Etiquettes and Professionalism • Introduction to Business Etiquette • Interview Etiquette • Social Etiquette • Workplace Etiquette • Netiquette	4

SEC**Basics of Tally**

Subject Code:BSA032S311	Course Level: 200
Credit Unit: 3	Scheme of Evaluation: (P)
L-T-P-C=2-0-2-3	

Course Objective:

To impart knowledge and skills for software application of financial accounting and acquaint students with practical problem solving.

SI No.	Course outcome	Bloom's Taxonomy
CO1	Define the specific tools for documenting financial	BT -I
CO2	Interpret the financial statement using Tally.	BT -II
CO3	Develop skills to prepare account manually and computerized.	BT -III
CO4	Devise a Company, Ledgers and Groups creation, stock groups, Stock items, stock unit's formation, various Vouchers Entry, etc. in tally software.	BT IV

Module	Contents	Periods
I	ERP basic features – benefits – selection-implementation	18
II	Tally basic and advance features – Company Creation-configure and features settings-Ledger Creation with predefined primary Groups, Predefined Subgroup and New Subgroup – Creating Stock, Items and Groups.	16
III	Preparation of Ledger accounts on Tally- Preparation of Invoices- Vouchers Entry, Generating Reports.	18
IV	Preparation of Cash Books, Ledger Accounts, Trail Balance, Profit and Loss Accounts, Balance Sheet, Funds Flow Statement, Cash Flow Statement and Display of Final accounts- Ratios-Selecting and Shutting a company – Backup and Restore data of a Company	16

SEMESTER – IV

Managerial Economics

Subject Code: BSA032M401	Course Level:200
Credit Units: 4	Scheme of Evaluation: (T)
L-T-P-C=-3-1-0-4	

Course Objective: To enable the students to understand the laws of supply and demand and various contributing factors; various laws of production and costs; various types of market structures.

After the completion of the course, the students will be able to:

COs	Course outcome	Bloom's Taxonomy
CO1	List the basic concepts and importance of managerial economics	BT I
CO2	Describe various variables of consumer behaviour	BT II
CO3	Analyse how changes in supply and demand affect market equilibrium	BT III
CO4	Compare and contrast different market structures in terms of their efficiency and welfare implications.	BT IV

Modules	Course Content	Periods
I	Nature, Scope, Definitions of Business Economics, Contribution and Application of Business Economics to Business. Objectives of a firm. Opportunity Costs, Risk, Return and Profits. Demand- Demand function, Individual and Market demand, Law of demand and supply, exceptions to the law of demand, change in demand, Elasticity of demand- price, income and cross elasticity, Methods, and degrees of price elasticity, Point and arc elasticity	22
II	Consumer Behaviour: Consumer sovereignty-limitations. Approaches to the study of consumer behaviour - cardinal approach-the law of equip- marginal utility, ordinal approach – indifference curve analysis-properties – consumer surplus – meaning-analysis limitations. Price, income and substitution effects. Giffen goods. Engel curve.	22
III	Modern cost concepts, Relationship between Marginal Cost and Average Cost, Cost of production: Short-run and long run, Production function-linear and homogeneous production function, stages of production; Isoquants, Iso-cost line, Returns to scale; Economies and diseconomies of scale	22
IV	Perfect competition: Basic features, short run equilibrium of firm/industry, long run equilibrium of firm/industry, Monopoly: basic features& price determination; Monopolistic competition: basic features and price determination, Oligopoly: concepts and price determination	22

Business Research Methods

Subject Code: BSA032M402	Course Level: 200
Credit Units: 4	Scheme of Evaluation:(T)
L-T-P-C=-3-1-0-4	

Course Objective: To enable students to conduct business research to investigate, analyses and interpret data to understand the business problem using relevant tools.

After the completion of the course, the students will be able to:

COs	Course outcome	Bloom's Taxonomy
CO1	Define business research and its importance in decision-making.	BT I
CO2	Summarize the steps involved in conducting a business research project.	BT II
CO3	Use statistical tools and techniques to Analyse research data.	BT III
CO4	Assess the impact of research on business decision-making.	BT IV

Modules	Course Content	Periods
I	Introduction to Research Meaning of Research, Types of Research, Process of Research, Research Dilemma, Defining Research Problem, Formulating the Research hypotheses, Developing Research problem, Research design	22
II	Sampling, Measurement & Scaling and Data Collection Population and Sample, Sampling for research, Type of Sampling Methods, Characteristics of a good Sampling Design. Types of data –sources, methods of data collection (Primary and Secondary Data) Questionnaire Design	22
III	Data Analysis and Interpretation: Descriptive Statistics, Univariate and Bivariate Analysis of Data, Testing of Hypothesis Process steps, Type-I & Type-II Error Parametric Test and Non-parametric test (using SPSS/ MS Excel/ any other statistical package as well)	22
IV	Introduction to Advanced Data Analysis & Research Report Introduction to Factor analysis, Correlation and Regression analysis techniques, Report writing and presentation- Layout, Contents, Qualities of research report, Ethical issues in Business Research	22

Indian Ethos and Practices in Management

Subject Code: BSA032M403	Course Level :200
Credit Unit : 4	Scheme Of Evaluation: (T)
L-T-P-C: 3-1-0-4	

Course Objective:

The objective of this course is to help understand the wisdom of ancient Indian literatures and their applicability in the holistic development of contemporary society and modern business world.

COs	Course Outcome	Bloom's Taxonomy
CO1	Identify the concept of traditional knowledge and its importance	BT-1
CO2	Explain the relevance of Ancient Wisdom in Modern Times	BT-2
CO3	Develop analytical thinking by examining the Wisdom of IKS and their relevance to contemporary management	BT-3
CO4	Analyze the usage of ancient wisdom in modern business situation.	BT-4

Modules	Course Content	Periods
I	Understanding Ethos and Ethics of Ancient Literature Definition of Ethics, Basic principles of Indian management ethos, Management Perspective of ancient Indian literature.	22
II	Management Lessons from Ancient Indian Mythology Epics- Guide to Management, Purusharthas, Concept of Karma, Religions and Management, Management lessons from selected folk tales.	22
III	Management lessons from Arthashastra 7 pillars of Management, Administration, Leadership- Models of Leadership and Motivation in Indian Thoughts, Management of the Self, Interpersonal and Group Effectiveness.	22
IV	Cultural Heritage of India and its relevance for Modern Management: Human Behavior: Guna Theory, Sanskara Theory --- Samskara (Values) Vs. Skills Supremacy of Values over Skills, Moral Behavior. Indian ethos and Professionalism	22

Introduction to Human Resource Management (Open Minor)

Subject Code: BSA032N401	Course Level 200
Credit Unit: 3	Scheme of Evaluation: (T)
L-T-P-C=2-1-0-3	

Course Objective:

This course provides an overview of human resource management functions, including how firms hire, develop, and manage their people. The training focuses on providing a general grasp of all the HR functions involved in employee life cycle management.

After the completion of the course, the students will be able to:

COs	Course outcome	Bloom's Taxonomy
CO1	Define the key issues related to administering the human element such as motivation, compensation, appraisal, career planning and training	BT-I
CO2	Summarize various tools required for the development, implementation, and evaluation of HRM practices in national and international contexts.	BT-II
CO3	Implement HRM strategies to enhance employee development and retention.	BT-III

Modules	Course Content	Periods
I	Introduction to Human Resource Management: Evolution of HRM, Objectives of HRM, Functions, HRM and Personnel Management, Future Role of HRM, Strategic Human resource management.	17
II	Human Resource Procurement: Human Resource Planning- Characteristics, Significance. Job Analysis and Design-Introduction, Process, Job Description and Job Specification, Job Design- Definition, Importance. Recruitment and selection Selection, Placement, Orientation, Induction.	16
III	Human Resource Development: Employee Training- Significance, Training wheel and Methods of Training, Organization Change- Definition, Change Agents, Organizational resistance, Organization Development.	16
IV	Human Resource Evaluation and Compensation Performance Evaluation-Process, Evaluation Methods, Compensation Administration-Introduction, Objectives, Components of salary, types of Incentive, Executive compensation.	17

Management Information System (Closed Minor)

Subject Code: BSA032N402	Course Level 200
Credit Unit: 3	Scheme of Evaluation: (T)
L-T-P-C=2-1-0-3	

Course Objective:

The course aims to provide students with comprehensive knowledge and practical skills in managing information systems (MIS), database management, information system applications, and project management using modern tools and methodologies. Students will learn to analyze, design, and implement effective MIS solutions in various business contexts

After the completion of the course, the students will be able to:

COs	Course outcome	Bloom's Taxonomy
CO1	Define the basic concepts, types, dimensions, and components of MIS, and evaluate the benefits and evolution of IT infrastructure in the digital firm era.	BT-I
CO2	Illustrate and Interpret project management objectives and methodologies, including agile practices such as SCRUM, and manage projects effectively to control risk factors and understand ethical, social, and political issues in the information era	BT-II
CO3	Apply database management principles by setting up and managing DBMS packages, creating Entity-Relationship diagrams, and understanding data models, data warehouses, and administration techniques.	BT-III
CO4	Analyze various MIS applications, including DSS, GDSS, and knowledge management systems, and develop e-commerce solutions by leveraging enterprise models, business process reengineering, and digital communication strategies	BT-IV

Modules	Course Content	Periods
I	Fundamentals concepts of MIS Basics concepts of MIS/ Types of MIS, Dimension and components of IS, Benefits of MIS, IT infrastructure, and IT infrastructure evolution, Components of IT infrastructure, New approaches for system building in the digital firm era	17
II	Data base management system: Objectives of data base approach- Characters of database Management systems- Data processing system- Components of DBMS packages - Data base administration- Entity – Relationship (conceptual)	16
III	Information system applications: MIS applications, DSS – GDSS - DSS applications in E enterprise - Knowledge Management System and Knowledge Based Expert System - Enterprise Model System and E-Business, E- Commerce, E-communication, Business Process Reengineering.	16
IV	Managing Projects : Objectives of project management, Fundamentals of project management information systems with agile methodologies -Introduction of SCRUM, Roles and meetings, User	17

	stories, Project risk, Controlling risk factors, Ethical, social, and political issues in the information era.

Introduction to Financial Management (Open Minor)

Subject Code: BSA032N402	Course Level 200
Credit Unit: 3	Scheme of Evaluation: (T)
L-T-P-C=2-1-0-3	

Course Objective:

The course aims to provide an understanding of the concept of finance and how influential the time value of money is. It further familiarizes the learners with various Principles and practices of financial management while pursuing them with the various decisions involved in managing finance.

After the completion of the course, the students will be able to:

COs	Course outcome	Bloom's Taxonomy
CO1	Define key financial management terms and concepts.	BT-I
CO2	Interpret financial data presented in statements and reports.	BT-II
CO3	Apply financial management techniques to solve real-world financial problems.	BT-III

Modules	Course Content	Periods
I	INTRODUCTION Nature, Scope, and Functions of Financial Management, Profit vs Wealth Maximization. Risk and Return, Time value of money. Calculating Present and Future Value. Valuation of securities – Bonds and Equities	17
II	INVESTMENT DECISIONS The Capital Budgeting Process, Cash flow Estimation, Payback Period Method, Accounting Rate of Return, Net Present Value (NPV), Net Terminal Value, Internal Rate of Return (IRR).	16
III	FINANCING DECISION Defining Capital Structure, Determinants of Capital Structure, Relevance of Capital Structure- NI & Traditional Views, Irrelevance of Capital Structure- NOI Approach and MM Theory, Optimum Capital Structure. Meaning of Financial Leverage & its Measures, Financial Leverages, and the Shareholder's Return, Combining Financial and Operating Leverage.	16
IV	DIVIDEND DECISION & WORKING CAPITAL DECISION Dividend Policy: Meaning and Kinds of Dividend, Theories on Dividend Policies, Practical Considerations in Dividend policy, Relevance of dividend policy on Firm's Value, Factors influencing a Firm's dividend policy. Project Management (Closed Minor)

Subject Code: BSA032N404	Course Level 200
Credit Unit: 3	Scheme of Evaluation: (T)
L-T-P-C=2-1-0-3	

Course Objective:

This course is designed to introduce students to the fundamental aspects of planning, executing, monitoring, and closing projects across diverse industries. The course emphasizes the use of project management tools, particularly Microsoft Project, to manage timelines and resources efficiently. Through exploring risk management, stakeholder communication, and Agile methodologies, students will develop the critical thinking and practical skills necessary for successful project management.

After the completion of the course, the students will be able to:

COs	Course Outcome	Bloom's Taxonomy
CO1	Define the fundamental principles, key phases, processes, and core concepts of project management, including scope, time, cost, and quality.	BT-I
CO2	Interpret project management frameworks and explain their application in real-world projects.	BT-II
CO3	Develop skills in stakeholder management and communication strategies essential for project success	BT-III
CO4	Analyze project scenarios to identify potential risks, resource constraints, and critical success factors.	BT-IV

Module	Course content	Period
CO1	Fundamentals of Project Management : This unit covers the core concepts of project management, including the project life cycle, the role of the project manager, and the organizational context of projects. Students will learn about the stages of a project from initiation to closure and the key responsibilities of a project manager in driving project success.	17
CO2	Project Planning and Tools: Focusing on the planning phase of project management, this unit explores setting project scope and objectives, developing a Work Breakdown Structure (WBS), and managing time through scheduling techniques such as Gantt charts and PERT/CPM. Practical application includes using Microsoft Project to create and manage schedules, emphasizing the integration of project management tools to streamline project planning.	16
CO3	Executing and Monitoring Projects : This unit delves into resource allocation, budgeting, and quality control within project execution. Students will also learn about risk management processes including identification, analysis, and response strategies. Practical exercises will include resource management and performance tracking using Microsoft Project, highlighting effective control measures to ensure project alignment with planned objectives.	17
CO4	Concluding Projects and Agile Methodologies: The final unit discusses the closing phase of projects, including performance measurement, stakeholder communication, and post-project evaluation.	16

	Additionally, this unit introduces Agile project management principles and the Scrum framework, comparing Agile with traditional project management methods to provide students with a broader understanding of managing projects in dynamic environments.

SEMESTER – V

Production and Operation Management

Subject Code: BSA032M501	Course Level 300
Credit Unit: 4	Scheme of Evaluation: (T)
L-T-P-C=3-1-0-4	

Course Objective: This course aims to improve students understanding of the concepts, principles, problems, and practices of operations management for effective operations in both goods- producing and service-rendering organization.

After the completion of the course, the students will be able to:

COs	Course outcome	Bloom's Taxonomy
CO1	Identify key concepts in production and operations management.	BT I
CO2	Summarize the factors influencing production and operations decisions.	BT II
CO3	Apply production planning techniques to optimize resource utilization.	BT III
CO4	Evaluate different production and operations strategies in terms of their impact on organizational performance.	BT IV

Modules	Course Content	Periods
I	Introduction to Production and Operations Management Introduction, Operations and Productivity, Types and Characteristics of Manufacturing systems, Services Systems, Design of Work Systems - Method study and work measurement, measuring productivity, ways of improving productivity. Recent trends in Production and Operations Management, Global Challenges of Production and Operations Management	22
II	Designing of Production and Operations Management Designing of Goods and Services – Product Design, Issues in product design, Service design, Facility Location analysis – steps, techniques, factors affecting location analysis. Facility Layout Analysis – types of layouts, factors affecting layout, assembly line balancing.	22
III	Managing Production and Operations Management Inventory Management: Basic Inventory models, EOQ Models, Concept of Safety Stock, Material Requirement Planning (MRP), Aggregate Planning: Different types of aggregate planning strategies.	22
IV	Quality Management Nature and Evolution of Quality Management, Contribution of Quality Gurus, Total Quality Management concepts, Quality control tools	22

AI in Business (Adopted from Model AICTE BBA Four Year Syllabus)

Subject Code:BSA032M701	Course Level :400
Credit Unit: 4	Scheme Of Evaluation: (T)
L-T-P-C=3-1-0-4	

Course Objective:

AI for Business course is designed to equip students with a thorough understanding of how artificial intelligence (AI) can be strategically applied in various business contexts. The primary objective is for students to learn how to deploy AI technologies effectively while managing the ethical considerations inherent in such implementations.

Methodology

The teaching methodology employs lectures and real-time, case-based AI applications cross different business sectors.

Content:

Unit 1: Converging Technologies: Big Data Overview, V's of Big Data, Big Data Analysis, IoT, Cloud Computing, Data Management Infrastructure, Data Analysis: Extracting Intelligence from Big Data, Changing organization Culture/Strategy/ Role of Practicing Managers, People Component of BigData & AI

Unit 2: Introduction to AI: History & Evolution of AI , AI-Driven Business Transformation, Overview of AI technologies namely Machine Learning, Deep Learning, Natural Language Processing, Computer Vision, Robotics, Generative AI, Case study analysis of AI's impact on different industries.

Unit 3: AI Applications in Business: AI in Finance – AI in algorithmic trading, Credit scoring models using machine learning, Fraud detection, AI in Customer Relationship Management - Personalization and recommendation systems, Chatbots and virtual assistants, Predictive customer analytics, AI in Human Resource Management – AI-driven recruitment and selection processes, Employee performance analytics, AI in workforce planning and talent management.

Unit 4: Ethics in AI: Bias, fairness, and transparency, Responsible AI practices for leaders, Mitigating ethical risks in AI/ML deployment, Societal and legal aspects of AI.

Text Books (Latest Edition):

- Artificial Intelligence by Munish Trivedi
- Artificial Intelligence for Managers by Malay A. Upadhyay
- AI Rising: India's Artificial Intelligence Growth Story, Leslie D'Monte, Jayanth N. Kolla

Subject Code:BSA032M702	Course Level :400
Credit Unit: 4	Scheme Of Evaluation: (T)
L-T-P-C=3-1-0-4	

Course Objective:

The course aims to provide students with comprehensive knowledge and practical skills in the field of Enterprise Resource Planning (ERP). Students will learn to design, implement, and manage ERP systems, as well as understand advanced ERP features and future trends, using various free or student-accessible tools.

After the completion of the course, the students will be able to:

COs	Course Outcome	Bloom's Level
CO1	Define fundamental concepts and components of enterprise systems and platforms including ERP, SCM, and CRM.	BT-I
CO2	Explain the architecture, functionalities, and benefits of different enterprise platforms in supporting business processes	BT-II
CO3	Identify the use of enterprise resource planning (ERP) tools and platforms for solving real-world business problems.	BT-III
CO4	Analyze how integration of enterprise platforms like ERP, SCM, and CRM enhances decision-making and organizational efficiency.	BT-IV

Detailed Syllabus:

Module	Course Content	Periods
I	Introduction to Enterprise Resource Systems : Overview of Enterprise Resource Planning (ERP), Definition and Evolution of ERP, Key Drivers for ERP Implementation, ERP Components and Architecture, Core Modules (Finance, HR, Supply Chain, etc.), Common Challenges and Solutions	22
II	ERP System Design and Architecture ERP System Design, System Development Life Cycle (SDLC) for ERPs, Customization vs. Standardization, ERP Architecture, Three-Tier Architecture, Integration of ERP with Other Systems, ERP Vendors and Solutions, Overview of Major ERP Vendors (SAP, Oracle, Microsoft, etc.), Comparison of ERP Solutions	22
III	ERP Implementation and Management: Implementation Strategies, Planning and Preparation, Data Migration and Integration, Project Management for ERP Implementation, Project Planning and Execution, Risk Management and Mitigation, Post-Implementation Activities, Training and Support, Continuous Improvement and Maintenance.	22

IV	Advanced Topics and Future Trends in ERP : Advanced ERP Features, Business Intelligence and Analytics, Cloud-Based ERP Solutions, Emerging Trends in ERP, Internet of Things (IoT) and ERP Integration, Artificial Intelligence and Machine Learning in ERPs, Impact of ERP on Business Strategy, Strategic Decision Making with ERP, ERP and Digital Transformation	22

Quality Management and Business Process Improvement

Subject Code:BSA032M703	Course Level :400
Credit Unit: 4	Scheme Of Evaluation: (T)
L-T-P-C=3-1-0-4	

Course Objective:

The course aims to develop students' capacity in creating and executing innovative strategies, overseeing innovation initiatives, and leading teams with diverse areas of expertise. They shall possess expertise in innovative systems, public programmers, and external finance, and have the ability to provide practical ideas and problem-solving skills.

COs	Course Outcome	Bloom's Level
CO1	Define the concepts and methodologies related to technology and innovation management	BT-I
CO2	Interpret the problems, employ critical analysis, and provide innovative solutions to challenges	BT-II
CO3	Apply the life cycle concept of technology manage innovation	BT-III
CO4	Analyze the innovation strategies for decision making.	BT-IV

Detailed Syllabus:

Module	Course Content	Periods
I	Evolution of Markets: innovation adoption, diffusion, market growth, new product entry, competitor responses, understanding customer needs, product development as a problem-solving process, Key drivers of innovation, Sources of innovation, Types of Innovation, Scope and content of innovation management, strategic analysis frameworks of innovation management.	22
II	Introduction to Technology; Classification of technology; Management of Technology (MOT), Conceptual framework for MOT, Critical factors in managing technology – creativity factor, invention and innovation, technology-price relationship, change strategies	22
III	Management of Technology: New Paradigms, Issues in managing technology – resources ,business environment, structure and management of organizations, project planning and management, management of human resources	22
IV	Technology Lifecycle S curve of technology processes, technology and market interaction, competition at different phases of the technology lifecycle, diffusion of technologies Process of technological innovation, technology audit model and TAM.	22

Environmental Science and Sustainability (Open Minor)

Subject Code:BSA032M801	Course Level :400
Credit Unit: 4	Scheme Of Evaluation: (T)
L-T-P-C=3-1-0-4	

Course description:

This course aims to familiarize students with fundamental environmental concepts and their relevance to business operations, preparing them to address forthcoming sustainability challenges. It is designed to equip students with the knowledge and skills needed to make decisions that account for environmental consequences, fostering environmentally sensitive and responsible future managers. The course content is divided into four comprehensive units.

Unit 1 introduces basic environmental principles, the man-environment relationship, and sustainability issues. Unit 2 focuses on ecosystems, biodiversity, and sustainable practices. Unit 3 addresses environmental pollution, waste management, and sustainable development strategies. Finally, Unit 4 explores social issues, environmental legislation, and practical applications through hands-on fieldwork. Through this holistic approach, students will gain a deep understanding of environmental processes, the importance of sustainable practices, and their role in promoting sustainability within business contexts.

Course Objective(s):

1. This course aims to familiarize students with basic environmental concepts, their relevance to business operations, and forthcoming sustainability challenges.
2. This course will equip students to make decisions that consider environmental consequences.
3. This course will enable future business graduates to become environmentally sensitive and responsible managers.

Course Content:

Unit 1: Understanding Environment, Natural Resources, and Sustainability Fundamental environmental concepts and their relevance to business operations; Components and segments of the environment, the man-environment relationship, and historical environmental movements. Concept of sustainability; Classification of natural resources, issues related to their overutilization, and strategies for their conservation. Sustainable practices in managing resources, including deforestation, water conservation, energy security, and food security issues. The conservation and equitable use of resources, considering both intergenerational and intergenerational equity, and the

importance of public awareness and education.

Unit 2: Ecosystems, Biodiversity, and Sustainable Practices Various natural ecosystems, learning about their structure, functions, and ecological characteristics. The importance of biodiversity, the threats it faces, and] the methods used for its conservation. Ecosystem resilience, homeostasis, and carrying capacity, emphasizing the need for sustainable ecosystem management. Strategies for in situ and ex situ conservation, nature reserves, and the significance of India as a mega diverse nation.

Unit 3: Environmental Pollution, Waste Management, and Sustainable Development Various types of environmental pollution, including air, water, noise, soil, and marine pollution, and their impacts on businesses and communities. Causes of pollution, such as global climate change, ozone layer depletion, the greenhouse effect, and acid rain, with a particular focus on pollution episodes in India. Importance of adopting cleaner technologies; Solid waste management; Natural and man-made disasters, their management, and the role of businesses in mitigating disaster impacts.

Unit 4: Social Issues, Legislation, and Practical Applications Dynamic interactions between society and the environment, with a focus on sustainable development and environmental ethics. Role of businesses in achieving sustainable development goals and promoting responsible consumption. Overview of key environmental legislation and the judiciary's role in environmental protection, including the Water (Prevention and Control of Pollution) Act of 1974, the Environment (Protection) Act of 1986, and the Air (Prevention and Control of Pollution) Act of 1981. Environmental justice, environmental refugees, and the resettlement and rehabilitation of affected populations; Ecological economics, human population growth, and demographic changes in India.

Course Outcome(s):

1. Explore the basic environmental concepts and issues relevant to the business and management field.
2. Recognize the interdependence between environmental processes and socio-economic dynamics.

3. Determine the role of business decisions, policies, and actions in minimizing environmental degradation.
4. Identify possible solutions to curb environmental problems caused by managerial actions.
5. Develop skills to address immediate environmental concerns through changes in business operations, policies, and decisions.

SEMESTER -VII
TRACK B
BBA Hons. With
Research

Research Design and Synopsis

Subject Code: BSA032M701R

Course Level: 400

Credit Unit: 4

Scheme of Evaluation: (T) L-T-P-C = 3-1-0-4

Course Objective

This course aims to build students' foundational competence in the logic and craft of research. Students will learn to identify and formulate a research problem, choose an appropriate research design and sampling strategy, apply correct measurement and scaling techniques, and translate all of this into a complete, defensible research synopsis/proposal — the document that anchors the fieldwork and analysis to follow in the next course.

COs	Course Outcome	Bloom's Taxonomy
CO1	Define key concepts and terminology of the research process — research problem, hypothesis, variables, research design.	BT-I
CO2	Explain the logic of different research designs, sampling techniques, and measurement/scaling approaches.	BT-II
CO3	Apply an appropriate research design, sampling method, and measurement scale to a chosen research problem.	BT-III
CO4	Analyze a research idea and structure it into a complete synopsis — objectives, hypotheses, literature review, and proposed methodology.	BT-IV

Detailed Syllabus

Module	Course Content	Periods
I	Introduction to Research Meaning, objectives and motivation for research; types of research — basic, applied, descriptive, analytical, quantitative, qualitative, conceptual, empirical; the research process and its stages; criteria of good research. Identifying, selecting and defining a research problem. Research questions and hypotheses — meaning, types, characteristics of a good hypothesis, formulation of hypotheses. Review of literature — purpose, sources, techniques, identifying the research gap. Ethical considerations in research (informed consent, confidentiality, integrity of data).	22
II	Research Design Meaning and need for research design; features of a good design. Exploratory, descriptive, and causal/experimental research design. Types of experimental design (informal and formal); case study method; cross-sectional vs longitudinal design. Variables in research — dependent, independent, extraneous, moderating and mediating; operationalization of variables. Validity and reliability as properties of a research design.	22
III	Sampling and Measurement Sample vs census; steps and criteria in sampling design. Probability sampling (simple random, stratified, systematic, cluster, multistage) and non-probability sampling (convenience, judgmental, quota, snowball). Basics of sample size determination. Scales of measurement — nominal, ordinal, interval, ratio. Scaling techniques — Likert scale, semantic differential, rating scales. Sources of measurement error.	22
IV	Research Proposal and Synopsis Writing Meaning and importance of a research proposal/synopsis. Components of a synopsis — title, introduction, statement of the problem, objectives, review of literature, hypotheses, proposed research methodology, scope and limitations, tentative chapterization, tentative bibliography. Format and structure as per university/AICTE	22

Module	Course Content	Periods
	guidelines. Presentation and defense of a synopsis before a committee. Plagiarism and citation styles (APA/MLA). Introduction to reference management tools (Mendeley/Zotero).	
	Total	88

Enterprise System and Platforms

Subject Code:BSA032M702 R	Course Level :400
Credit Unit: 4	Scheme Of Evaluation: (T)
L-T-P-C=3-1-0-4	

Course Objective:

The course aims to provide students with comprehensive knowledge and practical skills in the field of Enterprise Resource Planning (ERP). Students will learn to design, implement, and manage ERP systems, as well as understand advanced ERP features and future trends, using various free or student-accessible tools.

After the completion of the course, the students will be able to:

COs	Course Outcome	Bloom's Level
CO1	Define fundamental concepts and components of enterprise systems and platforms including ERP, SCM, and CRM.	BT-I
CO2	Explain the architecture, functionalities, and benefits of different enterprise platforms in supporting business processes	BT-II
CO3	Identify the use of enterprise resource planning (ERP) tools and platforms for solving real-world business problems.	BT-III
CO4	Analyze how integration of enterprise platforms like ERP, SCM, and CRM enhances decision-making and organizational efficiency.	BT-IV

Detailed Syllabus:

Module	Course Content	Periods
I	Introduction to Enterprise Resource Systems : Overview of Enterprise Resource Planning (ERP), Definition and Evolution of ERP, Key Drivers for ERP Implementation, ERP Components and Architecture, Core Modules (Finance, HR, Supply Chain, etc.), Common Challenges and Solutions	22
II	ERP System Design and Architecture ERP System Design, System Development Life Cycle (SDLC) for ERPs, Customization vs. Standardization, ERP Architecture, Three-Tier Architecture, Integration of ERP with Other Systems, ERP Vendors and Solutions, Overview of Major ERP Vendors (SAP, Oracle, Microsoft, etc.), Comparison of ERP Solutions	22
III	ERP Implementation and Management: Implementation Strategies, Planning and Preparation, Data Migration and Integration, Project Management for ERP Implementation, Project Planning and Execution, Risk Management and Mitigation, Post-Implementation Activities, Training and Support, Continuous Improvement and Maintenance.	22

IV	Advanced Topics and Future Trends in ERP : Advanced ERP Features, Business Intelligence and Analytics, Cloud-Based ERP Solutions, Emerging Trends in ERP, Internet of Things (IoT) and ERP Integration, Artificial Intelligence and Machine Learning in ERPs, Impact of ERP on Business Strategy, Strategic Decision Making with ERP, ERP and Digital Transformation	22

Quality Management and Business Process Improvement

Subject Code:BSA032M703 R	Course Level :400
Credit Unit: 4	Scheme Of Evaluation: (T)
L-T-P-C=3-1-0-4	

Course Objective:

The course aims to develop students' capacity in creating and executing innovative strategies, overseeing innovation initiatives, and leading teams with diverse areas of expertise. They shall possess expertise in innovative systems, public programmers, and external finance, and have the ability to provide practical ideas and problem-solving skills.

COs	Course Outcome	Bloom's Level
CO1	Define the concepts and methodologies related to technology and innovation management	BT-I
CO2	Interpret the problems, employ critical analysis, and provide innovative solutions to challenges	BT-II
CO3	Apply the life cycle concept of technology manage innovation	BT-III
CO4	Analyze the innovation strategies for decision making.	BT-IV

Detailed Syllabus:

Module	Course Content	Periods
I	Evolution of Markets: innovation adoption, diffusion, market growth, new product entry, competitor responses, understanding customer needs, product development as a problem-solving process, Key drivers of innovation, Sources of innovation, Types of Innovation, Scope and content of innovation management, strategic analysis frameworks of innovation management.	22
II	Introduction to Technology; Classification of technology; Management of Technology (MOT), Conceptual framework for MOT, Critical factors in managing technology – creativity factor, invention and innovation, technology-price relationship, change strategies	22
III	Management of Technology: New Paradigms, Issues in managing technology – resources ,business environment, structure and management of organizations, project planning and management, management of human resources	22
IV	Technology Lifecycle S curve of technology processes, technology and market interaction, competition at different phases of the technology lifecycle, diffusion of technologies Process of technological innovation, technology audit model and TAM.	22

Legal Aspects of Business

Subject Code:BSA032M704 R	Course Level :400
Credit Unit: 4	Scheme Of Evaluation: (T)
L-T-P-C=3-1-0-4	

Course Objective:

The course aims to enhance students' understanding of legal issues in business, enabling business managers to make decisions in line with local laws, understanding the basic nature of law, dispute resolution, and its connection to various fields.

COs	Course Outcome	Bloom's Taxonomy
CO1	Outline the various laws on business	BT-I
CO2	Explain the fundamental legal principles behind contractual Agreements	BT-II
CO3	Identify the rules and regulations impacting managerial functions	BT-III
CO4	Examine the legal aspects of business using cases.	BT-IV

Detailed Syllabus:

Module	Course Content	Periods
I	Indian Mercantile Law – concept and elements - Law of contract: Nature – classification - Agreement and Contract - Offer and Acceptance - Consideration and Capacity to Contract - Free Consent, Performance & Discharge of Contract - Breach of Contract - Contract of Agency. The Sale- of Goods Act : Contract of sale: Essentials of a Contract of Sale, Sale & Agreement of Sale distinguished, Goods- Meaning and Classification, Effect of Perishing of Goods, Price & Mode of Fixation of Price. Conditions & Warranties: Conditions defined & Kinds of Conditions, Warranties defined & Kinds of Warranties, Doctrine of Caveat Emptor, Transfer of Ownership in Goods, Passing of Risk. Unpaid Seller: Unpaid Seller defined, Rights of unpaid seller.	22
II	Law relating to Partnership: The Law of Partnership: Definition of Partnership & its Essential Characteristics, True test of Partnership, Formation of Partnership. Registration of a firm, Effects of Non- Registration, Rights & Duties of a Partner, Liability of a Partner, Implied Authority of Partner. Distinction between Dissolution of a Partnership & Dissolution of a Firm, Reconstitution and Dissolution of a Firm. Limited Liability Partnership (LLP): Meaning & Nature of LLP, Advantages of LLP, Main Features of LLP, LLP Vs. Partnership, LLP Vs. Company, LLP Agreement, Incorporation of LLP, Accounts & Return, Winding UP & Dissolution.	22
III	The Consumer Protection Act,2019: Genesis of Consumer Protection Law in India, Objects, Applicability, Basic definitions and Concepts, Rights of Consumers, Consumer Protection Councils, Central Consumer Protection Authority, Concept of Product Liability Redressal Mechanism under CP Law, Nature & Scope of Remedies available to Consumers. Intellectual Property Rights: Regulatory Structure and compliance, The Patent Act, 1970, The Copyright Act, 1957 and The Trade Mark Act, 1999	22

IV	Introduction to company law: Scope of Company's Act, 2013, Machineries set up for company law administration, Meaning, Nature & features of a company, Kinds of Companies, Lifting the corporate veil. Formation of a company: Promotion of a company, Promoters & their Position, Incorporation of a company, Memorandum of Association, Articles of Association Conversion of companies already registered, Doctrine of Ultra-Vires. Prospectus and Allotment of Securities: Public offer Vs. Private Placement, Prospectus & its contents, Statement in lieu of Prospectus, Shelf Prospectus, Red herring prospectus, Golden rule of framing of Prospectus, Misstatement in Prospectus & Remedies for misstatement, Allotment of shares, Irregular Allotment & its effects. Share Capital: Kinds of share capital, Voting rights, Transfer and Transmission of Securities, Issue of Sweat equity shares, Issue of Right & Bonus shares, Power of company to purchase its own securities, Issue of shares at a premium. Membership of a company: Member & Shareholder, Eligibility for membership, Modes of acquiring membership, Termination of membership, Rights & Liabilities of members. Company Administration & Meetings: Board of Directors: Board Constitution & Powers, Board Composition, Board Committee Directors & Types of Directors, Appointment & Reappointment of Directors, , Disqualifications of Directors, Vacation of office, Resignation, Retirement & Removal of Directors , Removal& Resignation of Directors, Rights & Duties of Directors. Board Meetings & General Meetings: Requisites of a valid Meeting, Resolutions, Minutes, Types of General Meetings, Voting & its types. Accounts of Companies: Books of Accounts, Financial Statements, Annual Return, Annual Report.	22

Business Ethics and Sustainability Development

Subject Code: BSA032M801 R	Course Level :400
Credit Unit: 4	Scheme Of Evaluation: (T)
L-T-P-C=3-1-0-4	

Course Objective:

The course aims to impart abilities or practical skills to study, understand, analyze, criticize, and manage ethical problems related to business, sustainability issues, corporate social responsibility through corporate governance and laws and regulations.

COs	Course Outcome	Bloom's Taxonomy Level
CO1	Define the theoretical frameworks of business ethics and values	BT-I
CO2	Interpret the ethical problems related to various functions of management	BT-II
CO3	Apply the key principles of sustainability in business practice	BT-III
CO4	Analyze the efficacy of sustainability initiatives/plans.	BT-IV

Detailed Syllabus:

Module	Course Content	Periods
I	Conceptual Framework of Business Ethics: Business ethics, Nature of ethics as moral value, Ethics vs. Law, Culture vs. Universal Norms, Sustainability of eastern values to western business, Pragmatism ethics, Criticism of socialism, social market economy, Ethical decision-making, Decision-making process, Classification of decision making	22
II	Ethical Foundation in Business: Purpose of business: profit maximization to CSR, Western teleological, deontological and modern theories, Workplace ethics-hiring, employee promotion, discharge, gender and caste discrimination, sexual harassment, Marketing ethics-pricing, packaging, advertising, product promotion, consumer safety, financial ethics-transparent system, financial record keeping, financial disclosures, Organizational ethics-abuse of official position, bribes, gifts, entertainment, whistle blowing	22
III	Introducing Sustainability: Sustainability in relation to business organization, Issues related to environment, Conserving resources, Carbon footprint, Pollution & carbon emission, Safeguarding communities and bio-diversities, Environmental Impact Assessment (EIA)	22
IV	Global Perspective of Sustainability: MDGs and SDGs, UN's agenda for sustainable development for 2030, Creating sustainable and equitable economy, Creating environmentally sustainable economy, Triple bottom line approach, corporate environment responsibility.	22

Data Collection, Analysis and Report Writing

Subject Code:BSA032M802R

Course Level: 400

Credit Unit: 8

Scheme of Evaluation: (T+P) L-T-P-C = 4-2-4-8

Course Objective

This course carries forward the methodology finalized in *Research Design and Synopsis* into execution. Students will collect primary and secondary data using the instruments they designed, prepare and clean that data, apply appropriate statistical and qualitative analysis techniques using software tools (Excel/SPSS/R and NVivo), interpret results against their stated objectives and hypotheses, and produce a complete, professionally structured research/project report that they can defend at viva.

COs	Course Outcome	Bloom's Taxonomy
CO1	Define methods and tools of data collection and the major categories of data analysis techniques.	BT-I
CO2	Explain the principles of questionnaire design, data preparation, and statistical techniques used for hypothesis testing.	BT-II
CO3	Apply appropriate data collection instruments and statistical software tools to collect, code, and analyze primary/secondary data.	BT-III
CO4	Analyze quantitative and qualitative data to test hypotheses and draw inferences relevant to the research problem.	BT-IV
CO5	Evaluate analyzed data and findings against the study's original objectives to judge their validity and implications.	BT-V
CO6	Design, compile and defend a complete research/project report that meets academic and professional reporting standards.	BT-VI

Detailed Syllabus

Module	Course Content	Periods
I	Data Collection Methods Primary vs secondary data; sources of secondary data (government reports, databases, journals). Methods of primary data collection — survey, observation, interview, focus group discussion, case study, experimentation. Questionnaire design — types of questions, do's and don'ts, pilot testing; schedule vs questionnaire. Sampling frame and fieldwork management. Online data collection tools (Google Forms, SurveyMonkey). Sources of error in data collection and ensuring data quality/validity of the collected data.	22
II	Data Preparation and Preliminary Analysis Editing, coding, classification and tabulation of data. Data cleaning — handling missing values and outliers. Data entry into software (Excel/SPSS). Frequency distribution and cross-tabulation. Diagrammatic and graphical representation of data. Measures of central tendency and dispersion. Generating descriptive statistics using software.	22
III	Statistical Analysis I — Univariate and Bivariate Techniques Hypothesis testing — concept, Type I and Type II errors, level of	22

Module	Course Content	Periods
	significance. Parametric tests: t-test (one-sample, independent, paired), Z-test, one-way and two-way ANOVA. Non-parametric tests: Chi-square test, Mann-Whitney U, Kruskal-Wallis. Correlation analysis (Karl Pearson, Spearman). Simple linear regression.	
	Statistical Analysis II — Multivariate Techniques	
IV	Multiple regression analysis. Introduction to Factor Analysis, Cluster Analysis, and Discriminant Analysis. Overview of Structural Equation Modelling (SEM) — concept and applications. Reliability testing (Cronbach's alpha) and validity assessment. Running and interpreting multivariate analysis output using SPSS/R.	22
	Qualitative Data Analysis	
V	Nature and importance of qualitative data. Transcription of interviews/FGDs. Content analysis and thematic analysis. Coding qualitative data — open, axial, selective coding. Basics of qualitative data analysis software (NVivo). Triangulation and mixed-method analysis. Rigor in qualitative research — credibility, transferability, dependability, confirmability.	22
	Report Writing and Presentation	
VI	Purpose and types of reports. Structure of a research/project report — preliminary pages; Introduction; Review of Literature; Methodology; Data Analysis & Interpretation; Findings; Conclusions & Recommendations; Limitations; Bibliography; Annexures. Referencing and citation styles (APA/MLA/Chicago). Plagiarism checking (Turnitin/Urkund) and academic integrity. Executive summary writing. Effective presentation techniques and viva-voce preparation. Basics of research paper writing for journal submission.	22
	Total (L/T)	132

Social Media and Web Analytics

Subject Code:BSA032M803 R	Course Level :400
Credit Unit: 4	Scheme Of Evaluation: (T)
L-T-P-C=3-1-0-4	

Course Objective:

This course aims to equip students with the knowledge and skills to effectively leverage social media for marketing. Students will learn to develop comprehensive social media marketing plans, utilize analytics tools, manage social media data, and execute campaigns across various platforms to drive engagement, lead generation, and conversions.

COs	Course Outcome	Blooms Taxonomy
CO1	Define key concepts and terminologies related to social media platforms and web analytics.	BT-I
CO2	Explain the working principles of social media tools and web analytics techniques used to assess user engagement and digital marketing performance	BT-II
CO3	Apply various social media strategies and analytics tools (such as Google Analytics, Facebook Insights) to monitor and improve campaign effectiveness.	BT-III
CO4	Analyze data collected from web and social platforms to extract actionable insights and optimize digital content strategy	BT-IV

Detailed Syllabus:

Module	Course Content	Periods
I	Introduction: Social media and its role within Marketing, Rules of engagement for Social media marketing Target audience – Influencers – Message/Content, Developing a Social media marketing plan Scope and marketing utility of blogging, micro-blogging, Using blogs for brand building & lead generation, Blog Analytics and Performance Tracking, social networks, social bookmarking, collaboration, video sharing, podcasts, picture sharing, live streaming, webinars	22
II	Social Media Data Management : Social media analytics, social media metrics – Introduction to analytics tools for popular social media (Facebook, Twitter, LinkedIn, YouTube, Instagram), Social media monitoring and Online reputation management.	22
III	Social Media Measurements: Pay per Click Marketing (PPC)-Definition, Need ,Google AdWords Account Structure, Facebook PPC Account Structure, CPC & “Click-through-Rate” (CTRs), “Cost/Conversion, Method of increasing CTR & Conversion, Tracking Code, Doing Keyword Research for PPC, Difference between SEO & PPC keywords, Ads for PPC Campaigns, Bidding, Quality Score, Score Effect on Bids, Increase Position on Search, Conversion rates, ‘Calls to Action’ (CTA), Cost/Conversion, PPC reporting structure, Campaign Performance Reports	22
IV	Introduction to Web Analytics Definition and Importance of Web Analytics, Key Metrics: Page Views, Visits, Unique Visitors, Bounce Rate, Conversion Rate, Understanding Website Traffic Sources: Direct, Referral, Organic, Paid Google Analytics Fundamentals: Setting Up Google Analytics Account, Tracking Code Implementation,	22

	Dashboard Overview and Customization, Understanding Reports: Real-Time, Audience, Acquisition, Behavior, and Conversions

Environmental Science and Sustainability (Open Minor)

Subject Code:BSA032M801	Course Level :400
Credit Unit: 4	Scheme Of Evaluation: (T)
L-T-P-C=3-1-0-4	

Course description:

This course aims to familiarize students with fundamental environmental concepts and their relevance to business operations, preparing them to address forthcoming sustainability challenges. It is designed to equip students with the knowledge and skills needed to make decisions that account for environmental consequences, fostering environmentally sensitive and responsible future managers. The course content is divided into four comprehensive units.

Unit 1 introduces basic environmental principles, the man-environment relationship, and sustainability issues. Unit 2 focuses on ecosystems, biodiversity, and sustainable practices. Unit 3 addresses environmental pollution, waste management, and sustainable development strategies. Finally, Unit 4 explores social issues, environmental legislation, and practical applications through hands-on fieldwork. Through this holistic approach, students will gain a deep understanding of environmental processes, the importance of sustainable practices, and their role in promoting sustainability within business contexts.

Course Objective(s):

1. This course aims to familiarize students with basic environmental concepts, their relevance to business operations, and forthcoming sustainability challenges.

2. This course will equip students to make decisions that consider environmental consequences.
3. This course will enable future business graduates to become environmentally sensitive and responsible managers.

Course Content:

Unit 1: Understanding Environment, Natural Resources, and Sustainability Fundamental environmental concepts and their relevance to business operations; Components and segments of the environment, the man-environment relationship, and historical environmental movements. Concept of sustainability; Classification of natural resources, issues related to their overutilization, and strategies for their conservation. Sustainable practices in managing resources, including deforestation, water conservation, energy security, and food security issues. The conservation and equitable use of resources, considering both intergenerational and intergenerational equity, and the importance of public awareness and education.

Unit 2: Ecosystems, Biodiversity, and Sustainable Practices Various natural ecosystems, learning about their structure, functions, and ecological characteristics. The importance of biodiversity, the threats it faces, and] the methods used for its conservation. Ecosystem resilience, homeostasis, and carrying capacity, emphasizing the need for sustainable ecosystem management. Strategies for in situ and ex situ conservation, nature reserves, and the significance of India as a mega diverse nation.

Unit 3: Environmental Pollution, Waste Management, and Sustainable Development Various types of environmental pollution, including air, water, noise, soil, and marine pollution, and their impacts on businesses and communities. Causes of pollution, such as global climate change, ozone layer depletion, the greenhouse effect, and acid rain, with a particular focus on pollution episodes in India. Importance of adopting cleaner technologies; Solid waste management; Natural and man-made disasters, their management, and the role of businesses in mitigating disaster impacts.

Unit 4: Social Issues, Legislation, and Practical Applications Dynamic interactions between society and the environment, with a focus on sustainable development and environmental ethics. Role of businesses in achieving sustainable development goals and promoting responsible consumption. Overview of key environmental legislation and the judiciary's role in environmental protection, including the Water (Prevention and Control of Pollution) Act of 1974, the Environment (Protection) Act of 1986, and the Air (Prevention and Control of Pollution) Act of 1981. Environmental justice, environmental refugees, and the resettlement and rehabilitation of affected populations; Ecological economics, human population growth, and demographic changes in India.

Course Outcome(s):

1. Explore the basic environmental concepts and issues relevant to the business and management field.

2. Recognize the interdependence between environmental processes and socio-economic dynamics.

3. Determine the role of business decisions, policies, and actions in minimizing environmental degradation.

4. Identify possible solutions to curb environmental problems caused by managerial actions.

5. Develop skills to address immediate environmental concerns through changes in business operations, policies, and decisions.
