Preamble

The National Education Policy (NEP) 2020 conceives a new vision for India's higher education system. It recognizes that higher education plays an extremely important role in promoting equity, human as well as societal well-being and in developing India as envisioned in its Constitution. It is desired that higher education will significantly contribute towards sustainable livelihoods and economic development of the nation as India moves towards becoming a knowledge economy and society.

If we focus on the 21st century requirements, the higher education framework of the nation must aim to develop good, thoughtful, well-rounded, and creative individuals and must enable an individual to study one or more specialized areas of interest at a deep level, and also develop character, ethical and Constitutional values, intellectual curiosity, scientific temper, creativity, spirit of service, and twenty-first-century capabilities across a range of disciplines including sciences, social sciences, arts, humanities, languages, as well as professional, technical, and vocational subjects. A quality higher education should be capable enough to enable personal accomplishment and enlightenment, constructive public engagement, and productive contribution to the society. Overall, it should focus on preparing students for more meaningful and satisfying lives and work roles and enable economic independence.

Towards the attainment of holistic and multidisciplinary education, the flexible curricula of the University will include credit-based courses, projects in the areas of community engagement and service, environmental education, and value-based education. As part of holistic education, students will also be provided with opportunities for internships with local industries, businesses, artists, crafts persons, and so on, as well as research internships with faculty and researchers at the University, so that students may actively engage with the practical aspects of their learning and thereby improve their employability.

The undergraduate curriculums are diverse and have varied subjects to be covered to meet the needs of the programs. As per the recommendations from the UGC,

introduction of courses related to Indian Knowledge System (IKS) is being incorporated in the curriculum structure which encompasses all of the systematized disciplines of Knowledge which were developed to a high degree of sophistication in India from ancient times and all of the traditions and practises that the various communities of India—including the tribal communities—have evolved, refined and preserved over generations, like for example Vedic Mathematics, Vedangas, Indian Astronomy, Fine Arts, Metallurgy, etc.

At RGU, we are committed that at the societal level, higher education will enable each student to develop themselves to be an enlightened, socially conscious, knowledgeable, and skilled citizen who can find and implement robust solutions to its own problems. For the students at the University, Higher education is expected to form the basis for knowledge creation and innovation thereby contributing to a more vibrant, socially engaged, cooperative community leading towards a happier, cohesive, cultured, productive, innovative, progressive, and prosperous nation.

Introduction

The National Education Policy (NEP) 2020 clearly indicates that higher education plays an extremely important role in promoting human as well as societal well-being in India. As envisioned in the 21st-century requirements, quality higher education must aim to develop good, thoughtful, well-rounded, and creative individuals. According to the new education policy, assessments of educational approaches in undergraduate education will integrate the humanities and arts with Science, Technology, Engineering and Mathematics (STEM) that will lead to positive learning outcomes. This will lead to develop creativity and innovation, critical thinking and higher-order thinking capacities, problem-solving abilities, teamwork, communication skills, more in-depth learning, and mastery of curricula across fields, increases in social and moral awareness, etc., besides general engagement and enjoyment of learning, and more in-depth learning.

The NEP highlights that the following fundamental principles that have a direct bearing on the curricula would guide the education system at large, viz.

- i. Recognizing, identifying, and fostering the unique capabilities of each student to promote her/his holistic development.
- ii. Flexibility, so that learners can select their learning trajectories and programmes, and thereby choose their own paths in life according to their talents and interests.
- iii. Multidisciplinary and holistic education across the sciences, social sciences, arts,

humanities, and sports for a multidisciplinary world.

- iv. Emphasis on conceptual understanding rather than rote learning, critical thinking to encourage logical decision-making and innovation; ethics and human & constitutional values, and life skills such as communication, teamwork, leadership, and resilience.
- v. Extensive use of technology in teaching and learning, removing language barriers, increasing access for Divyang students, and educational planning and management.
- vi. Respect for diversity and respect for the local context in all curricula, pedagogy, and policy.
- vii. Equity and inclusion as the cornerstone of all educational decisions to ensure that all students can thrive in the education system and the institutional environment are responsive to differences to ensure that high-quality education is available for all.
- viii. Rootedness and pride in India, and its rich, diverse, ancient, and modern culture, languages, knowledge systems, and tradition.

Approach to Curriculum Planning

Choice Based Credit System (CBCS) By UGC

Under the CBCS system, the requirement for awarding a degree or diploma or certificate is prescribed in terms of number of credits to be earned by the students. This framework is being implemented in several universities across States in India. The main highlights of CBCS are as below:

- The CBCS provides flexibility in designing curriculum and assigning credits based on the course content and learning hours.
- The CBCS provides for a system wherein students can take courses of their choice, learn at their own pace, undergo additional courses and acquire more than the required credits, and adopt an interdisciplinary approach to learning.
- CBCS also provides opportunity for vertical mobility to students from a bachelor's degree programme to masters and research degree programmes.

The detailed Guidelines for Choice Based Credit System is available at https://ugc.ac.in/pdfnews/8023719_Guidelines-for-CBCS.pdf

Definitions

Academic Credit:

An academic credit is a unit by which a course is weighted. It is fixed by the number of hours of instructions offered per week. As per the National Credit Framework [2];

1 Credit = 30 NOTIONAL CREDIT HOURS (NCH)

Yearly Learning Hours = 1200 Notional Hours (@40 Credits x 30 NCH)

30 Notional Credit Hours		
Lecture/Tutorial	Practicum	Experiential Learning
1 Credit = 15 -22 Lecture Hours	10-15 Practicum Hours	0-8 Experiential Learning Hours

Course of Study:

Course of study indicate pursuance of study in a particular discipline/programme. Discipline/Programmes shall offer Major Courses (Core), Minor Courses, Skill Enhancement Courses (SEC), Value Added Courses (VAC), Ability Enhancement Compulsory Courses (AECCs) and Interdisciplinary courses.

Disciplinary Major:

The major would provide the opportunity for a student to pursue in-depth study of a particular subject or discipline. Students may be allowed to change major within the broad discipline at the end of the second semester by giving her/him sufficient time to explore interdisciplinary courses during the first year. Advanced-level disciplinary/interdisciplinary courses, a course in research methodology, and a project/dissertation will be conducted in the seventh semester. The final semester will be devoted to seminar presentation, preparation, and submission of project report/dissertation. The project work/dissertation will be on a topic in the disciplinary programme of study or an interdisciplinary topic.

Disciplinary/interdisciplinary minors:

Students will have the option to choose courses from disciplinary/interdisciplinary minors and skill-based courses. Students who take a sufficient number of courses in a discipline or an interdisciplinary area of study other than the chosen major will qualify for a minor in that discipline or in the chosen interdisciplinary area of study. A student may declare the choice of the minor at the end of the second semester, after exploring various courses.

Courses from Other Disciplines (Interdisciplinary):

All UG students are required to undergo 3 introductory-level courses relating to any of the broad disciplines given below. These courses are intended to broaden the intellectual experience and form part of liberal arts and science education. Students are not allowed to choose or repeat courses already undergone at the higher secondary level (12th class) in the proposed major and minor stream under this category.

i. Natural and Physical Sciences: Students can choose basic courses from disciplines such as Natural Science, for example, Biology, Botany, Zoology, Biotechnology, Biochemistry, Chemistry, Physics, Biophysics, Astronomy and Astrophysics, Earth and Environmental Sciences, etc.

ii. Mathematics, Statistics, and Computer Applications: Courses under this category will facilitate the students to use and apply tools and techniques in their major and minor disciplines. The course may include training in programming software like Python among others and applications software like STATA, SPSS, Tally, etc. Basic courses under this category will be helpful for science and social science in data analysis and the application of quantitative tools.

iii. Library, Information, and Media Sciences: Courses from this category will help the students to understand the recent developments in information and media science (journalism, mass media, and communication)

iv. Commerce and Management: Courses include business management, accountancy, finance, financial institutions, fintech, etc.,

v. Humanities and Social Sciences: The courses relating to Social Sciences, for example, Anthropology, Communication and Media, Economics, History, Linguistics, Political Science, Psychology, Social Work, Sociology, etc. will enable students to understand the individuals and their social behaviour, society, and nation. Students be introduced to survey methodology and available large-scale databases for India. The courses under humanities include, for example, Archaeology, History, Comparative Literature, Arts & Creative expressions, Creative Writing and Literature, language(s), Philosophy, etc., and interdisciplinary courses relating to humanities. The list of Courses can include interdisciplinary subjects such as Cognitive Science, Environmental Science, Gender Studies, Global Environment & Health, International Relations, Political Economy and Development, Sustainable Development, Women's, and Gender Studies, etc. will be useful to understand society.

Ability Enhancement Courses (AEC): Modern Indian Language (MIL) & English language focused on language and communication skills. Students are required to achieve competency in a Modern Indian Language (MIL) and in the English language with special emphasis on language and communication skills. The courses aim at enabling the students to acquire and demonstrate the core linguistic skills, including critical reading and expository and academic writing skills, that help students articulate their arguments and present their thinking clearly and coherently and recognize the importance of language as a mediator of knowledge and identity. They would also enable students to acquaint themselves with the cultural and intellectual heritage of the chosen MIL and English language, as well as to provide a reflective understanding of the structure and complexity of the language/literature related to both the MIL and English language. The courses will also emphasize the development and enhancement of skills such as communication, and the ability to participate/conduct discussion and debate.

Skill Enhancement Course (SEC): These courses are aimed at imparting practical skills, hands-on training, soft skills, etc., to enhance the employability of students and should be related to Major Discipline. They will aim at providing hands- on training, competencies, proficiency, and skill to students. SEC course will be a basket course to provide skill-based instruction. For example, SEC of English Discipline may include Public Speaking, Translation & Editing and Content writing.

Value-Added Courses (VAC):

i. Understanding India: The course aims at enabling the students to acquire and demonstrate the knowledge and understanding of contemporary India with its historical perspective, the basic framework of the goals and policies of national development, and the constitutional obligations with special emphasis on constitutional values and fundamental rights and duties. The course would also focus on developing an understanding among student-teachers of the Indian knowledge systems, the Indian education system, and the roles and obligations of teachers to the nation in general and to the school/community/society. The course will attempt to deepen knowledge about and understanding of India's freedom struggle and of the values and ideals that it represented to develop an appreciation of the contributions made by people of all sections and regions of the

country, and help learners understand and cherish the values enshrined in the Indian Constitution and to prepare them for their roles and responsibilities as effective citizens of a democratic society.

ii. Environmental science/education: The course seeks to equip students with the ability to apply the acquired knowledge, skills, attitudes, and values required to take appropriate actions for mitigating the effects of environmental degradation, climate change, and pollution, effective waste management, conservation of biological diversity, management of biological resources, forest and wildlife conservation, and sustainable development and living. The course will also deepen the knowledge and understanding of India's environment in its totality, its interactive processes, and its effects on the future quality of people's lives.

iii. Digital and technological solutions: Courses in cutting-edge areas that are fast gaining prominences, such as Artificial Intelligence (AI), 3-D machining, big data analysis, machine learning, drone technologies, and Deep learning with important applications to health, environment, and sustainable living that will be woven into undergraduate education for enhancing the employability of the youth.

iv. Health & Wellness, Yoga education, sports, and fitness: Course components relating to health and wellness seek to promote an optimal state of physical, emotional, intellectual, social, spiritual, and environmental well-being of a person. Sports and fitness activities will be organized outside the regular institutional working hours. Yoga education would focus on preparing the students physically and mentally for the integration of their physical, mental, and spiritual faculties, and equipping them with basic knowledge about one's personality, maintaining self-discipline and self-control, to learn to handle oneself well in all life situations. The focus of sports and fitness components of the courses will be on the improvement of physical fitness including the improvement of various components of physical and skills-related fitness like strength, speed, coordination, endurance, and flexibility; acquisition of sports skills including motor skills as well as basic movement skills relevant to a particular sport; improvement of tactical abilities; and improvement of mental abilities.

These are a common pool of courses offered by different disciplines and aimed towards embedding ethical, cultural and constitutional values; promote critical thinking. Indian knowledge systems; scientific temperament of students.

Summer Internship /Apprenticeship:

The intention is induction into actual work situations. All students must undergo internships / Apprenticeships in a firm, industry, or organization or Training in labs with faculty and researchers in their own or other HEIs/research institutions during the **summer term**. Students should take up opportunities for internships with local industry, business organizations, health and allied areas, local governments (such as panchayats, municipalities), Parliament or elected representatives, media organizations, artists, crafts persons, and a wide variety of organizations so that students may actively engage with the practical side of their learning and, as a by-product, further improve their employability. Students who wish to exit after the first two semesters will undergo a 4-credit work-based learning/internship during the summer term to get a UG Certificate.

Community engagement and service: The curricular component of ‘community engagement and service’ seeks to expose students to the socio- economic issues in society so that the theoretical learnings can be supplemented by actual life experiences to generate solutions to real-life problems. This can be part of summer term activity or part of a major or minor course depending upon the major discipline.

Field-based learning/minor project: The field-based learning/minor project will attempt to provide opportunities for students to understand the different socio-economic contexts. It will aim at giving students exposure to development-related issues in rural and urban settings. It will provide opportunities for students to observe situations in rural and urban contexts, and to observe and study actual field situations regarding issues related to socioeconomic development. Students will be given opportunities to gain a first- hand understanding of the policies, regulations, organizational structures, processes, and programmes that guide the development process. They would have the opportunity to gain an understanding of the complex socio-economic problems in the community, and innovative practices required to generate

solutions to the identified problems. This may be a summer term project or part of a major or minor course depending on the subject of study.

Indian Knowledge System:

In view of the importance accorded in the NEP 2020 to rooting our curricula and pedagogy in the Indian context all the students who are enrolled in the four-year UG programmes should be encouraged to take an adequate number of courses in IKS so that the ***total credits of the courses taken in IKS amount to at least five per cent of the total mandated credits (i.e. min. 8 credits for a 4 yr. UGP & 6 credits for a 3 yr. UGP)***. The students may be encouraged to take these courses, preferably *during the first four semesters of the UG programme*. At least half of these mandated credits should be in courses in disciplines which are part of IKS and are related to the major field of specialization that the student is pursuing in the UG programme. They will be included as a part of the total mandated credits that the student is expected to take in the major field of specialization. The rest of the mandated credits in IKS can be included as a part of the mandated Multidisciplinary courses that are to be taken by every student. All the students should take a Foundational Course in Indian Knowledge System, which is designed to present an overall introduction to all the streams of IKS relevant to the UG programme. The foundational IKS course should be broad-based and cover introductory material on all aspects. Wherever possible, the students may be encouraged to choose a suitable topic related to IKS for their project work in the 7/8th semesters of the UG programme. [5]

(Note: Refer “Guidelines for Incorporating Indian Knowledge in Higher Education Curricula”, University Grants Commission, March 2023 for further details)

Experiential Learning:

One of the most unique, practical & beneficial features of the National Credit Framework is assignment of credits/credit points/ weightage to the experiential learning including relevant experience and professional levels acquired/ proficiency/ professional levels of a learner/student. Experiential learning is of two types:

a. Experiential learning as part of the curricular structure of academic or vocational program. E.g., projects/OJT/internship/industrial attachments etc. This could be either within the Program- internship/ summer project undertaken relevant to the program being studied or as a part time employment (not relevant to the program being studied- up to certain NSQF level only). In case where

experiential learning is a part of the curricular structure the credits would be calculated and assigned as per basic principles of NCERF i.e., 40 credits for 1200 hours of notional learning.

b. Experiential learning as active employment (both wage and self) post completion of an academic or vocational program. This means that the experience attained by a person after undergoing a particular educational program shall be considered for assignment of credits. This could be either Full or Part time employment after undertaking an academic/ Vocation program.

In case where experiential learning is as a part of employment the learner would earn credits as weightage. The maximum credit points earned in this case shall be double of the credit points earned with respect to the qualification/ course completed. The credit earned and assigned by virtue of relevant experience would enable learners to progress in their career through the work hours put in during a job/employment.

Award of Degree in Journalism and Mass Communications

The structure and duration of undergraduate programmes of study offered by the University as per NEP 2020 include:

Undergraduate programmes of either 3 or 4-year duration with Single Major, with multiple entry and exit options, with appropriate certifications:

UG Certificate: Students who opt to exit after completion of the first year and have secured 40 credits will be awarded a UG certificate if, in addition, they complete one vocational course of 4 credits during the summer vacation of the first year. These students are allowed to re-enter the degree programme within three years and complete the degree programme within the stipulated maximum period of seven years.

UG Diploma: Students who opt to exit after completion of the second year and have secured 80 credits will be awarded the UG diploma if, in addition, they complete one vocational course of 4 credits during the summer vacation of the second year. These students are allowed to re-enter within a period of three years and complete the degree programme within the maximum period of seven years.

3-year UG Degree: Students who will undergo a 3-year UG programme will be awarded UG Degree in the Major discipline after successful completion of three years, securing 120 credits and satisfying the minimum credit requirement.

4-year UG Degree (Honours): A four-year UG Honours degree in the major discipline

will be awarded to those who complete a four-year degree programme with 160 credits and have satisfied the credit requirements as given in Table 6 in Section 5.

4-year UG Degree (Honours with Research): Students who secure 75% marks and above in the first six semesters and wish to undertake research at the undergraduate level can choose a research stream in the fourth year. They should do a research project or dissertation under the guidance of a Faculty Member of the University. The research project/dissertation will be in the major discipline. The students who secure 160 credits, including 12 credits from a research project/dissertation, will be awarded UG Degree (Honours with Research).

Table: 1: Award of Degree and Credit Structure with ME-ME

Award	Year	Credits to earn	Additional Credits	Re-entry allowed within (yrs)	Years to Complete
UG Certificate	1	40	4	3	7
UG Diploma	2	80	4	3	7
3-year UG Degree (Major)	3	120	x	x	x
4-year UG Degree (Honours)	4	160	x	x	x
4-year UG Degree (Honours with Research):	4	160	Students who secure cumulative 75% marks and above in the first six semesters		

Graduate Attributes

Sl.no.	Graduate Attribute	The Learning Outcomes Descriptors
GA1	Disciplinary Knowledge	acquire knowledge and coherent understanding of Journalism and its areas of study.
GA 2	Complex problem solving	The Program focuses on well researched and solution-based thinking and application of theoretical concepts to real life case studies in the field of journalism and mass communication, enabling students to develop problem solving skills. Students develop an ability to take up challenges in their professional carrier and provide effective solutions.
GA 3	Analytical & Critical thinking	The students will be able to apply analytical thought including the analysis and evaluation of policies, and practices in the field of media and media relations. They will be able to identify relevant assumptions or implications. Identify logical flaws and holes in the arguments of others. Analyse and synthesize data from a variety of sources and draw valid conclusions and support them with evidence and examples.
GA 4	Creativity	A student will be able to create, perform, or think in different and diverse ways about the same objects or scenarios and deal with problems and situations that do not have simple solutions. Think ‘out of the box’ and generate solutions to complex problems in unfamiliar contexts by adopting innovative, imaginative, lateral thinking, interpersonal skills, and emotional intelligence.
GA 5	Communication Skills	The program focuses on enhancing the ability of students to listen carefully, read texts and research papers analytically, and present complex information in a clear and concise manner to different groups/audiences. Express thoughts and ideas effectively in writing and orally and communicate with others using appropriate media.
		A Student will develop a keen sense of observation, inquiry, and capability for asking relevant/appropriate questions. Should acquire the ability to problematize, synthesize and articulate issues and design research proposals, define problems,

GA 6	Research-related skills	formulate appropriate and relevant research questions, formulate hypotheses, test hypotheses using quantitative and qualitative data, establish hypotheses, make inferences based on the analysis and interpretation of data, and predict cause-and-effect relationships. Should develop the ability to acquire the understanding of basic research ethics and skills in practicing/doing ethics in the field/ in personal research work.
GA 7	Collaboration	Capable to work effectively and respectfully with diverse teams in the classroom and in the media industry in the interests of a common cause and work efficiently as a member of a team.
GA 8	Leadership readiness/qualities	plan the tasks of a team or an organization and setting direction by formulating an inspiring vision and building a team that can help achieve the vision.
GA 9	Digital and technological skills	Demonstrate and experiment by using computers and other digital devices for learning, design, illustrate and utilize relevant information using appropriate software's for analyzing of data and generate and end product.
GA 10	Environmental awareness and action	A student will identify the effects of environmental degradation, climate change, and pollution. They will develop and illustrate the technique of spreading awareness on effective waste management, conservation of biological diversity, management of biological resources and biodiversity, forest and wildlife conservation, and sustainable development and living by producing different Information Education and Communication (IEC) materials.

Program Learning Outcomes (PLO)

PLO-1: Acquiring Knowledge of Journalism and Mass Communication-

A systematic or coherent understanding of the academic field of Journalism and Mass Communication, its different learning areas and applications, and its linkages with related disciplinary areas/subjects. Procedural knowledge that creates different types of professionals related to Journalism and Mass Communication area of study, including research and development, teaching and government and public service.

PLO-2: Ability of solving complex problem

The students attain ability to quickly identify the problem and applying critical thinking skills and problem-solving analysis in all dimensions of development and production

PLO-3 - Analytical & Critical thinking

The students will be able to apply analytical thought including the analysis and evaluation of policies, and practices in the field of media and media relations. Ability to understand and skills will be enhanced for identifying problems and issues relating to Journalism and Mass Communication

PLO-4: Develop and Demonstrate Creativity

A student will be able to demonstrate, perform, or think in different and diverse ways by using tools of media about the objects and scenarios in the field of mass communication and journalism and deal with problems and situations that do not have simple solutions. They will be able to think 'out of the box' and generate solutions to complex problems in unfamiliar contexts by adopting innovative, imaginative, lateral thinking, interpersonal skills, and emotional intelligence.

PLO-5: Enhance and Execute Communication Skills

The students will develop the ability to listen carefully, read texts and research papers analytically, and present complex information in a clear and concise manner to different groups/audiences through various means of communication. A student will be able to express thoughts and ideas effectively in writing, through films and also orally and communicate with others using appropriate media technologies.

PLO-6: Formulate Research-related skills

A Student will develop a keen sense of observation, inquiry, and capability for asking relevant/appropriate questions. Should acquire the ability to problematize, synthesize and articulate issues and design research proposals, define problems, formulate appropriate and relevant research questions, formulate hypotheses, test hypotheses using quantitative and qualitative data, establish hypotheses, make inferences based on the analysis and interpretation of data, and predict cause-and-effect relationships. Students will develop the ability to acquire the understanding of basic research ethics and skills in practicing/doing ethics in the field/ in personal research work.

PLO-7: Collaboration

Capable to work effectively and respectfully with diverse teams in the classroom and in the media industry in the interests of a common cause and work efficiently as a member of a team.

PLO-8: Develop Leadership readiness/qualities

A student will be able to organize and operate the tasks of a team or an organization and setting direction by formulating an inspiring vision and building a team that can help achieve the vision.

PLO-9: Execute Digital and technological skills

The student will outline and examine using computers and other digital devices for learning, design, illustrate and utilize relevant information by using appropriate software's for analyzing of data and generate media related projects.

PLO 10: Identifying environmental issues, its awareness and action

A student will identify the effects of environmental degradation, climate change, and pollution. They will develop the technique and illustrate awareness on effective waste management, conservation of biological diversity, management of biological resources and biodiversity, forest and wildlife conservation, and sustainable development and living by producing different Information Education and Communication (IEC) materials.

Programme Specific Outcomes

PSO1: Integration of the concept, principals and theories involved in the subjects of Journalism and Mass Communication in all aspects.

PSO2: Ability to identify and solve complex societal problems using different mass media platforms.

PSO3: Student will be able to use their analytical thought in understanding different policies related to media and its relationship in society.

PSO4: The student will be able to demonstrate 'out of the box' ideas by adopting innovative, imaginative, communicative skills and emotional intelligence.

PSO5: Ability to prepare, compare, and present complex information in a clear and concise manner to audience through various effective communication skills.

PSO6: Student will acquire the ability to identify and analyze societal related issues and design research proposals, understanding research & media ethics, establish hypotheses and predict cause-and-effect relationships.

PSO7: Student will be skilful to connect and work effectively with diverse team of media in the dynamic media industry.

PSO8: Working effectively with different team members, student will devise and develop a leadership quality that can help them to achieve the vision in life.

PSO9: Student will demonstrate skills related to various digital devices, computers and appropriate software for analyzing data and media related projects.

PSO10: Student will develop techniques and illustrate environmental awareness by producing different Information Education and Communication (IEC) materials.

Teaching Learning Process

Teaching and learning in this programme involve classroom lectures as well as tutorial and remedial classes.

Tutorial classes: Tutorials allow closer interaction between students and teacher as each student gets individual attention. The tutorials are conducted for students who are unable to achieve average grades in their weekly assessments. Tutorials are divided into three categories, viz. discussion-based tutorials (focusing on deeper exploration of course content through discussions and debates), problem-solving tutorials (focusing on problem solving processes and quantitative reasoning), and Q&A tutorials (students ask questions about course content and assignments and consolidate their learning in the guiding presence of the tutor).

Flip classroom: flip classroom allows lecture content from face-to-face class time to before class by assigning it as homework. This allows for more interactive forms of learning to take place during class

Remedial classes: The remedial classes are conducted for students who achieve average and above average grades in their weekly assessments. The focus is laid to equip the students to perform better in the exams/assessments. The students are divided into small groups to provide dedicated learning support. Tutors are assigned to provide extra time and resources to help them understand concepts with advanced nuances. Small groups allow tutors to address their specific needs and monitor them.

Following methods are adopted for tutorial and remedial classes:

- Written assignments and projects submitted by students
- Project-based learning
- Group discussions
- Home assignments
- Class tests, quizzes, debates organized in the department
- Seminars and conferences.

Experiential Learning: Experiential learning is a part of the academic curriculum of JMC. Field based projects, internship, industrial visits, interaction with experts from the field and extracurricular activities (participation in intra and inter university competitions, clubs of the university) are promoted to provide an experience aligned with the course curriculum.

Assessment Methods

	Component of Evaluation	Marks	Frequency	Code	Weightage (%)
A	Continuous Evaluation				
i	Analysis/Class test	Combination of any three from (i) to (v) with 5 marks each	1-3	C	25%
ii	Home Assignment		1-3	H	
iii	Project		1	P	
iv	Seminar		1-2	S	
v	Viva /Presentation		1-2	V	
vi	MSE	MSE shall be of 10 marks	1-3	Q/CT	5%
vii	Attendance	Attendance shall be of 5 marks	100%	A	
B	Semester End Examination		1	SEE	70%
	Project				100%

Course Level: 400

Title of the paper: Rural and Development Support Communication

Subject Code: JMC092M703

L-T-P-C: 4-1-0-5

Credit: 4

Course Objective:

The purpose of the Rural Communication and Development Support paper is to examine methods for improving rural communities' social and economic well-being. Its main objectives are to comprehend rural economies, combat poverty by implementing sustainable livelihood initiatives, and encourage the expansion of the agricultural and industrial sectors. It also looks at how sanitation, healthcare, education, and infrastructure may raise living standards. The study also assesses government programs, policies, and projects for rural development, with a focus on community-driven and sustainable methods. In general, it aims to offer guidance on overcoming the gap between urban and rural areas and promoting equitable growth.

Course – Major

Level of Course – 400

Title of the Paper: Folk Media and Community Communication

Subject Code: JMC092M704

L-T-P-C: 4-1-0-5

Credits: 3

Course Objectives:

To enable students to explore and understand different folk media and its relation to effective communication with the community. The course aims to help students get familiar with techniques and nuances of utilizing folk for social change.

Learning Outcomes

On successful completion of the course the students will be able to:		
SI No	Course Outcome	Blooms Taxonomy Level
CLO 1	Exhibit a sound understanding of folk media and Community	BT 1
CLO 2	Demonstrate an understanding of the techniques, significance and cultural nuances related to folk media.	BT 2
CLO 3	Analyse the role of folk media and community participation in promoting social change.	BT 3
CLO 4	Analyze and apply the understanding of techniques of folk media forms and community needs to come up with relevant productions	BT 3

COURSE OUTLINE:

Modules	Name	Course Contents	Periods
1	Introduction to Folk Media and Community	Definition and Scope of Folk Media, Understanding the concept of community, Significance of folk and its relevance in contemporary society. Types of Folk Media in India, Characteristics of Folk Media, Community participation in folk media, Perspectives on participatory communication	13
2	Folk Media from	Folk Songs, folk dances from across India: Exploring the music and cultural context, Folk	

	Northeast India	Dances and the choreography, costumes, narrative structures etc., Storytelling and Oral Traditions: Examining the art of storytelling and oral traditions, including their techniques and themes. Discussing the role of folk media in various rituals and ceremonies, including weddings, festivals, and harvest celebrations.	13
3	Folk media, Society and Culture	Role of Folk Media in Society, Discussing the functions of folk media in preserving culture Promoting social change through simple entertainment. Understanding the potential of folk media in promoting social change. Examining the potential of folk media in community development covering issues like literacy, health, education, gender empowerment, environment etc. through campaigns.	13
4	Practical	Production of community programme using any folk medium, discussing a theme relevant to the contemporary times for the target community	13
Total			52

Course : Major

Title of the Paper: Media Research- I

L-T-P-C: 4-1-0-5

Level of Course –400

Subject Code: JMC092M70

Credit Units: 4

Course Objectives: To make the students aware about research culture among academics and professionals in different fields. To undertake research in their specific academic fields on philosophical, epistemological understanding of the elements of research. To provide knowledge skills of various types of research designs and its procedures to conduct research to meet the national and international requirements.

Course Learning Outcomes:

On successful completion of the course the students will be able to:		
SI. No	Course Outcome	Blooms Taxonomy Level
CLO 1	Understand different aspects of research.	BT 2
CLO 2	Implement the research methods critically, creatively and independently	BT 3
CLO 3	Analyze different research articles from different sources and categorize them	BT 4
CLO 4	Critically evaluate in-depth information from diverse sources	BT 5

Course Outline

	Name	Course Contents	Periods
1	Introduction to Research	Definition & Concept (Variables, Hypothesis, Theory), Objectives, scope and importance of Research, Types of research, Approaches to research (quantitative and qualitative and mixed method); Steps in research, Concept of reliability, Validity.	13
2	Methods & methodologies of Research	Qualitative- Quantitative Technique, Content Analysis, Sample Survey Method, Observation Methods, Experimental Studies, Case Studies, Interview Method, Focus Groups, Ethnography Narrative Analysis, Historical research, Sampling techniques.	13
3	Data Collection	Data Collection Techniques, Primary Data, Secondary Data, Methods of collecting data, Statistical Analysis (Descriptive & Inferential Statistics), differential scales (Turnstone-type scales), summated (Likert Scale), Central Tendency, Dispersion, Presentation and Interpretation of Research Findings	13

4	Report Writing	Research Proposal and Report Writing, Presentation of research reports, Referencing and Citation Style, Ethics in Research	13

Paper:(Group-1) Fundamentals of Information Warfare

L-T-P-C: 4-1-0-5

Course Level:400

Subject Code: JMC092M802

Credit Units : 4

Course Objective:

To understand and explore a variety of digital technologies (video games, animation, digital shorts, web series, podcasts, social media campaigns, VR experiences, and ARGs) for the explicit purpose of employing them to create various narrative forms. To develop a framework for integrating participation and storytelling as the foundation of interactivity. To develop a deeper sense of why we create and value stories and how nascent (just coming into existence) communication technologies are affecting ideas of narrative. To explore how story is incorporated into contemporary interactive platforms by developing an online identity.

Course Outcome:

On successful completion of the course the students will be able to:		
Sl. No	Course Outcome	Blooms Taxonomy Level
CO 1	Understanding misinformation and disinformation in India and across the world	BT2
CO 2	Compare and contrast the various types of media content	BT2
CO 3	Analyse the different types of misinformation	BT4
CO 4	Identify the content by fact-checking using variety of tools and techniques	BT3

Detailed Syllabus:

Modules	Name	Course Contents	Periods
1	Introduction to Information Warfare	Concept and historical background of information Warfare, Mechanism, tools and mediums for information warfare, audiences and vulnerability, content and forms of information warfare, forms of Propaganda as a part of Information Warfare	13
2	Types of Misinformation and Disinformation	Misinformation, Disinformation and Malinformation, Satire: role of satire websites and parody handles in spreading misinformation, misleading content, imposter content, fabricated content, false context, false connection, manipulated content	13
3	Disinformation & Misinformation as tools of Strategic Communication	Understanding information warfare through case studies at global level – Filter Bubble, Echo Chamber, Biases, Social Media Giants and their role, national and international fact checking initiatives, deep fakes and AI	13
4	Fact Check Training	Power of Visuals (visuals as vehicle of misinformation and disinformation), keyword search (Keyword Planner), google reverse image search, (Baidu and Yandex- Tineye, Reveye, Google lens), remove background for search, manipulated Photo – Advanced Video search, YouTube Data viewer, Locating the exact spot (Google Maps, Bing, Naver, Wikimapia, Baidu) • Geolocation by satellite imagery • Street View • Yandex Panorama • Time travel (Google Earth pro) • Geotagging • Content verification – Date and Time: How different platforms display date & time • Exif Data • Tweets from a particular location, Tweetdeck-filters , Snapchat Map (Suggestion Required)	13

Title of Paper: Citizen Journalism

L-T-P-C: 4-1-0-5

Course Level: 400

Subject Code: JMC092M804

Credit: 4

OBJECTIVES OF THIS PAPER:

Nowadays mainstream media do not serve as the only source of news. The alternative news sources on Internet, such as blogs, web portals, social networking sites and websites featuring user-generated content (USG), give a good competition to mainstream media. It is, therefore, important for students to understand this novel trend in journalism. They also need to learn how to deal with the challenges posed to mainstream media by citizen journalism.

1. To understand the development of Citizen Journalism.
2. To understand the importance of Citizen Journalism
3. To learn to write in Citizen Journalism to the ethical and practical principles that guide it.
4. To introduce briefly the concepts of Guidelines of Citizen Journalism

Objective outcomes:

On successful completion of the course the students will be able to:		
SI. No	Course Outcome	Blooms Taxonomy Level
CO 1	Compare and contrast The development and history of citizen journalism in India demonstrate its expanding function in democratising news, enabling people to cover topics at the local level, and enhancing traditional media through social activity and digital platforms.	BT2
CO 2	Arrange the components of Understanding Citizen Journalism.	BT3

CO 3	Apply Various Aspects of Citizen Journalism	BT3
CO 4	Analyze the patterns and Particles of Citizen Journalism	BT4

Detailed Syllabus

Modules	UNIT-I	Course Contents	Periods
1	UNDERSTANDING CITIZEN JOURNALISM	Citizen Journalism- concept and definitions, Characteristics of Citizen Journalism, Types of citizen journalism, Significance, Merits and Demerits of Citizen Journalism, Difference between Citizen Journalism and Mainstream Journalism, Role of ICT in Citizen Journalism.	15
2	HISTORICAL PERSPECTIVE & CONCEPT	History and Evolution of citizen journalism in India, Importance of citizen journalism. Digital Revolution and the rise of Citizen Journalism.	15
3	UNIT-III Various Aspects of Citizen Journalism	Suggestions for Citizen Journalism, Challenges in Citizen Journalism, Human Rights and Citizen Journalism, Directive Principles of State Policy (DPSP) and Citizen Journalism	15
4	UNIT-IV Practical work based on relevant topics	Reporting as Citizen Journalist, The Citizen Journalism News Production Process, Vlog Reporting, Interview Skill test and tips for Interview, Local Development and Citizen Journalism.	15
