Course structure for BA Applied Psychology

1st Semester				
Sl no	**Code**	**Name of subjects**	**Course level**	**C**
Major (Core)				
1	PSY062M101	Foundations of Psychology	100	4
2	APY062M102	Life span Development I	100	4
3	PSY062M103	Systems and theory of Psychology I	100	4
Interdisciplinary				
4		Introduction to Indian knowledge system- I	100	3
Ability enhancement course				
5	AEC982A101	Communicative English I	100	2
Skill enhancement course				
6	PSY062S111	Life skills	100	3
Value addition course				
7	Sports Psychology		100	3
			Total credit	**24**

2nd Semester				
Sl no	**Code**	**Name of subjects**	**Course level**	**C**
Major (Core)				
1	PSY062M201	Introduction to psychology II	100	3
2	APY062M202	Life span development II	100	3
Minor				
3	PSY062N201	Basic Psychology II	100	3
Interdisciplinary				
4		Introduction to Indian knowledge system- II	100	3

Ability enhancement course				
5	AEC982A201	Communicative English-II	100	2
Skill enhancement course				
6	PSY062S211	Psychological testing	100	3
Value addition course				
7	Mental health and wellbeing		100	3
			Total credit	**20**

3rd Semester				
Sl no	**Code**	**Name of subjects**	**Course level**	**C**
Major (Core)				
1	PSY062M301	Abnormal Psychology I	200	4
2	APY062M302	Applied Psychology	100	4
Minor				
3	PSY062N301	Psychology of abnormal behaviour I	200	4
Interdisciplinary				
4	PSY062I301	Culinary Psychology	100	3
Ability enhancement course				
5	AEC982A301	Communicative English-III	100	2
Skill enhancement course				
6	PSY062S311	Psychological Practical	200	3
			Total credit	**20**

4th Semester				
Sl no	**Code**	**Name of subjects**	**Course level**	**C**
Major (Core)				
1	PSY062M401	Abnormal Psychology II	200	4
2	APY062M402	Applied Social Psychology	100	4
3	APY062M403	Rehabilitation Psychology	200	4
Minor				
4	PSY062N401	Psychology of abnormal behaviour II	200	3

5	PSY062N402	Psychology of positivity	200	3
Ability enhancement course				
5	AEC982A401	Communicative English-IV	100	2
			Total credit	**20**

5th Semester				
Sl no	**Code**	**Name of subjects**	**Course level**	**C**
Major (Core)				
1	PSY062M501	Bio Psychology	300	4
2	PSY062M502	Statistics in Psychological Research I	300	4
3	APY062M503	Child Psychology	300	4
Minor				
4	PSY062N501	Psychology of health and wellbeing	300	4
Internship				
5	PSY062C521	Internship	300	4
			Total credit	**20**

6th Semester				
Sl no	**Code**	**Name of subjects**	**Course level**	**C**
Major (Core)				
1	PSY062M601	Cognitive Psychology	300	4
2	PSY062M602	Counselling psychology	300	4
3	PSY062M603	Statistics in Psychological Research II	300	4
4	APY062M604	Positive psychology	300	4
Minor				
4	PSY062N601	Workplace psychology	300	4
			Total credit	**20**

7th Semester				
Sl no	**Code**	**Name of subjects**	**Course level**	**C**
Major (Core)				

1	PSY062M701	Psychology of Personality	400	4
2	APY062M702	Organizational behaviour	400	4
3	APY062M703	Clinical Psychology	400	4
4	APY062M704	Family and Marital Counselling		
Minor				
4	PSY06N701	Basics of counselling psychology	400	4
			Total credit	**20**

8th Semester				
Sl no	**Code**	**Name of subjects**	**Course level**	**C**
Major (Core)				
1	PSY062M801	Qualitative research methods	400	4
2	PSY062M802	Research methodology	400	4
Dissertation				
3	PSY062C823	Research project	600	12
Advanced course core (in lieu of Dissertation)				
4	PSY062C804	Psychotherapy	400	4
5	PSY062C805	Indian psychology	400	4
6	PSY062C806	Gender psychology	400	4
			Total credit	**20**

1st Semester

SYLLABUS (1st SEMESTER)

Subject name: Life skills (SEC I) **Credit units: 3**	**Subject code: PSY062S111** **L-T-P-C: 3-0-0-3** **Scheme of Evaluation: T**

Objectives: The primary objective of this course is to equip students with essential self-management, cognitive, interpersonal, and resilience-building skills necessary to navigate personal and professional challenges effectively.

Course Outcomes:

Sl No	Course outcome	Bloom's Taxonomy level
CO1	Demonstrate heightened self-awareness by evaluating personal strengths, weaknesses, and values, while applying emotional regulation and empathy strategies to cultivate a positive self-image.	**BT 1**
CO2	Demonstrate heightened self-awareness by evaluating personal strengths, weaknesses, and values, while applying emotional regulation and empathy strategies to cultivate a positive self-image.	**BT 2**
CO3	Utilize assertive communication and active listening techniques to manage interpersonal conflicts, negotiate effectively, and foster collaborative teamwork.	**BT 3**
CO4	Design personalized stress and time management plans by utilizing coping mechanisms, prioritization matrices, and SMART goal-setting techniques to build psychological resilience.	**BT 4**

Course Syllabus:

Modules	Topics/ Course content	Hours
Unit 1	**Self-Awareness and Emotional Intelligence:** Understanding strengths, weaknesses, values, and beliefs; Emotional regulation, empathy, and developing a positive self-image.	**5**
Unit 2	**Cognitive and Thinking Skills:** Critical thinking, problem-solving methodologies, creative thinking, and decision-making frameworks.	**8**
Unit 3	**Interpersonal and Team Skills:** Assertive communication, conflict resolution, active listening, negotiation, and collaborative teamwork.	**7**

Unit 4	**Stress and Time Management:** Identifying stressors, coping mechanisms, time management matrices, goal-setting (SMART goals), and resilience-building practices.	**5**
	Total	**25**

Lecture / Tutorial	Practicum	Experiential learning
25 hrs	**-**	**20 hrs**

Subject Name: Foundations of Psychology
Course Code: PSY062M101
L-T-P-C: 3-0-0-3
Subject Code: Credit Units: 4 Scheme of Evaluation: T

Objective: The objective of Foundations of Psychology is to introduce students to the basic concepts of the field of psychology with an emphasis on applications of psychology in everyday life.

Course Outcomes:

After successful completion of the course, student will be able to		
Sl No	**Course Outcome**	**Bloom's Taxonomy Level**
CO1	**Define** the key concepts and theories in Psychology.	BT1
CO2	**Understand** the fundamental processes underlying human behaviour such as attention, perception, memory, motivation, emotion, individual differences.	BT2
CO3	**Apply** the principles of psychology in day-to-day life for a better understanding of themselves and others	BT3
CO4	**Analyze** the concept of individual differences in examining human mental processes	BT4

Detailed Syllabus

Modules	**Topics / Course content**	**Hours**
I.	**Introduction to Psychology**: Concept, Definition, Scope, Methods of Psychology: Observation, Correlation and Experiment; Brief history, Fields and Branches of Psychology. **Sensation and Perception:** Concept, Definition, Types of Sensation, Sensory Receptors: Sensory Thresholds and Sensory Adaptation; Meaning of Attention and	**15**

	Perception, Perceptual Organization and Perceptual Constancies.	
II.	**Learning:** Definition and nature of learning; Theories of learning- Classical Conditioning; Operant Conditioning, Social learning theory.	**15**
III.	**Motivation:** Concept of Motivation, Sources of Motivation- Instincts and Drives, Types of Motivation, Theories of Motivation. **Emotion:** Nature, Concept and Theories.	**15**
IV.	**Memory:** Definition, Types, Models of Memory, level of processing, episodic, semantic and procedural memory. **Forgetting:** interference, repression, and amnesia.	**15**
	TOTAL	60

Lecture/Tutorial	Practicum	Experiential learning
60 hrs	-	30 hrs

Subject Name: Systems & theories of Psychology-I **L-T-P-C: 3-0-0-3** **Subject Code: Credit Units: 4 Scheme of Evaluation: T**

Objectives: Understand the key developments and growth of psychology both in India and the West and analyze the major milestones and contributions of significant thinkers in shaping modern psychology.

Course Outcomes

Sl No	**Course outcome**	**Bloom's Taxonomy level**
CO1	Describe the evolution of psychology in both the Western and Indian contexts, including major figures, events, and milestones.	BT 3
CO2	Evaluate the contributions of thinkers like John Locke, David Hume, and Edward Thorndike in the development of associative learning theories.	BT 4
CO3	Explain William McDougall's purposivism and its relevance to cognitive and behavioral psychology.	BT 3
CO4	Differentiate between the aims and methods of structuralism and functionalism, and identify the contributions of key figures such as Wilhelm Wundt and William James.	BT 5

Course Syllabus

Modules	**Topics/ Course content**	**Hours**
Unit 1	History of Psychology: Developments and growth in India and in the West, major milestones, key contributors.	15
Unit 2	Associationism & Purposivism: William McDougall, Cognitive maps, Associationism; John Locke, David Hume, William James, Edward Thorndike, Associative learning.	15
Unit 3	Structuralism & Functionalism: Structuralism: system of structuralism, major thinkers associated with structuralism, method of introspection, Functionalism; major proponents associated with functionalism, methods of functionalism study.	15
Unit 4	Gestaltism: Meaning, Methodological basis, laws of perceptual organization, Field theory; Lewin's personality theory, studies of group dynamics.	15
	Total	**60**

Lecture / Tutorial	**Practicum**	**Experiential learning**
60 hrs	-	30 hrs

3rd Semester

SYLLABUS (3rd SEMESTER)

Subject name: Abnormal Psychology I **Credit units: 4**	**Subject code: PSY062M301** **L-T-P-C: 4-0-0-4** **Scheme of Evaluation: T**

Objectives: To introduce students to the historical concepts of abnormality, modern diagnostic classification systems, and the multi-axial paradigms of clinical evaluation, and to familiarize students with the clinical profiles, aetiologies, and treatment models of anxiety, somatic, and stress-related psychological disorders.

Course Outcomes:

Sl No	Course outcome	Bloom's Taxonomy level
CO1	**Define** abnormal behaviour.	BT 1
CO2	**Understand** different types of psychological disorders.	BT 2
CO3	**Apply** different types of treatment to deal with the disorders.	BT 3
CO4	**Analyse** different causal factors and different types of treatment methods specific to the disorder.	BT 4

Course Syllabus:

Modules	Topics/ Course content	Hours
Unit 1	**Introduction and Theoretical Perspectives** Defining Abnormal Behaviour, Criteria for Abnormal Behaviour, Brief mention of DSM and ICD Classification systems, Causes of Abnormal behaviour: Predisposing, Precipitating, and Reinforcing cause.	15
Unit 2	**Mood Disorders and Suicide:** Unipolar Mood Disorders, Bipolar Mood Disorders, Suicide, Classification, Frequency, Causes, Treatment, Identification and Prevention.	15
Unit 3	**Anxiety and Obsessive-Compulsive Disorders:** Generalized Anxiety Disorder (GAD), Panic Disorder, Specific Phobias, Agoraphobia, Social Anxiety Disorder, and Obsessive-Compulsive Disorder (OCD).	15
Unit 4	**Personality Disorders** Introduction, Clinical features, and Brief description of Cluster A, B, and C Personality Disorders with Psychosocial Causal Factors	15
	Total	**60**

Lecture / Tutorial	Practicum	Experiential learning
60 hrs	-	30 hrs

SYLLABUS (3rd SEMESTER)

Subject name: Psychology of abnormal behaviour I (MINOR) Credit units: 4	Subject code: PSY062N301 L-T-P-C: 4-0-0-4 Scheme of Evaluation: T

Objectives

The objective of **Psychology of Abnormal Behaviour I** is to introduce students to the aspects of psychopathology.

Course Outcomes

After successful completion of the course, students will be able to:		
Sl No	**Course outcome**	**Bloom's Taxonomy level**
CO1	**Define** abnormal behaviour.	BT 1
CO2	**Understand** different types of psychological disorders.	BT 2
CO3	**Apply** different types of treatment to deal with the disorders.	BT 3
CO4	**Analyse** the different types of treatment methods specific to the disorder.	BT 4

Course Syllabus

Modules	Topics/ Course content	Hours
Unit 1	**Introduction and Theoretical Perspective:** Defining Abnormal Behaviour; Criteria of Abnormal Behaviour; Brief Mention of DSM and ICD Classification Systems; Causes of Abnormal Behaviour.	15
Unit 2	**Mood Disorders and Suicide:** Unipolar Mood Disorders; Bipolar Mood Disorders; Suicide: Classification, Frequency, Causes, and Prevention.	15
Unit 3	**Anxiety Disorders:** Panic Disorder; Generalized Anxiety Disorder; Phobic Disorder; Obsessive Compulsive Disorder.	15
Unit 4	**Personality Disorders:** Introduction; Clinical Features and Brief Descriptions of Cluster A, B, and C Personality Disorders.	15

SYLLABUS (3rd SEMESTER) SEC II

Subject Name: Psychological Practical	**Subject Code: PSY062S311**
	L-T-P-C: 0-0-6-3
Credit Units: 3	**Scheme of Evaluation: P**

Objective: The objective of **Psychological Practical** is to familiarize students with the application of different psychological tests.

Course Outcomes:

After successful completion of the course, students will be able to		
Sl No	**Course Outcome**	**Bloom's Taxonomy Level**
CO1	**Recall** the importance of psychological testing.	BT1
CO2	**Understand** the procedure of conducting various psychological tests	BT2
CO3	**Application** of specific psychological tests in different settings	BT3
CO4	**Analyze** the findings of various psychological testings	BT4

Detailed Syllabus:

Modules	Topics / Course content	Hours
I.	**Intelligence test** Wechsler Adult Intelligence Scales (WAIS)/ Standard Progressive Matrices (SPM)	**30**
II.	**Personality Test** Sixteen Personality Factor Questionnaire (16PF)/ Big Five Personality Test	**15**
III.	**Aptitude Test** David's Battery of Differential Abilities (DBDA)/ Comprehensive Interest Schedule	**15**
IV.	**Clinical Assessment** Anxiety/ Depression/ Anger/ Memory Assessment *(*e.g., Beck Depression Inventory [BDI] / IPAT Anxiety Scale/State-Trait Anger Expression Inventory II[STAI]/PGI Memory Scale)	**30**
	TOTAL	**90**

Lecture/Tutorial	Practicum	Experiential learning
90 hrs	-	30 hrs

SYLLABUS (3rd SEMESTER)

Subject name: Applied Psychology Credit units: 4	Subject code: APY062M302 L-T-P-C: 4-0-0-4 Scheme of Evaluation: T

Objectives: To introduce students to the practical application of psychological principles, theories, and research findings across diverse real-world domains and to familiarize students with the professional roles, ethical boundaries, and intervention strategies utilized by applied psychologists to enhance human functioning in everyday life.

Course Outcomes

Sl No	Course outcome	Bloom's Taxonomy level
CO1	Define the concept, nature, scope, and ethical foundations of applied psychology.	BT 1
CO2	Explain the major branches of applied psychology and their roles in diverse professional settings.	BT 2
CO3	Apply psychological principles and theories to address behavioural issues in clinical, educational, organizational, forensic, sports, environmental, and community settings.	BT 3
CO4	Analyze human behaviour and evaluate psychological problems using concepts and approaches from different branches of applied psychology.	BT 4

Course Syllabus

Modules	Topics/ Course content	Hours
Unit 1	**Foundations and Ethics of Applied Psychology:** Definition, nature; Basic vs. Applied science dichotomy; Major branches and emerging sub-fields; Professional roles and career trajectories; Ethical paradigms: Confidentiality, informed consent, and professional boundaries in community practice.	15
Unit 2	**Applications in Core Traditional Domains: Clinical and Health Arena:** The bio-psycho-social model, stress management architectures, and lifestyle modification counseling; **Educational Space:** learning theories to classroom management, addressing diverse learning styles, and guidance-counselling structures; **Organizational Sphere:** Enhancing workplace motivation, group cohesion, and reducing occupational burnout.	15

Unit 3	**Psychology in Specialized and Emerging Fields: Forensic and Legal Psychology:** Eyewitness reliability, profiling basics, and psychological factors in judicial decision-making; **Sports Psychology:** Mental skills training, arousal regulation, and team dynamics; **Environmental Psychology:** Behavior modification for resource conservation, crowd dynamics, and urban space optimization.	15
Unit 4	**Community Interventions and Mental Wellbeing:** Designing, implementing, and evaluating community-based psychological interventions; Traditional mental health frameworks vs. the proactive positive psychology model; Crisis intervention protocols, suicide prevention strategies, and cultivating systemic psychosocial resilience in vulnerable populations.	15
	Total	60

Lecture / Tutorial	**Practicum**	**Experiential learning**
60hrs	-	30hrs

2. Davey, G. C. (Ed.). (2023). *Applied psychology* (2nd ed.). Wiley-Blackwell.

5th Semester

SYLLABUS (5th SEMESTER)

Subject name: Statistics in Psychological Research I **Credit units: 4**	**Subject code: PSY062M502** **L-T-P-C: 4-0-0-4** **Scheme of Evaluation: T**

Objectives: To introduce students to the foundational principles of descriptive and basic inferential statistics applied within quantitative behavioral research frameworks and to equip students with practical skills for calculating measures of central tendency, variability, normal distributions, and parametric tests.

Course Outcomes:

Sl No	Course outcome	Bloom's Taxonomy level
CO1	Organize raw behavioral research data into organized frequency distributions and graphical representations.	BT 3
CO2	Compute and interpret measures of central tendency and variability within skewed and normal distributions.	BT 4
CO3	Apply the properties of the Normal Probability Curve (NPC) to compute standard scores and probability ranges.	BT 3
CO4	Formulate null hypotheses and apply parametric Student's t-tests to evaluate significant differences between independent and paired means.	BT 5

Course Syllabus:

Modules	Topics/ Course content	Hours
Unit 1	**Introduction to Behavioral Statistics:** Meaning and purpose of statistics in psychological research; Descriptive vs. Inferential statistics; Scales of measurement: Nominal, Ordinal, Interval, Ratio; Frequency distributions and graphic representations.	15
Unit 2	**Measures of Central Tendency & Variability:** Concept, calculation, and use of Mean, Median, and Mode under grouped and ungrouped datasets; Measures of Variability: Range, Quartile Deviation, Average Deviation, and Standard Deviation.	15
Unit 3	**Normal Distribution and Standard Scores:** Normal Probability Curve: Characteristics, skewness, and kurtosis; Applications of the NPC: Determining percentage of cases, finding limits; Diverging standard scores: Calculating Z-scores and T-scores.	15
Unit 4	**Foundations of Hypothesis Testing:** Null Hypothesis and Alternative Hypothesis; Type I and Type II statistical errors; Levels of significance; Directional vs. Non-directional testing; Student's t-test for Independent and Correlated/Paired samples.	15
	Total	**60**

Lecture / Tutorial	Practicum	Experiential learning
60 hrs	-	30 hrs

SYLLABUS (5th SEMESTER)

Subject name: Child Psychology Credit units: 4	Subject code: APY062M503 L-T-P-C: 4-0-0-4 Scheme of Evaluation: T

Objective

The objective of **Child Psychology** is to make the students understand the behavioural concepts about children.

Course Outcomes

After successful completion of the course, students will be able to:		
Sl No	**Course outcome**	**Bloom's Taxonomy level**
CO1	**Describe** the fundamental concepts, developmental issues, research methods, and ethical principles in child psychology.	BT 1
CO2	**Explain** the major theories and stages of cognitive, language, and moral development during childhood.	BT 2
CO3	**Apply** concepts of socio-emotional development, temperament, self-concept, emotional regulation, and attachment to understand children's developmental behaviour.	BT 3
CO4	**Analyze** the influence of parenting, siblings, peers, digital media, and childhood behavioral, emotional, and learning challenges on children's overall development.	BT 4

Course Syllabus

Modules	Topics/ Course content	Hours
Unit 1	**Foundations of Child Psychology:** Definition and scope of child psychology; Core developmental issues: Nature vs. Nurture, continuity vs. discontinuity; Research methodologies unique to children: Longitudinal, cross-sectional, and sequential designs; Ethical precautions in child research.	15
Unit 2	**Cognitive, Language, and Moral Development:** Cognitive frameworks; Language acquisition stages and theories; The development of moral reasoning.	15

Unit 3	**Socio-Emotional Development and Attachment:** Understanding infant temperament; Emergence of self-concept and emotional regulation; Attachment dynamics, and long-term implications of secure vs. insecure attachment.	15
Unit 4	**Social Contexts and Childhood Challenges: Socialization Agents:** Parenting styles, sibling dynamics, peer acceptance, and the impact of digital media; **Childhood Challenges:** Overview of common behavioral and emotional issues; Recognizing learning variations and supportive educational interventions.	15
	Total	60

7th Semester

SYLLABUS (7th SEMESTER)	
Subject Name: Psychology of Personality	**Subject Code: PSY062M701**
Level of Course: 400	**L-T-P-C: 4-0-0-4**
Credit Units: 4	**Scheme of Evaluation: T**

Objective: The objective of **Psychology of Personality** is to familiarize the students with current methods and theories for studying personality.

Course Outcomes:

After successful completion of the course, students will be able to:

Sl No	Course Outcome	Bloom's Taxonomy Level
CO1	**Define** the basics of personality.	BT1
CO2	**Understand** the key characteristics of various theories and approaches of human personality.	BT2
CO3	**Apply** concepts from the psychology of personality to an understanding of one's own personality functioning.	BT3
CO4	**Compare** different psychological research as it pertains to the understanding.	BT4

Detailed Syllabus

Modules	Topics / Course content	Hours
I.	**Personality** Definition, origin and history, features, Gender and personality. Cultural and personality. Research methods for studying personality.	**15**
II.	**Psychodynamic and behavioral approach to personality** Psychoanalytic, Neoanalytic: Carl Jung, Alfred Adler, Karen Horney, Erik Erikson. Behavioral approach: Social cognitive theory, Social learning theory Applications and critique.	**15**
III.	**Trait and Humanistic -Existential Approaches** Allport's trait approach, Maslow's theory, Rogers' theory, Dasein analysis: Ludwig Binswanger and Medard Boss Logotherapy: Viktor Frankl	**15**
IV.	**Personality assessment** Techniques: interviews, self-report, projective techniques, behavioral techniques, psycho-physiological techniques. Ethical issues: personal concerns, and social.	**15**
	TOTAL	**60**

Lecture/Tutorial	Practicum	Experiential learning
60 hrs	-	30 hrs

SYLLABUS (7th SEMESTER)

Subject name: Clinical Psychology **Level course: 400** **Credit units: 4**	**Subject code: APY062M703** **L-T-P-C: 4-0-0-4** **Scheme of Evaluation: T**

Objectives

To introduce students to the scientific foundation, research base, and professional practice of clinical psychology and to familiarize students with diagnostic classification systems, clinical assessment methodologies, and evidence-based treatment models for psychological disorders.

Course Outcomes

Sl No	Course outcome	Bloom's Taxonomy level
CO1	Trace the historical development of clinical psychology and differentiate it from related mental health professions.	BT 2
CO2	Critique the paradigms of diagnostic classification systems, contrasting modern DSM and ICD frameworks.	BT 5
CO3	Evaluate multidimensional clinical assessment techniques, including diagnostic interviewing, intellectual testing, and objective personality tools.	BT 5
CO4	Formulate primary theoretical concepts and empirical steps required for basic clinical intervention and psychological report writing.	BT 6

Detailed Syllabus

Modules	Topics/ Course content	Hours
Unit 1	**Foundations & Professional Issues:** Definition, scope, and history of clinical psychology; The evolution of training models (Scientist-Practitioner/Boulder model vs. Practitioner-Scholar/Vail model); Distinctions between clinical psychologists, psychiatrists, counseling psychologists, and psychiatric social workers; Professional ethics: Confidentiality, informed consent, and competence boundaries.	15
Unit 2	**Classification and Models of Psychopathology:** Concept of abnormality and clinical diagnosis; Structural systems of classification: Evolution, features, and differences between the DSM-5 and ICD-11; Major paradigms of psychopathology: Biological/Genetic, Psychodynamic, Cognitive-Behavioral, and Socio-cultural models.	15
Unit 3	**Clinical Assessment Methodologies:** Purpose and stages of clinical assessment; **The Clinical Interview:** Intake, mental status examination (MSE), structured and unstructured clinical interviews; **Intellectual Assessment:** Stanford-Binet and Wechsler scales (WAIS/WISC); **Personality Assessment:** Objective measures (MMPI-3, MCMI-IV) and projective techniques (Rorschach Inkblot Test, TAT); Behavioral and neuropsychological screening indicators.	15

Unit 4	**Clinical Interventions & Core Therapies:** Introduction to psychotherapeutic interventions; Common factors vs. specific ingredients in therapy; Overview of primary theoretical interventions: Psychodynamic therapy (free association, transference), Cognitive-Behavioral Therapy (Beck's cognitive restructuring, behavioral activation), and Humanistic-Existential therapies; Introduction to clinical report writing and rehabilitation steps.	15
	Total	60

Lecture / Tutorial	Practicum	Experiential learning
60 hrs	-	30 hrs

SYLLABUS (7th SEMESTER)

Subject name: Family and Marital Counselling **Level course: 400** **Credit units: 4**	**Subject code: APY062M704** **L-T-P-C: 4-0-0-4** **Scheme of Evaluation: T**

Objectives

To introduce students to the foundational theories, systems paradigms, and clinical practices of marriage, couple, and family counselling and to build technical familiarity with systemic assessment methodologies, transitional family lifecycle crises, and diverse therapeutic intervention frameworks.

Course Outcomes

Sl No	Course outcome	Bloom's Taxonomy level
CO1	**Recall** the basic concepts of relationships	BT 1
CO2	**Understand** the various issues faced by families and couples	BT 2
CO3	**Apply** the knowledge of couple therapy in dealing with interpersonal relationship.	BT 3
CO4	**Analyse** the effectiveness of various couple therapy techniques.	BT 4

Course Syllabus

Modules	Topics/ Course content	Hours
Unit 1	**Introduction to family and couple therapy:** Couple therapy: history, models and applications, Understanding adult attachment: theory, psychodynamics and couples' relationship, Basic techniques of family therapy. Ethical issues in couple therapy.	15
Unit 2	**Systemic Assessment and Genograms:** Initial systemic assessment protocols; Constructing and interpreting the family **Genogram**: Standard symbols, mapping intergenerational relationship patterns, tracking medical/psychological histories, and identifying structural alliances or coalitions; Ethical considerations: Managing multi-client confidentiality, neutrality, and alignment traps.	15
Unit 3	**Therapeutic interventions I:** Structural Family Therapy, Strategic Family Therapy, Experiential and Humanistic Models, Object relations couple therapy, Solution focused couple therapy and Narrative couple therapy.	15

Unit 4	**Therapeutic interventions II:** Affective reconstructive couple therapy, Integrative behavioural couple therapy, Cognitive behavioural couple therapy, Emotion focused couple therapy. **Special Intervention Areas:** Behavioural protocols for high-conflict couples, infidelities, separation/divorce transitions, blended family re-stabilization, and navigating chronic physical or mental illness within the household.	15
	Total	60

Lecture / Tutorial	Practicum	Experiential learning
60 hrs	-	30 hrs
