Course structure for BA Psychology

1st Semester				
Sl no	**Code**	**Name of subjects**	**Course level**	**C**
Major (Core)				
1	PSY062M101	Foundations of Psychology	100	4
2	PSY062M102	Social Psychology	100	4
3	PSY062M103	Systems and theory of Psychology I	100	4
Interdisciplinary				
4		Introduction to Indian knowledge system- I	100	3
Ability enhancement course				
5	AEC982A101	Communicative English I	100	2
Skill enhancement course				
6	PSY062S111	Life skills	100	3
Value addition course				
7	Sports Psychology		100	3
			Total credit	**24**

2nd Semester				
Sl no	**Code**	**Name of subjects**	**Course level**	**C**
Major (Core)				
1	PSY062M201	Introduction to psychology II	100	3
2	PSY062M202	Developmental Psychology II	100	3
Minor				
3	PSY062N201	Basic Psychology II	100	3
Interdisciplinary				

4		Introduction to Indian knowledge system- II	100	3
Ability enhancement course				
5	AEC982A201	Communicative English-II	100	2
Skill enhancement course				
6	PSY062S211	Psychological testing	100	3
Value addition course				
7	Mental health and wellbeing		100	3
Total credit				**20**

3rd Semester				
Sl no	**Code**	**Name of subjects**	**Course level**	**C**
Major (Core)				
1	PSY062M301	Abnormal Psychology I	200	4
2	PSY062M302	Development of psychological thoughts	100	4
Minor				
3	PSY062N301	Psychology of abnormal behaviour I	200	4
Interdisciplinary				
4	Understanding and managing of mental health		100	3
Ability enhancement course				
5	AEC982A301	Communicative English-III	100	2
Skill enhancement course				
6	PSY062S311	Psychological Practical	200	3
			Total credit	**20**

4th Semester				
Sl no	**Code**	**Name of subjects**	**Course level**	**C**
Major (Core)				

1	PSY062M401	Abnormal Psychology II	200	4
2	PSY062M402	Social Psychology	100	4
3	PSY062M403	Community Psychology	200	4
Minor				
4	PSY062N401	Psychology of abnormal behaviour II	200	3
5	PSY062N402	Psychology of positivity	200	3
Ability enhancement course				
5	AEC982A401	Communicative English-IV	100	2
			Total credit	**20**

5th Semester				
Sl no	**Code**	**Name of subjects**	**Course level**	**C**
Major (Core)				
1	PSY062M501	Bio Psychology	300	4
2	PSY062M502	Statistics in Psychological Research I	300	4
3	PSY062M503	Health Psychology	300	4
Minor				
4	PSY062N501	Psychology for health and wellbeing	300	4
Internship				
5	PSY062C521	Internship	300	4
			Total credit	**20**

6th Semester				
Sl no	**Code**	**Name of subjects**	**Course level**	**C**
Major (Core)				
1	PSY062M601	Cognitive Psychology	300	4

2	PSY062M602	Counselling psychology	300	4
3	PSY062M603	Statistics in Psychological Research II	300	4
4	PSY062M604	Industrial psychology	300	4
Minor				
4	PSY062N601	Workplace psychology	300	4
			Total credit	**20**

7th Semester				
Sl no	**Code**	**Name of subjects**	**Course level**	**C**
Major (Core)				
1	PSY062M701	Psychology of Personality	400	4
2	PSY062M702	Forensic psychology	400	4
3	PSY062M703	Psychology of peace	400	4
4	PSY062M704	Psychology of relationship		4
Minor				
4	PSY062N701	Basics of counselling psychology	400	4
			Total credit	**20**

8th Semester				
Sl no	**Code**	**Name of subjects**	**Course level**	**C**
Major (Core)				
1	PSY062M801	Qualitative research methods	400	4
2	PSY062M802	Research methodology	400	4
Dissertation				
3	PSY062C823	Research project	600	12

Advanced course core (in lieu of Dissertation)				
4	PSY062C804	Psychotherapy	400	4
5	PSY062C805	Indian psychology	400	4
6	PSY062C806	Gender psychology	400	4
			Total credit	**20**

1st SEMESTER

SYLLABUS (1st SEMESTER)

Subject name: Life skills (SEC I)	**Subject code: PSY062S111**
Credit units: 3	**L-T-P-C: 3-0-0-3**
	Scheme of Evaluation: T

Objectives: The primary objective of this course is to equip students with essential self-management, cognitive, interpersonal, and resilience-building skills necessary to navigate personal and professional challenges effectively.

Course Outcomes:

Sl No	Course outcome	Bloom's Taxonomy level
CO1	Demonstrate heightened self-awareness by evaluating personal strengths, weaknesses, and values, while applying emotional regulation and empathy strategies to cultivate a positive self-image.	**BT 1**
CO2	Demonstrate heightened self-awareness by evaluating personal strengths, weaknesses, and values, while applying emotional regulation and empathy strategies to cultivate a positive self-image.	**BT 2**
CO3	Utilize assertive communication and active listening techniques to manage interpersonal conflicts, negotiate effectively, and foster collaborative teamwork.	**BT 3**
CO4	Design personalized stress and time management plans by utilizing coping mechanisms, prioritization matrices, and SMART goal-setting techniques to build psychological resilience.	**BT 4**

Course Syllabus:

Modules	Topics/ Course content	Hours
Unit 1	**Self-Awareness and Emotional Intelligence:** Understanding strengths, weaknesses, values, and beliefs; Emotional regulation, empathy, and developing a positive self-image.	**5**
Unit 2	**Cognitive and Thinking Skills:** Critical thinking, problem-solving methodologies, creative thinking, and decision-making frameworks.	**8**
Unit 3	**Interpersonal and Team Skills:** Assertive communication, conflict resolution, active listening, negotiation, and collaborative teamwork.	**7**

Unit 4	**Stress and Time Management:** Identifying stressors, coping mechanisms, time management matrices, goal-setting (SMART goals), and resilience-building practices.	**5**
	Total	**25**

Lecture / Tutorial	Practicum	Experiential learning
25 hrs	**-**	**20 hrs**

Subject Name: Foundations of Psychology
Course Code: PSY062M101
L-T-P-C: 3-0-0-3
Subject Code: Credit Units: 4 Scheme of Evaluation: T

Objective: The objective of Foundations of Psychology is to introduce students to the basic concepts of the field of psychology with an emphasis on applications of psychology in everyday life.

Course Outcomes:

After successful completion of the course, student will be able to		
Sl No	**Course Outcome**	**Bloom's Taxonomy Level**
CO1	**Define** the key concepts and theories in Psychology.	BT1
CO2	**Understand** the fundamental processes underlying human behaviour such as attention, perception, memory, motivation, emotion, individual differences.	BT2
CO3	**Apply** the principles of psychology in day-to-day life for a better understanding of themselves and others	BT3
CO4	**Analyze** the concept of individual differences in examining human mental processes	BT4

Detailed Syllabus

Modules	**Topics / Course content**	**Hours**
I.	**Introduction to Psychology**: Concept, Definition, Scope, Methods of Psychology: Observation, Correlation and Experiment; Brief history, Fields and Branches of Psychology. **Sensation and Perception:** Concept, Definition, Types of Sensation, Sensory Receptors: Sensory Thresholds and Sensory Adaptation; Meaning of Attention and	**15**

	Perception, Perceptual Organization and Perceptual Constancies.	
II.	**Learning:** Definition and nature of learning; Theories of learning- Classical Conditioning; Operant Conditioning, Social learning theory.	**15**
III.	**Motivation:** Concept of Motivation, Sources of Motivation- Instincts and Drives, Types of Motivation, Theories of Motivation. **Emotion:** Nature, Concept and Theories.	**15**
IV.	**Memory:** Definition, Types, Models of Memory, level of processing, episodic, semantic and procedural memory. **Forgetting:** interference, repression, and amnesia.	**15**
	TOTAL	60

Lecture/Tutorial	Practicum	Experiential learning
60 hrs	-	30 hrs

Subject Name: Systems & theories of Psychology-I **L-T-P-C: 3-0-0-3** **Subject Code: Credit Units: 4 Scheme of Evaluation: T**

Objectives: Understand the key developments and growth of psychology both in India and the West and analyze the major milestones and contributions of significant thinkers in shaping modern psychology.

Course Outcomes

Sl No	**Course outcome**	**Bloom's Taxonomy level**
CO1	Describe the evolution of psychology in both the Western and Indian contexts, including major figures, events, and milestones.	BT 3
CO2	Evaluate the contributions of thinkers like John Locke, David Hume, and Edward Thorndike in the development of associative learning theories.	BT 4
CO3	Explain William McDougall's purposivism and its relevance to cognitive and behavioral psychology.	BT 3
CO4	Differentiate between the aims and methods of structuralism and functionalism, and identify the contributions of key figures such as Wilhelm Wundt and William James.	BT 5

Course Syllabus

Modules	**Topics/ Course content**	**Hours**
Unit 1	History of Psychology: Developments and growth in India and in the West, major milestones, key contributors.	15
Unit 2	Associationism & Purposivism: William McDougall, Cognitive maps, Associationism; John Locke, David Hume, William James, Edward Thorndike, Associative learning.	15
Unit 3	Structuralism & Functionalism: Structuralism: system of structuralism, major thinkers associated with structuralism, method of introspection, Functionalism; major proponents associated with functionalism, methods of functionalism study.	15
Unit 4	Gestaltism: Meaning, Methodological basis, laws of perceptual organization, Field theory; Lewin's personality theory, studies of group dynamics.	15
	Total	**60**

Lecture / Tutorial	**Practicum**	**Experiential learning**
60 hrs	-	30 hrs

3rd Semester

SYLLABUS (3rd SEMESTER)

Subject name: Abnormal Psychology I Credit units: 4	Subject code: PSY062M301 L-T-P-C: 4-0-0-4 Scheme of Evaluation: T

Objectives: To introduce students to the historical concepts of abnormality, modern diagnostic classification systems, and the multi-axial paradigms of clinical evaluation, and to familiarize students with the clinical profiles, aetiologies, and treatment models of anxiety, somatic, and stress-related psychological disorders.

Course Outcomes:

Sl No	Course outcome	Bloom's Taxonomy level
CO1	**Define** abnormal behaviour.	BT 1
CO2	**Understand** different types of psychological disorders.	BT 2
CO3	**Apply** different types of treatment to deal with the disorders.	BT 3
CO4	**Analyse** different causal factors and different types of treatment methods specific to the disorder.	BT 4

Course Syllabus:

Modules	Topics/ Course content	Hours
Unit 1	**Introduction and Theoretical Perspectives** Defining Abnormal Behaviour, Criteria for Abnormal Behaviour, Brief mention of DSM and ICD Classification systems, Causes of Abnormal behaviour: Predisposing, Precipitating, and Reinforcing cause.	15
Unit 2	**Mood Disorders and Suicide:** Unipolar Mood Disorders, Bipolar Mood Disorders, Suicide, Classification, Frequency, Causes, Treatment, Identification and Prevention.	15
Unit 3	**Anxiety and Obsessive-Compulsive Disorders:** Generalized Anxiety Disorder (GAD), Panic Disorder, Specific Phobias, Agoraphobia, Social Anxiety Disorder, and Obsessive-Compulsive Disorder (OCD).	15
Unit 4	**Personality Disorders** Introduction, Clinical features, and Brief description of Cluster A, B, and C Personality Disorders with Psychosocial Causal Factors	15
	Total	**60**

Lecture / Tutorial	Practicum	Experiential learning
60 hrs	-	30 hrs

Subject name: Development of psychological thought **Level course: 200** **Credit units: 4**	**Subject code: PSY062M302** **L-T-P-C: 4-0-0-4** **Scheme of Evaluation: T**

5. **Objectives**
6. To systematically map the philosophical foundations and historical transitions that led to the emergence of psychology as an independent science and to help the students understand the early structural, functional, behavioral, and psychodynamic systems of thought that defined early psychological science.
7. **Course Outcomes**

Sl No	**Course outcome**	**Bloom's Taxonomy level**
CO1	**Recall** different approaches to Psychology.	BT 1
CO2	Identify the diversity of contributions to the contemporary fields of Psychology	BT 2
CO3	Application of different perspectives to understand human behaviour	BT 3
CO4	Comparison of eastern and western perspectives	BT 4

8. **Course Syllabus**

Modules	**Topics/ Course content**	**Hours**
Unit 1	**Understanding Psychology:** Indian views on Consciousness: Yoga and Vedant: Free will and determinism, Empiricism and Rationalism, Content and Methodological Shifts across schools of Psychology.	15
Unit 2	**Early Schools of Psychology:** Associationism, Structuralism and Functionalism (brief introduction) : Behaviourism, Cognitivism and the key contributions	15
Unit 3	**Psychoanalytic and the Humanistic-Existential Orientation:** Freudian Psychoanalysis: Neo-Freudians (Adler, Jung, Horney); Humanistic perspectives of Carl Rogers and Abraham Maslow.	15
Unit 4	**Contemporary developments**: Social structuralism, Equality and Modern Psychology.	15
	Total	**60**

9.

SYLLABUS (3rd SEMESTER)

Subject name: Psychology of abnormal behaviour I (MINOR) Credit units: 4	Subject code: PSY062N301 L-T-P-C: 4-0-0-4 Scheme of Evaluation: T

Objectives

The objective of **Psychology of Abnormal Behaviour I** is to introduce students to the aspects of psychopathology.

Course Outcomes

After successful completion of the course, students will be able to:		
Sl No	**Course outcome**	**Bloom's Taxonomy level**
CO1	**Define** abnormal behaviour.	BT 1
CO2	**Understand** different types of psychological disorders.	BT 2
CO3	**Apply** different types of treatment to deal with the disorders.	BT 3
CO4	**Analyse** the different types of treatment methods specific to the disorder.	BT 4

Course Syllabus

Modules	Topics/ Course content	Hours
Unit 1	**Introduction and Theoretical Perspective:** Defining Abnormal Behaviour; Criteria of Abnormal Behaviour; Brief Mention of DSM and ICD Classification Systems; Causes of Abnormal Behaviour.	15
Unit 2	**Mood Disorders and Suicide:** Unipolar Mood Disorders; Bipolar Mood Disorders; Suicide: Classification, Frequency, Causes, and Prevention.	15
Unit 3	**Anxiety Disorders:** Panic Disorder; Generalized Anxiety Disorder; Phobic Disorder; Obsessive Compulsive Disorder.	15
Unit 4	**Personality Disorders:** Introduction; Clinical Features and Brief Descriptions of Cluster A, B, and C Personality Disorders.	15
	Total	**60**

SYLLABUS (3rd SEMESTER) SEC II

Subject Name: Psychological Practical	**Subject Code: PSY062S311**
	L-T-P-C: 0-0-6-3
Credit Units: 3	**Scheme of Evaluation: P**

Objective: The objective of **Psychological Practical** is to familiarize students with the application of different psychological tests.

Course Outcomes:

After successful completion of the course, students will be able to

Sl No	Course Outcome	Bloom's Taxonomy Level
CO1	**Recall** the importance of psychological testing.	BT1
CO2	**Understand** the procedure of conducting various psychological tests	BT2
CO3	**Application** of specific psychological tests in different settings	BT3
CO4	**Analyze** the findings of various psychological testings	BT4

Detailed Syllabus:

Modules	Topics / Course content	Hours
I.	**Intelligence test** Wechsler Adult Intelligence Scales (WAIS)/ Standard Progressive Matrices (SPM)	**30**
II.	**Personality Test** Sixteen Personality Factor Questionnaire (16PF)/ Big Five Personality Test	**15**
III.	**Aptitude Test** David's Battery of Differential Abilities (DBDA)/ Comprehensive Interest Schedule	**15**
	Clinical Assessment	**30**

IV.	Anxiety/ Depression/ Anger/ Memory Assessment *(*e.g., Beck Depression Inventory [BDI] / IPAT Anxiety Scale/State-Trait Anger Expression Inventory II[STAI]/PGI Memory Scale)	
	TOTAL	**90**

Lecture/Tutorial	Practicum	Experiential learning
90 hrs	-	30 hrs

5th Semester

SYLLABUS (5th SEMESTER)

Subject name: Statistics in Psychological Research I **Credit units: 4**	**Subject code: PSY062M502** **L-T-P-C: 4-0-0-4** **Scheme of Evaluation: T**

Objectives: To introduce students to the foundational principles of descriptive and basic inferential statistics applied within quantitative behavioral research frameworks and to equip students with practical skills for calculating measures of central tendency, variability, normal distributions, and parametric tests.

Course Outcomes:

Sl No	Course outcome	Bloom's Taxonomy level
CO1	Organize raw behavioral research data into organized frequency distributions and graphical representations.	BT 3
CO2	Compute and interpret measures of central tendency and variability within skewed and normal distributions.	BT 4
CO3	Apply the properties of the Normal Probability Curve (NPC) to compute standard scores and probability ranges.	BT 3
CO4	Formulate null hypotheses and apply parametric Student's t-tests to evaluate significant differences between independent and paired means.	BT 5

Course Syllabus:

Modules	Topics/ Course content	Hours
Unit 1	**Introduction to Behavioral Statistics:** Meaning and purpose of statistics in psychological research; Descriptive vs. Inferential statistics; Scales of measurement: Nominal, Ordinal, Interval, Ratio; Frequency distributions and graphic representations.	15
Unit 2	**Measures of Central Tendency & Variability:** Concept, calculation, and use of Mean, Median, and Mode under grouped and ungrouped datasets; Measures of Variability: Range, Quartile Deviation, Average Deviation, and Standard Deviation.	15
Unit 3	**Normal Distribution and Standard Scores:** Normal Probability Curve: Characteristics, skewness, and kurtosis; Applications of the NPC: Determining percentage of cases, finding limits; Diverging standard scores: Calculating Z-scores and T-scores.	15
Unit 4	**Foundations of Hypothesis Testing:** Null Hypothesis and Alternative Hypothesis; Type I and Type II statistical errors; Levels of significance;	15

	Directional vs. Non-directional testing; Student's t-test for Independent and Correlated/Paired samples.	
	Total	**60**

Lecture / Tutorial	Practicum	Experiential learning
60 hrs	-	30 hrs

Subject name: Health Psychology **Credit units: 4**	**Subject code: PSY062M503** **L-T-P-C: 4-0-0-4** **Scheme of Evaluation: T**

Objectives

To explore the psychological, behavioral, and cultural factors that influence physical health, illness development, and institutional healthcare choices and to analyze behavioral models,

pain management systems, and coping protocols targeting chronic cardiovascular or metabolic diseases.

Course Outcomes

Sl No	Course outcome	Bloom's Taxonomy level
CO1	Differentiate health behavior change frameworks, evaluating models like the Health Belief Model and Theory of Planned Behavior.	BT 4
CO2	Appraise the biological pathways of stress, chronic illness development, and modern stress management protocols.	BT 5
CO3	Deconstruct psychological, behavioral, and neuro-chemical aspects of acute vs. chronic pain processing.	BT 4
CO4	Design patient-centric behavioral intervention programs aimed at improving treatment adherence and life quality for chronic health conditions.	BT 6

Course Syllabus

Modules	Topics/ Course content	Hours
Unit 1	**Introduction to Health Psychology:** Definition, aims, and historical development; Shifting paradigms: The Biomedical model vs. the Bio-psycho-social model; Health models: Health Belief Model, Transtheoretical Model, and Theory of Planned Behavior.	15
Unit 2	**Stress and Illness Mechanisms:** Conceptual models of stress (Lazarus's Cognitive Appraisal, Selye's General Adaptation Syndrome); Neuro-immune systems: Psychoneuroimmunology; Stress management strategies.	15
Unit 3	**The Psychology of Pain:** Definition, Physiology of pain: Gate Control Theory; Psychological components: Acute vs. Chronic pain; Behavioral and cognitive interventions for clinical pain regulation.	15
Unit 4	**Behavioral Management of Chronic Conditions:** Socio-psychological impacts and lifestyle intervention steps for: Cardiovascular Diseases, Hypertension, Type II Diabetes, and Cancer; patient compliance, practitioner-patient communication, and hospice frameworks.	15
	Total	**60**

Lecture / Tutorial	Practicum	Experiential learning
60 hrs	-	30 hrs

Objectives: The objective of Psychology for Health and Wellbeing is to introduce students to the basic concepts of health psychology.

Subject name: Psychology for Health and Wellbeing (Minor) **Credit units: 4**	**Subject code: PSY062N501** **L-T-P-C: 4-0-0-4** **Scheme of Evaluation: T**

Course Outcomes:

Sl No	Course outcome	Bloom's Taxonomy level
CO1	Recall the concept of health psychology.	BT 3
CO2	Understand the sources of stress.	BT 4
CO3	Apply the different types of coping mechanisms to deal effectively with stress.	BT 3
CO4	Examine the human strengths and virtues.	BT 5

Course Syllabus:

Modules	Topics/ Course content	Hours
Unit 1	**Illness, Health and Well-being** Continuum and Models of health and illness: Bio-psychosocial and psychological well-being.	15
Unit 2	**Stress and Coping** Nature and sources of stress; Effects of stress on physical and mental health; Coping and stress management	15
Unit 3	**Health management** Health-compromising behaviors: Smoking, Alcoholism & Substance abuse; Health-enhancing behaviors: Exercise, Nutrition, Diet, Weight control, Yoga.	15
Unit 4	**Human strengths and life enhancement** Classification of human strengths and virtues; cultivating inner strengths: Hope and optimism; work-life balance.	15

Lecture / Tutorial	Practicum	Experiential learning

7th Semester

SYLLABUS (7th SEMESTER)

Subject Name: Psychology of Personality	**Code: PSY062M701**
Credit Units: 4	**Subject L-T-P-C: 4-0-0-4**
	Scheme of Evaluation: T

Objective: The objective of **Psychology of Personality** is to familiarize the students with current methods and theories for studying personality.

Course Outcomes:

After successful completion of the course, students will be able to:		
Sl No	**Course Outcome**	**Bloom's Taxonomy Level**
CO1	**Define** the basics of personality.	BT1
CO2	**Understand** the key characteristics of various theories and approaches of human personality.	BT2
CO3	**Apply** concepts from the psychology of personality to an understanding of one's own personality functioning.	BT3

SYLLABUS (7th SEMESTER)

Subject name: Forensic Psychology **Level course: 400** **Credit units: 4**	**Subject code: PSY062M702** **L-T-P-C: 4-0-0-4** **Scheme of Evaluation: T**

Objectives

To introduce students to the interface between psychological science and the criminal and civil justice systems and to provide a detailed understanding of criminal profiling, eyewitness psychology, investigative protocols, and legal frameworks.

Course Outcomes

Sl No	Course outcome	Bloom's Taxonomy level
CO1	Differentiate the professional roles and ethical practices of forensic psychologists in legal and correctional institutions.	BT 1
CO2	Analyze psychological theories of criminal behavior, including antisocial patterns and aggression.	BT 2
CO3	Evaluate investigative techniques, analyzing the accuracy of eyewitness testimony and interrogation methodologies.	BT 3
CO4	Formulate basic psychological frameworks for legal competencies, risk assessments, and correctional rehabilitation.	BT 4

Detailed Syllabus

Modules	Topics/ Course content	Hours
Unit 1	**Introduction to Forensic Psychology:** Definition, history, and scope of forensic psychology; Interface between psychology and the legal system; Roles of a forensic psychologist (expert witness, evaluator, consultant); Ethical principles in legal practice.	15
Unit 2	**Psychology of Criminal Behavior:** Biological and neurobiological markers of aggression; Psychological explanations: Psychopathy, Antisocial Personality Disorder, and social learning theories of violence; Deconstructing juvenile delinquency.	15
Unit 3	**Investigative Psychology & Eyewitness Testimony:** Cognitive processes in eyewitness memory: Weapon focus effect, misinformation effect, and lineup architectures; Psychological dynamics of interrogations and false confessions; Polygraphy, Narco-analysis, and Brain Fingerprinting.	15
Unit 4	**Legal Assessments and Correctional Interventions:** Evaluation of Competency to Stand Trial and Insanity Defense criteria ; Violence risk assessment tools; Institutional rehabilitation models for offenders: Cognitive-behavioral interventions and restorative justice frameworks.	15
	Total	**60**

Lecture / Tutorial	Practicum	Experiential learning
60 hrs	-	30 hrs

SYLLABUS (7th SEMESTER)

Subject name: Psychology of Peace **Credit units: 4**	**Subject code: PSY062M703** **L-T-P-C: 4-0-0-4** **Scheme of Evaluation: T**

Objectives: To examine the psychological drivers of structural violence, intergroup conflict, and the direct pathways to sustainable peace building and to introduce students to conflict resolution methodologies, nongovernmental peace initiatives, and the healing of historical trauma.

Course Outcomes:

Sl No	Course outcome	Bloom's Taxonomy level
CO1	Distinguish between direct, structural, and cultural violence using established peace psychology frameworks.	BT 4
CO2	Deconstruct the socio-psychological roots of intergroup conflict, prejudice, and micro-aggression.	BT 4
CO3	Formulate psychological mediation, dialogue, and collaborative conflict negotiation strategies.	BT 6
CO4	Design community programs promoting tolerance, social reconciliation, and sustainable peace education cultures.	BT 6

Course Syllabus:

Modules	Topics/ Course content	Hours
Unit 1	**Foundations of Peace Psychology:** Definition, emergence, and scope of peace psychology; Concepts of Positive Peace vs. Negative Peace; Distinguishing three typologies of violence: Direct, Structural, and Cultural violence.	15
Unit 2	**Socio-Psychological Roots of Conflict:** Intergroup threat, dehumanization, and enemy images; Small group dynamics in polarization; The role of collective memory, cultural narratives, and propaganda in driving social conflict and discrimination.	15

Unit 3	**Conflict Resolution and Mediation Models:** Dual-Concern model of negotiation; Intergroup contact hypothesis and its modern updates; Interactive problem-solving approaches; Third-party mediation processes and structural dialogue rules.	15
Unit 4	**Reconciliation, Healing, and Peace Culture:** Structural adjustments for post-conflict societies: Truth and Reconciliation Commissions; Healing collective and transgenerational trauma; Psycho-educational steps for cultivating peace, non-violence, and social empathy in diverse youth populations.	15
	Total	**60**

Lecture / Tutorial	Practicum	Experiential learning
60 hrs	-	30 hrs
