Interdisciplinary Course

Subject Name: Social Anthropological
Code: SOC182I301
L-T-P-C: 2-1-0-3

Credit Units:3
Level of Course:200

Course Objective: This undergraduate course traces the intellectual evolution of anthropology from classical structuralism and functionalism to contemporary relational and feminist theories. It enables students and the instructor to collaboratively examine how the discipline has shifted from rigid, reified interpretations of society and culture to understanding social life, collective organization, and culture as dynamic, contextual, and relational.

Course Outcomes: After successful completion of the course, the student will be ableto:

CO1	Explain major anthropological theories and their evolution from classical to contemporary perspectives.	**BT-1**
CO2	Analyse kinship, gender, personhood, and social relations using relational and feminist anthropological frameworks.	**BT-2**

CO3	Critically evaluate cultural categories, binaries, and ethnographic knowledge through comparative anthropological analysis.	**BT-3**
CO4	Apply anthropological theories and ethnographic methods to understand contemporary social, political, and indigenous issues, particularly in Northeast India.	**BT-4**

Detailed Syllabus

Modules	**Course Contents**	**Periods**
I	Classical and Interpretive Perspectives in Social Anthropology: Kinship and Social Organization, Unilineal Descent and Social Structure, Structural-Functionalism, Functionalism and Kula Exchange, Religion and Social Solidarity, Symbolism and Thick Description	**15**
II	**Gender, Personhood and Contemporary Anthropological Perspectives** Critique of Classical Ethnography, Gender and Social Relations, Women's Wealth and Exchange, Personhood and Identity, Gift Exchange and Social Networks, Gender, Power and Representation	**15**
III	**Kinship, Exchange and Indigenous Social Systems** Parenthood and Kinship, Gift Exchange and Reciprocity, Money and Relational Economy, Ritual and Kula Exchange, Indigenous Knowledge Systems, State and Society	**15**
IV	**State, Indigenous Societies and Ethnographic Practice** State and Indigenous Societies, Colonialism and Environmental Governance, Social Reproduction and Public Groups, Ethnography in Northeast India, Bureaucracy, Migration and Identity, Ethnographic Methods and Research Ethics	**15**
	Total	**60**

Subject Name: Environmental Sociology

Subject Code: SOC182M403

L-T-P-C 3-1-0-4

Credit Units:4

Level of Course:200

Scheme of Evaluation: Theory (Internal – 30% and Semester End Examination- 70%)

Course Objective: *This course aims to introduce students to the field of environmental sociology, which interrogates the relationship between society and the environment. It provides an understanding of key theoretical perspectives, debates, topics, and new directions within environmental sociology.*

Course Outcome: After the completion of the course, the students will be able to:

SN	**CO**		**BT**
1	**CO1**	***Define*** the complex relationships between people, nature, and the natural environment.	**BT1**
2	**CO2**	***Illustrate*** on what sociological thinking can contribute to understandings of environmental events, issues.	**BT2**
3	**CO3**	***Apply*** sociological theories and concepts to explain environmental issues.	**BT3**
4	**CO4**	***Analyze*** the connections between bio-physical and socio-cultural systems	**BT4**

Detailed Syllabus

Modules	Topics / Course Content	Periods
I	Envisioning and development of Environmental Sociology. Classical thinkers on Environment. Sociology and Environment. Human society and Environment interaction. Environmental Ethics. Realist vs Constructionist debate. Nature-Culture debate. Nature-Nurture debate.	**15**
II	Approaches: Ecological Modernization Theory. Risk society. Ecofeminism and Feminist Environmentalism.	**15**
III	Environmental Issues: Pollution and Waste. Global warming: meaning, consequences, responses to the risk of global warming. Consumerism and environmental damage. Basic principles of sustainable development. Politics of sustainable development. Social impact of environmental issues- water wives and tiger widows.	**15**
IV	India's green movements. Ecological Conflicts. Environmental movements in India: Forest based movement- Chipko. Water based movement- Narmada. New Social Movements.	**15**
Total		**60**

Minor Course

Subject Name: Population Studies

Subject Code: SOC182N401

L-T-P-C: 3-1-0-4

Credit Units: 4

Level of Course: 200

Scheme of Evaluation: Theory (Internal – 30% and Semester End Examination-70%)

Course Objective: *This paper aims at exploring the entrenched relationship between demography and society*

Course Outcome: After the completion of the course, the students will be able to:

CO1	***Define*** basic concepts of demographic components and its relevance	**BT-1**
CO2	*Illustrate* the intricate relationship of demography and sociology	BT-2
CO3	*Applying* the understanding of population theories and its contribution in building of population policies	BT-3
CO4	*Analyze* various complex issues relating to population and its critical assessment	BT-4

Detailed Syllabus:

Modules	Topics / Course content	Periods
I	Demography and society: Concepts and the relationship, Interface between Sociology and Demography, Demographic Components: Fertility, Mortality and Migration, Population Structure and Size.	15

II	Population Theories: Pre-Malthusian Approach (Populationist views), Malthusian Theory of Population and its Critique, Neo- Malthusian Approach to Population, Socialist and Marxist Approach to Population and criticisms.	15
III	Population Theories: Demographic Transition Theory, Optimum Theory of Population, Naturalist/ Biological Approach to Population, Application of Sociological Approach to Population.	15
IV	Introduction to population studies in India, Population Policies: Sociology of population Policy in India, Programs and Initiatives and their critique, National Population Policy	15

Subject Name: Sociology of Science

Subject Code: SOC182N501

L-T-P-C 2-1-0-3

Credit Units: 4

Level of Course: 300

Scheme of Evaluation: Theory (Internal – 30% and SEE 70 %

Course Objective: The present course aims to focus on the increasing complexities of the interrelationship between science, technology and society. Science and technology policy of twenty-first century is faced by challenges like emerging technology, globalization and environmental movement. Some of the notions like objectivity, rationality, skepticism, systematic investigation, scientific temper requires an understanding of how science emerged as a social institution, what role S&T plays in our society and how socioeconomic structure influence the character of modern science. This course will familiarize undergraduate students about the basic concepts and perspectives on science and technology and explore the emergence and growth of modern science and technology in India. The course will discuss issues concerning both functional and dysfunctional aspects of the impact of science and technology on society and vice versa.

Course Outcome: After the completion of the course, the students will be able to:

SN	CO		BT
1	**CO1**	*Define* science and non-science	**BT1**
2	**CO2**	*Illustrate* the social and cultural shaping of science and technology	**BT2**
3	**CO3**	*Apply* the concepts to understand the development of science and technology in the Indian context	**BT3**
4	**CO4**	*Analyze* the challenges and opportunities of emerging technologies in the globalized world	**BT4**

Detailed Syllabus

Modules	Topics / Course Content	Periods
I	Science and Non-Science, Theories of Scientific Knowledge, Scientific Revolution, Social Construction of Scientific Knowledge	**15**
II	Science as a Social Institution, Science, Technology and Culture, Inequalities in Science: Matthew Effect and Mertonian Paradigm, Science and Religion	**15**

III	Science and Technology in India, Development of Indian Science and Technology in Colonial and Post Colonial India, Science Policy and Indian Scientific Community	**15**
IV	Science and Technology in Globalized world: Challenges and opportunities of emerging technologies like Information technology and Bio-technology. TRIPS; Patent Laws and Indigenous Knowledge. Consequences and Implications.	**15**

BA Sociology 6th Semester

Subject Name: Political Sociology
Subject Code: SOC182M601
L-T-P-C **3-1-0-4**
Credits: 4
Level of Course: 300
Scheme of Evaluation: Theory (Internal – 30% and Semester End Examination-70%

Course Objective: *This course introduces the students to some major theoretical debates and concepts in Political Sociology, while situating these within contemporary political issues. A key thrust of the paper is towards developing a comparative understanding of political relationships through themes such as power, governance and state and society relationships.*

Course Outcome: After the completion of the course, the students will be able to:

SN	**CO**		**BT**
1	**CO1**	*Define* the various conceptual tools to understand state	**BT1**
2	**CO2**	*Illustrate* the functioning of state society relations	**BT2**
3	**CO3**	*Apply* the concepts to understand the question of power in the context of the modern states	**BT3**
4	**CO4**	*Analyze* the political systems of different nations around the world	**BT4**

Detailed Syllabus

Modules	**Topics / Course Content**	**Periods**
I	Contextualizing Political Sociology: Tom Bottomore, Dipankar Gupta. Concept of Power: Marx, Durkheim, Weber, Foucault: Panopticon, governmentality and biopolitics. Elite theory: Pareto and Mosca. Power Elite: C.W. Mills.	**15**

II	State, Citizenship and Governance: Everyday State and Local Structures of Power- Panchayati Raj, village councils and Gaon Panchayat. Citizenship: social and political rights. Civil Society: pressure group, interest group	**15**
III	African political system: societies with state and stateless societies. Totalitarian system: Pattern of governance. Democratic system: the question of caste and tribe in Indian politics	**15**
IV	Ethnicity and Identity Assertion in North East India: homeland and homelessness: Naga movement, Assam movement, Bodo Movement.	**15**
Total		**60**

BA Sociology 7th Semester

Subject Name:
Advanced Methodology
Code: SOC182M701
L-T-P-C: 3-1-0-4
Credit Units:4 Level of Course:400

Course Objective:
To develop advanced knowledge and practical competence in research methodology. Enable students to critically design, conduct, analyze, and interpret social research using appropriate qualitative, quantitative, and mixed method approaches while adhering to ethical and academic standards.
Course Outcomes: After successful completion of the course, the student will be able to:

CO1	Develop an advanced understanding of research paradigms, approaches, and methodological frameworks in social research.	**BT-1**
CO2	Illustrate appropriate qualitative, quantitative, and mixed research methods for designing and conducting empirical studies.	**BT-2**
CO3	Apply and interpret research data using suitable tools, techniques, and methodological procedures.	**BT-3**
CO4	Analyse ethical research practices and produce academically rigorous research reports, dissertations, and publications	**BT-4**

Detailed Syllabus

Modules	Course Contents	Periods
I	Foundations of Advanced Research Methodology: Nature and philosophy of social research Research paradigms: Positivism, Interpretivism, Critical and Postmodern approaches.	**15**
II	Advanced Qualitative and Quantitative Methods Qualitative methods: Ethnography, phenomenology, grounded theory, case study Quantitative methods: Survey, experimental and quasi-experimental research Reflexivity in Social Research, Post-Positivistic Paradigm ,Field-Based Learning in Research, Practical Application of Methodology	**15**

III	Ethics, Academic Writing, and Emerging Trends Research ethics: Consent, confidentiality, and reflexivity Academic writing: Research proposal, dissertation, and article writing Publication ethics: Citation, referencing, and plagiarism issues	**15**
IV	Emerging methods Digital sociology: Digital humanism, digital transformation, digital exclusion Visual methods: Visual ethnography, photo-documentation, mass media Intersectionality: Technology and social science	**15**

Credits: 4

Level of Course: 300

Scheme of Evaluation: Theory (Internal – 30% and Semester End Examination-70%)

Course Objective: The course provides an understanding of the social and cultural bases of economic activity. It highlights the significance of sociological analysis for the study of economic processes in local and global contexts. The course enables students to evaluate the contributions of major thinkers including Karl Polanyi, Granovetter, Marcel Mauss, Marshall Sahlins, Eric R. Wolf, and David Harvey in understanding economic life as socially embedded. Most importantly, the paper challenges the assumption that human beings are merely rational profit maximizers. It demonstrates that economies are fundamentally social institutions shaped by values, obligations, identities, and struggles overpower and resources. This makes Economic Anthropology indispensable for understanding contemporary social transformations, especially in societies experiencing rapid development, inequality, and cultural change.

SN	CO		BT
1	**CO1**	***Define*** key concepts in economic anthropology and economic sociology such as economy, market, exchange, reciprocity, gift, labour, value, scarcity, substantivism, formalism, globalization, dependency, neoliberalism, uneven development etc.	**BT1**
2	**CO2**	***Illustrate*** the relationship between economy and society through examples from tribal, peasant, capitalist, and socialist societies with an ability to place embeddedness and disembeddedness.	**BT2**
3	**CO3**	***Apply*** the concepts of embeddedness, reciprocity, redistribution, and market exchange to contemporary social and economic issues.	**BT3**
4	**CO4**	***Analyze*** the critiques of Classical Economics and compare formalist and substantivist approaches to the economy.	**BT4**

Detailed Syllabus

Modules	Topics / Course Content	Periods
I	**Foundations of Economic Sociology:** Economic Sociology as an undisciplined discipline; Embeddedness and Substantivism: The Fallacy of Relative Choice and Scarcity; The Substantive Economy; Concept of Formalism: Economic Solipsism (Karl Polanyi), Economic Rationalism, Interaction and Institutions (Karl Polanyi); Emergence of subjective theory of value (Carl Menger); Criticism of Classical Economics; Market as a political institution in the state.	**15**
II	**Exchange, Reciprocity and Moral Economy:** Prestation, Gift and Potlatch (Marcel Mauss); Gifts and the obligation to return gifts; generosity, honour and money; Kula exchange; Morality and Contract Nexus. Exchange and Money: utilitarian Approach to Money; Exploring the Quality of Modern Money, Role of Money in Capitalist Society and Role of Money in Socialist Society.	**15**
III	**Systems of Production, Circulation and Consumption:** Subsistence Economy (Marshall Sahlins); Domestic Mode of Production: The Structure of Underproduction; Peasant: Peasants and primitives (Eric R. Wolf).
