Course Name	**ENVIRONMENTAL SCIENCE**
Course Code	
Course Type	**Value-added Course**
Course Credit	**2**
Semester	**II**
Objectives	The objectives of the course are to: • To develop an understanding of the multidisciplinary nature of environmental studies, components of the environment, and the importance of natural resources in sustaining ecological balance. • To familiarize students with biodiversity, conservation strategies, and the environmental challenges arising from resource exploitation and ecological degradation. • To impart knowledge regarding different forms of environmental pollution, waste management practices, and environmental protection measures and policies. • To enable students to examine the relationship between human communities and the environment, including issues relating to population growth, disaster management, rehabilitation, and sustainable development.
Course Outcomes (COs)	Upon successful completion of the course the students will be able to:

S. No	Course Outcome	Blooms Taxonomy Level
CO-1	Explain the basic concepts of environmental studies, components of the environment, natural resources, and biodiversity.	2
CO-2	Apply principles of environmental conservation, pollution control, and sustainable resource management in practical and social contexts.	3
CO-3	Analyse environmental problems, biodiversity loss, waste management issues, and the impact of human activities on ecological systems.	4
CO4	Evaluate environmental policies, disaster management strategies, and sustainable development practices for environmental protection and human welfare.	5

Course Outline	

Unit I: Introduction to Environmental Studies and Natural Resources

1.1 Introduction to Environmental Studies

- Multidisciplinary nature of environmental studies
- Components of environment
  - Atmosphere
  - Hydrosphere
  - Lithosphere
  - Biosphere
- Scope and importance of environmental studies

1.2 Natural Resources

- Renewable and non-renewable resources
- Land resources and land use change
- Land degradation, soil erosion and desertification
- Deforestation: causes and impacts
- Impact of mining and dam building on environment, forests, biodiversity and tribal populations
- Water resources: use and over-exploitation of surface and groundwater
- Floods, droughts and conflicts over water (international and inter-state)

Unit II: Biodiversity and Conservation

2.1 Biodiversity

- Levels of biological diversity
  - Genetic diversity
  - Species diversity
  - Ecosystem diversity
- Biodiversity patterns and global biodiversity hotspots
- India as a mega-biodiversity nation

2.2 Conservation of Biodiversity

- Biogeographic zones of India
- Importance of biodiversity conservation
- Threats to biodiversity and conservation measures

Unit III: Environmental Pollution and Environmental Policies

3.1 Environmental Pollution

- Meaning, types, causes, effects and control measures
- Air pollution
- Water pollution
- Soil pollution
- Chemical pollution
- Noise pollution

		• Nuclear hazards and human health risks **3.2 Waste Management and Environmental Practices** • Solid waste management • Control measures of urban and industrial waste • Pollution case studies • Environmental policies and sustainable environmental practices **Unit IV: Human Communities and Environment** **4.1 Human Population and Environment** • Human population growth and its impact on environment • Human health and welfare • Carbon footprint **4.2 Development and Disaster Management** • Resettlement and rehabilitation of project-affected persons • Relevant case studies • Disaster management o Floods o Earthquakes o Cyclones o Landslides
